The Gospel Miracles: What Really Happened? Michael J. Lowis,2014-12-11 The Gospel Miracles examines the thirty five miracles performed by Jesus as reported in the four Gospels The objectives are firstly to try and determine what really happened at the time they were enacted and secondly to see if it is possible to explain them This exercise is neither an attempt to deny miracles nor to blindly accept the accounts as inerrant but it is an unbiased attempt to arrive at the truth The findings conclude that sometimes there are possible naturalistic or simple alternative explanations to a supernatural one

However this does not discount the possibility that Jesus employed natural means at the right time for the right reasons The Gospel Miracles concludes with a summary of some more modern reports of miraculous events

Adult Psychopathology Francis Joseph Turner, 1984 History of Psychiatry and Medical Psychology Edwin R. Wallace, John Gach, 2010-04-13 Most of the prefatory issues are extensively elaborated upon in the Prolegomenon which also contains the complete references to the texts and authors discussed below Nevertheless the Preface would be grossly incomplete without touching on some of these issues books and scholars Too many of this book s chapters e g Mora s Marx s D B Weiner s examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in German French Italian and Spanish Also in his 1968 Short History of Psychiatry discussed below Ackerknecht pp xi xii references important nineteenth and earlier twentieth century psychiatric histories in English French and German Such citations will of course not be repeated here Finally thanks to several publishers re editions of dozens of classical psychiatric texts one can consult their bibliographies as well See Prolegomenon for references to these splendid series In a rough and ready sense medical history began in classical Greece for example On Ancient Medicine While traditionally included in the Hippocratic corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor Moreover the Hippocratic and other schools were hardly as secular as we now suppose On Epilepsy for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease
