Modern Sound Reproduction:

Modern Sound Reproduction Harry Ferdinand Olson, 1972 **Modeling the Radiation of Modern Sound Reinforcement Systems in High Resolution** Stefan Feistel, 2014 Starting from physical theory this work develops a novel framework for the acoustic simulation of sound radiation by loudspeakers and sound reinforcement systems First a theoretical foundation is derived for the accurate description of simple and multi way loudspeakers using an advanced point source CDPS model that incorporates phase data The model s practical implementation is presented including measurement requirements and the GLL loudspeaker data format specification In the second part larger systems are analyzed such as line arrays where the receiver may be located in the near field of the source It is shown that any extended line source can be modeled accurately after decomposition into smaller CDPS elements The influence of production variation among elements of an array is investigated and shown to be small The last part of this work deals with the consequences of fluctuating environmental conditions such as wind and temperature on the coherence of sound signals from multiple sources A new theoretical model is developed that allows predicting the smooth transition from amplitude to power summation as a function of the statistical properties of the environmental parameters A part of this work was distinguished with the AES Publications Award 2010 Parts of the proposed data format have been incorporated into the international AES56 standard

The Sculpted Ear Ryan McCormack, 2020-04-17 Sound and statuary have had a complicated relationship in Western aesthetic thought since antiquity Taking as its focus the sounding statue a type of anthropocentric statue that invites the viewer to imagine sounds the statue might make *The Sculpted Ear* rethinks this relationship in light of discourses on aurality emerging within the field of sound studies Ryan McCormack argues that the sounding statue is best thought of not as an aesthetic object but as an event heard by people and subsequently conceptualized into being through acts of writing and performance Constructing a history in which hearing plays an integral role in ideas about anthropocentric statuary McCormack begins with the ancient sculpture of Laocöon before moving to a discussion of the early modern automaton known as Tipu's Tiger and the statue of the Commendatore in Mozart's *Don Giovanni* Finally he examines statues of people from the present and the past including the singer Josephine Baker the violinist Aleksandar Nikolov and the actor Bob Newhart with each case touching on some of the issues that have historically plagued the aesthetic viability of the sounding statue McCormack convincingly demonstrates how sounding statues have served as important precursors and

continuing contributors to modern ideas about the ontology of sound technologies of sound reproduction and performance practices blurring traditional divides between music sculpture and the other arts A compelling narrative that illuminates the stories of individual sculptural objects and the audiences that hear them this book will appeal to anyone interested in the connections between aurality and statues in the Western world in particular scholars and students of sound studies and sensory history

Turning The Century Carol Stabile, 2018-04-24 The essays in *Turning the Century* make a significant contribution to our understanding of America's love affairs with novelty and the mass media The essays also show that neither the current communications revolution nor the response to it is unprecedented Through this book Carol Stabile provides a historical context within which scholars and students of American culture can interpret and understand end of the millennium fever particularly the claims of politicians pundits and even cultural studies scholars who maintain that recent information technology innovations make the present moment unique Contemporary studies of mass media and popular culture reflect a similar emphasis on what is new distinct and therefore specific to contemporary culture Claims of millennial transformation however are only possible insofar as the history of mass media can be forgotten or ignored In *Turning the Century* Carol Stabile analyzes those hidden and now all but forgotten conditions and relations of production that continue to shape and inform contemporary culture

Savage Preservation Brian Hochman, 2014-11-15 During the late nineteenth and early twentieth centuries writers and anthropologists believed that the world's primitive races were on the brink of extinction They also believed that films photographs and phonographic recordings modern media in their technological infancy could capture lasting relics of primitive life before it vanished into obscurity For many Americans the promise of media and the problem of race were inextricably linked While professional ethnologists tried out early recording machines to preserve the sounds of authentic indigenous cultures photographers and filmmakers hauled newfangled equipment into remote corners of the globe to document rituals and scenes that seemed destined to vanish forever In *Savage Preservation* Brian Hochman shows how widespread interest in recording vanishing races and disappearing cultures influenced audiovisual innovation experimentation and use in the United States Drawing extensively on seldom seen archival sources from phonetic alphabets and sign language drawings to wax cylinder recordings and early color photographs Hochman uncovers the parallel histories of ethnography and technology in the turn of the century period While conventional wisdom suggests that media technologies work mostly to produce ideas about race *Savage Preservation* reveals that the reverse has also been true During this period popular conceptions of race constructed the authority of new media technologies as reliable archives of the real Brimming with nuanced critical insights and unexpected historical connections *Savage Preservation* offers a new model for thinking about race and media in the American context and a fresh take on a period of accelerated technological change that closely resembles our own
