Modern The Modern Movement In Britain:

Modern Alan Powers, 2005 Encyclopedic in scope and structure this comprehensive study of Modern Movement architecture in Britain covers the work of such renowned architects as Walter Gropius Marcel Breuer Eric Mendelsohn and Serge Chermayeff together with specially commissioned photographs of all the major extant buildings **The Modern Movement** Chris Baldick, 2004 A major new survey of literature in England during the first half of the twentieth century Chris Baldick places modernist with non modernist writings high art with low entertainment The Modern Movement ranges broadly covering psychological novels war poems detective stories satires children's books and other literary forms evolving in response to the new anxieties and exhilarations of twentieth century life **Modern Buildings in Britain** Owen Hatherley, 2022-04-07 The definitive illustrated guide to modern British architecture from one of the most acclaimed critics at work today Modernism is now a century old and its consequences are all around us built into our everyday lived environments Its place in Britain's history is fiercely contested and its role in our future is the subject of ongoing controversy but modernist buildings have undoubtedly changed our cities politics and identity forever In Modern Buildings in Britain Owen Hatherley applauds the ambition and explores the significance of this most divisive of architectures travelling from Aberystwyth to Aberdeen from St Ives to Shetland in search of our most important and distinctive modern buildings Drawing on hundreds of examples we learn how the concrete of Brutalism embodies post war civic principles how corporate values were expressed in the glass facades of the International Style and why Ecomodernist experimentation is often consigned to the geographic fringes As Hatherley considers the social political and cultural value of these structures a number of which are threatened by demolition two linked questions emerge what happens to a building after it has been lived in and what becomes of an idea when its time has passed With more than six hundred pages of trenchantly opinionated often witty analysis and with three hundred photographs in duotone and colour Modern Buildings in Britain is a landmark contribution to the history of British architecture **1938: Modern Britain** Michael John Law, 2017-12-14 In 1938 Modern Britain Michael John Law demonstrates that our understanding of life in Britain just before the Second World War has been overshadowed by its dramatic political events 1938 was the last year of normality and Law shows through a series of case studies that in many ways life in that year was far more modern than might have been thought By considering topics as diverse as the opening of a new type of pub the launch of several new magazines the emergence of push button radios and large screen televisions sets and the building of a huge office block he reveals a Britain both modern and intrigued by its own modernity that was stopped in its tracks by war and the austerity that followed For some life in Britain was as consumerist secular Americanized and modern as it would become for many in the late 1950s and early 1960s Presenting a fresh perspective on an important year in British social history illuminated by six engaging case studies this is a key study for students and scholars of 20th century Britain [The Oxford English Literary History: Volume 10: 1910-1940: The Modern](#)

Movement Chris Baldick, 2005-11-10 This exciting new volume provides a freshly inclusive account of literature in England in the period before during and after the First World War Chris Baldick places the modernist achievements of Virginia Woolf T S Eliot and James Joyce within the rich context of non modernist writings across all major genres allowing high literary art to be read against the background of low entertainment Looking well beyond the modernist vanguard Baldick highlights the survival and renewal of realist traditions in these decades of post Victorian disillusionment Ranging widely across psychological novels war poems detective stories satires and children s books *The Modern Movement* provides a unique survey of the literature of this turbulent time

Britain Alan Powers, 2007 Thoroughly illustrated with images of the buildings under discussion advertisements and other historical photographs *Britain* is an authoritative yet highly accessible account of twentieth century British architecture

Modernist Semis and Terraces in England Finn Jensen, 2016-12-05 Between the two World Wars there was an unprecedented need for new houses in Britain which resulted in a building boom While only a small percentage of this building took the form of Modernism there was still a significant number of semis and terraces built for the workers and middle class families in the 1920s and 1930s built in this style This book examines these modest Modernist houses within the broader context of the Modern Movement in Europe as well as the inter war building boom in suburban Britain Illustrated with line drawings and photographs of more than 30 examples from around the country and based on little known contemporary material such as catalogues advertisements radio broadcasts and letters it shows how these houses speak of a time of political social and artistic unrest and a world where the avant garde architects sought to capture the spirit of modern technology in their designs for the average home owner While the Modernist houses never became popular with the general public the fact that so many are still standing and now sought after by twenty first century families speak for their endurance and special appeal

Modern England 1901-1970 Alfred Havighurst, 1976-05-13 This is a comprehensive bibliography of all printed books articles and standard texts on England Ireland Scotland the Commonwealth and the colonies up to 1970 This handbook will serve as a useful guide to scholars teachers at all levels advanced students and the general reader interested in examining the period in some depth

Designing the British Post-War Home Fiona Fisher, 2015-04-10 In *Designing the British Post War Home* Fiona Fisher explores the development of modern domestic architecture in Britain through a detailed study of the work of the successful Surrey based architectural practice of Kenneth Wood Wood s firm is representative of a geographically distinct category of post war architectural and design practice that of the small private practice that flourished in Britain s expanding suburbs after the removal of wartime building restrictions Such firms which played an important role in the development of British domestic design are currently under represented within architectural histories of the period The private house represents an important site in which new spatial material and aesthetic parameters for modern living were defined after the Second World War Within a British context the architect designed private house remained an important vehicle for the investigation of architectural ideas by

second generation modernist architects and designers Through a series of case study houses designed by Wood s firm the book reconsiders the progress of modern domestic architecture in Britain and demonstrates the ways in which architectural discourse and practice intersected with the experience performance and representation of domestic modernity in post war Britain

Modern Movement Heritage Allen Cunningham,2013-10-18 An introduction to the subject and the specific problems related to the conservation of modern structures Celebrating the first five years of DoCoMoMo s role and influence this collection covers policy planning and construction

Facadism Jonathan Richards,1994 Presents a critical analysis of a concept central to modern city development examining the effects of architectural philosophies principles of urban conservation heritage planning and the market forces of urban development

Libraries - Traditions and Innovations Melanie A. Kimball,Katherine M. Wisser,2017-05-08 Many consider libraries to be immutable institutions deeply entrenched in the past full of dusty tomes and musty staff In truth libraries are and historically have been sites of innovation and disruption Originally presented at the Library History Seminar XII Libraries Traditions and Innovations this collection of essays offers examples of the enduring and evolving aspects of libraries and librarianship Whether belonging to a Caliph in 10th century Spain built for 19th century mechanics or intended for the segregated Southern United States libraries serve as both a reflection and a contestation of their context These essays illustrate that libraries are places of turmoil where real social and cultural controversies are explored and resolved where invention takes place and where identities are challenged and defined reinforcing tradition and commanding innovation

From Space in Modern Art to a Spatial Art History Jutta Vinzent,2019-12-02 This book traces artists theories of constructive space in the first half of the twentieth century Drawing on these concepts and recent theories on space it develops a methodology termed Spatial Art History that conceives of artworks as physical spatio temporal things which produce the social to overcome the reductive understanding of art as a mere mirror or facilitator of society

Archigram Simon Sadler,2005-06-24 The first book length critical and historical account of an ultramodern architectural movement of the 1960s that advocated living equipment instead of buildings In the 1960s the architects of Britain s Archigram group and Archigram magazine turned away from conventional architecture to propose cities that move and houses worn like suits of clothes In drawings inspired by pop art and psychedelia architecture floated away tethered by wires gantries tubes and trucks In Archigram Architecture without Architecture Simon Sadler argues that Archigram s sense of fun takes its place beside the other cultural agitants of the 1960s originating attitudes and techniques that became standard for architects rethinking social space and building technology The Archigram style was assembled from the Apollo missions constructivism biology manufacturing electronics and popular culture inspiring an architectural movement High Tech and influencing the postmodern and deconstructivist trends of the late twentieth century Although most Archigram projects were at the limits of possibility and remained unbuilt

the six architects at the center of the movement Warren Chalk Peter Cook Dennis Crompton David Greene Ron Herron and Michael Webb became a focal point for the architectural avant garde because they redefined the purpose of architecture Countering the habitual building practice of setting walls and spaces in place Archigram architects wanted to provide the equipment for amplified living and they welcomed any cultural rearrangements that would ensue Archigram Architecture without Architecture the first full length critical and historical account of the Archigram phenomenon traces Archigram from its rediscovery of early modernist verve through its courting of students to its ascent to international notoriety for advocating the disappearance of architecture

Rebuilding Construction (Routledge Revivals) Michael Ball, 2014-03-18 First published in 1988 this book analyses the changes that took place in the economic organisation of the British construction industry throughout the 1970s and early 1980s in particular considering its social and economic structure and examining the causes of its poor industrial record Michael Ball describes how the major firms survived the economic slump between 1973 and 1982 when construction workloads collapsed by substantially restructuring their operations relationships with clients workforces and subcontractors Detailed attention is paid to construction firms the workers they employ the influence of trade unionism and the role of other agencies in the building process Reissued at a particularly challenging time for the British construction industry this relevant and practical title will be of value to students and academics of economics and social change as well as those on courses for construction professionals

Building the Post-war World Nicholas Bullock, 2002 Building the Post War World offers for the first time an overall account of Modern Architecture in the decade after the Second World War

Modern Architectural Theory Harry Francis Mallgrave, 2009-07-13 Modern Architectural Theory is the first book to provide a comprehensive survey of architectural theory primarily in Europe and the United States during three centuries of

development In this synthetic overview Harry Mallgrave examines architectural discourse within its social and political context He explores the philosophical and conceptual evolution of its ideas discusses the relation of theory to the practice of building and most importantly considers the words of the architects themselves as they contentiously shaped Western architecture He also examines the compelling currents of French rationalist and British empiricist thought radical reformation of the theory during the Enlightenment the intellectual ambitions and historicist debates of the nineteenth century and the distinctive varieties of modern theory in the twentieth century up to the profound social upheaval of the 1960s Modern Architectural Theory challenges many assumptions about architectural modernism and uncovers many new dimensions of the debates about modernism *A History of Interior Design* John F. Pile, 2005 Delivers the inside story on 6 000 years of personal and public space John Pile acknowledges that interior design is a field with unclear boundaries in which construction architecture the arts and crafts technology and product design all overlap
