## **Modern Tyrants The Power Prevalence Of Evil In Our Age:**

Modern Tyrants Daniel Chirot, 1994-02-07 Along with its much vaunted progress in scientific and economic realms our century has witnessed the rise of the most brutal and oppressive regimes in the history of mankind Even with the collapse of Marxism current references to ethnic cleansing remind us that tyranny persists in our own age and shows no sign of abating Daniel Chirot offers an important and timely study of modern tyrants both revealing the forces which allow them to come to power and helping us to predict where they may arise in the future Tyrannical rule typically begins in an economically depressed and unstable society with no real tradition of democratic government Under such circumstances a self pitying nationalism often arises along with a widespread popular perception among the citizenry that grave injustices have been committed against them When a charismatic leader is able to exploit this situation he may sanction unspeakable atrocities while claiming to uphold cherished national myths Chriot analyzes the careers and characters of notorious dictators such as Stalin Hitler Mao and Saddam as well as lesser known tyrants such as Kim II Sung of North Korea Ne Win of Burma Argentina s Peron the Dominican Republic s Trujillo Pol Pot Duvalier and others He demonstrates how they can survive the rise and fall of particular ideologies and reveals the frightening new marriages between nationalism and a host of local concerns The lesson drawn is stark and disturbing the age of modern tyranny is upon us and unlikely to fade soon The Path to Tyranny Michael Newton, 2010-05-17 Examines how many free societies have fallen to tyranny and looks at the possibility that the United States could be next International Criminal Law, Volume 3: International Enforcement M. **Following Christ and Confucius** Christopher Payk, 2024-03-15 The first full length critical biography and theological analysis of Wang Mingdao the spiritual father of China's House Church Movement One of the most influential figures in Chinese Christianity church leader and evangelist Wang Mingdao rejected state control of religion in favor of the religious freedom of the unregistered House Churches a choice that made him a frequent target of government persecution In this thorough new biography scholar Christopher Payk traces Wang's life and Christian development through the sociopolitical tumult of twentieth century China Drawing on unpublished sermons journals and additional sources in English and Chinese Payk argues persuasively that Wang's theology while largely based on Christian scripture was shaped by Confucian tradition reason and personal experience Following Christ and Confucius brings new clarity to Wang's uncompromising faith and lasting impact

Mirrors of Destruction Omer Bartov, 2000-08-24 Mirrors of Destruction examines the relationship between total war state organized genocide and the emergence of modern identity Here Omer Bartov demonstrates that in the twentieth century there have been intimate links between military conflict mass murder of civilian populations and the definition and categorization of groups and individuals These connections were most clearly manifested in the Holocaust as the Nazis attempted to exterminate European Jewry under cover of a brutal war and with the stated goal of creating a racially pure Aryan population and Germanic empire The Holocaust however can only be understood within the context of the century's predilection for applying massive and systematic methods of destruction to resolve conflicts over identity To provide the context for the Final Solution Bartov examines the changing relationships between Jews and non Jews in France and Germany from the outbreak of World War I to the present Rather than presenting a comprehensive history or a narrative from a single perspective Bartov views the past century through four interrelated prisms He begins with an analysis of the glorification of war and violence from its modern birth in the trenches of World War I to its horrifying culmination in the presentation of genocide by the SS as a glorious undertaking He then examines the pacifist reaction in interwar France to show how it contributed to a climate of collaboration with dictatorship and mass murder The book goes on to argue that much of the discourse on identity throughout the century has had to do with identifying and eliminating society's elusive enemies or enemies from within Bartov concludes with an investigation of modern apocalyptic visions showing how they have both encouraged mass destructions and opened a way for the reconstruction of individual and collective identities after a catastrophe Written with verve Mirrors of Destruction is rich in interpretations and theoretical tools and provides a new framework for understanding a central trait of modern history

Fuzzy-Set Social Science Charles C. Ragin, 2000-08 In this innovative approach to the practice of social science Charles

Ragin explores the use of fuzzy sets to bridge the divide between quantitative and qualitative methods. He argues that fuzzy sets allow a far richer dialogue between ideas and evidence in social research than previously possible.

**The Geography of Genocide** Allan D. Cooper, 2009. The Geography of Genocide offers a unique analysis of over sixty genocides in world history explaining why genocides only occur in territorial interiors and never originate from cosmopolitan urban centers. This study explores why genocides tend to result from emasculating political defeats experienced by perpetrator groups and examines whether such extreme political violence is the product of a masculine identity crisis. Author Allan D. Cooper notes that genocides are most often organized and implemented by individuals who have experienced traumatic childhood events involving the abandonment or abuse by their father. Although genocides target religious groups, nations, races, or ethnic groups, these identity structures are rarely at the heart of the war crimes that ensue. Cooper integrates research derived from the study of serial killing and rape to show certain commonalities with the phenomenon of genocide. The Geography of Genocide presents various strategies for responding to genocide and introduces Cooper's groundbreaking alternatives for ultimately inhibiting the occurrence of genocide.

**BOOK JACKET** *Endurance and War* Jasen J. Castillo, 2014-04-09. Scholars and military practitioners alike have long sought to understand why some country's militaries fight hard when facing defeat while others collapse. In *Endurance and War*, Jasen Castillo presents a new unifying theory, cohesion theory, to explain why national militaries differ in their staying power. His argument builds on insights from the literatures on group solidarity in general and military effectiveness in particular, which argue that the stronger the ties binding together individuals in a group of any kind, the higher the degree of cohesion that a group will exhibit when taking collective action, including fighting in war. Specifically, he argues that two types of ties determine the cohesion and therefore the resilience of a nation's armed forces during war: the degree of control a regime holds over its citizens and the amount of autonomy the armed forces possess to focus on training for warfighting. Understanding why armed forces differ in their cohesion should help U.S. military planners better assess the military capabilities of potential adversaries like Iran and North Korea. For scholars of international politics, cohesion theory can help provide insights into how countries create military power and how they win wars.

**Ethnic Politics After Communism** Zoltan D. Barany, Robert G. Moser, 2005. The Soviet Union encompassed dozens of nationalities and ethnicities, and in the wake of its collapse, the politics of the area have undergone enormous change. The articles in this book examine various facets of ethnicity in postcommunist Europe and Eurasia.

**Race and Morality** Melvyn L. Fein, 2012-12-06. After I had finished my presentation, a colleague and I sat rocking on the hotel porch to discuss its merits. It was a picture-perfect fall day in Jekyll Island, Georgia, and he was a friend. Yes, he explained what I was saying seemed to be true. And yes, it probably needed to be said, but why did I want to be the one to say it? Wasn't I, after all, a tenured professor who didn't need to make a fuss in order to retain his job? Didn't it make sense to just kick back and enjoy the easy life I had earned? The topic of our tête-à-tête was my speculations about race relations, and he was certain that too much honesty could

only get me in trouble Given my lack of political correctness people were sure to assume that I was a racist and not give me a fair hearing This was a prospect I had previously contemplated Long before embarking on this volume I had often asked myself why I wanted to write it The ideological fervor that dominates our public dialogue on race guaranteed that some people would perceive me as a dangerous scoundrel who had to be put in his place Overconfidence and War Dominic D. P. Johnson, 2009-07-01 Johnson argues that states are no more rational than people who are susceptible to exaggerated ideas of their virtue of the scope of their control and of the future By looking at such positive illusions in evolutionary biology psychology and politics of international conflict this book offers compelling insights into why states wage war **Making Progress** C. Leigh Anderson, Janet W. Looney, 2002-01-01 While a universal definition of progress has proved elusive measures of progress have been defined and grouped into the broad areas of material wealth social relations technical capacity and moral aesthetic and intellectual sensibilities However not until the Progress Project whose results are gathered here has the impact of progress on public policy in these realms been systematically explored In this volume noted scholars in economics government education technology literature culture and religion among other fields discuss the meaning and measurement of progress in their areas of specialty They assess particular policies that have either promoted or retarded progress and provide recommendations for policy processes or instruments that better reflect the nature of forward movement in the current era Making Progress is an important contribution to both the theoretical and practical literature on public policy it is a resource for scholars and students as well as a guide for policymakers analysts and advocates who help craft those policies in the name of progress *Essential Outsiders* Daniel Chirot, Anthony Reid, 2011-10-01 Ethnic Chinese in Southeast Asia like Jews in Central Europe until the Holocaust have been remarkably successful as an entrepreneurial and professional minority Whole regimes have sometimes relied on the financial underpinnings of Chinese business to maintain themselves in power and recently Chinese businesses have led the drive to economic modernization in Southeast Asia But at the same time they remain as the Jews were the quintessential outsiders In some Southeast Asian countries they are targets of majority nationalist prejudices and suffer from discrimination even when they are formally integrated into the nation The essays in this book explore the reasons why the Jews in Central Europe and the Chinese in Southeast Asia have been both successful and stigmatized Their careful scholarship and measured tone contribute to a balanced view of the subject and introduce a historical depth and comparative perspective that have generally been lacking in past discussions Those who want to understand contemporary Southeast Asia and the legacy of the Jewish experience in Central Europe will gain new insights from the book **The Great Lie** F. Flagg Taylor, 2023-10-03 The Most Insightful and Profound Reflections on Tyranny Totalitarianism was the dominant phenomenon of the twentieth century Deeply troubling questions endure regarding the nature of such tyrannical regimes What enabled human beings to carry out such horrific crimes against their fellow man What does the endurance of Communism reveal about human liberty Why did human beings suffer rule by

ideological lies for so long and what kept them open to the truth What are we to make of the relationship between totalitarianism and the foundational principles of democratic modernity Some of the greatest minds of the twentieth century sought answers to these haunting questions Now for the first time ever their incisive and profound reflections on totalitarianism have been brought together in one book The Great Lie showcases the insights of such giants as Aleksandr Solzhenitsyn Vaclav Havel Hannah Arendt Eric Voegelin Czeslaw Milosz Leo Strauss and Raymond Aron along with neglected but important thinkers such as Waldemar Gurian Aurel Kolnai Leszek Kolakowski Pierre Manent Claude Lefort and Chantal Delsol The brilliant essays in this volume illuminate the very nature of totalitarian regimes and the monstrous ideology that is their defining feature The Great Lie allows readers to make sense of political evil and how it can attract so many people into its ideological fold This is not a matter of mere academic interest in an age when we confront totalitarianism in such regimes as North Korea and Cuba and arguably in radical Islamist movements

Leadership and Business Ethics Gabriel Flynn, 2022-01-24 This book offers new and challenging approaches to business ethics that successfully link theory and practice thereby overcoming lacunae and inadequacies in much of the literature concerning ethics and governance a theme that recurs with remarkable frequency in the history of business ethics as an academic discipline This work provides imaginative and innovative proposals for the indispensable coupling of virtue integrity and character with global business finance and banking The volume seeks to overcome the marginal status of business ethics in universities business and enterprise by demonstrating that virtue ethics is an important step in the direction of an adequate response to the leadership issue This new edition of a popular work points to new ways of achieving an ever more urgent coalescence of ethics and business It proposes practical advice and viable suggestions to business people on what is right and wrong in business The volume makes a vital contribution in the area of education that should serve the ongoing development of top leaders In the important domain of women in leadership the volume provides new solutions that break boundaries on the global stage The work challenges unethical marketing of human images with important implications for citizenship and society The volume contains creative suggestions for the use of spirituality and human development for the enhancement of business and society The significantly extended second edition includes an exciting line up of leading academics and practitioners in the audacious hope that something may change for the better in the realms of business and banking

Bridling Dictators Graeme Gill, 2021-11-20 Galtieri Lukashenka and Putin are some of the dictators whose untrammelled personal power has been seen as typical of the dog eat dog nature of leadership in authoritarian political systems This book provides an innovative argument that rather than being characterised by permanent insecurity fear and arbitrariness the leadership of dictatorships is actually governed by a series of rules The rules are identified and their operation is shown in a range of different types of authoritarian regime The operation of the rules is explained in ten different countries across five different regime types the Soviet Union and China as communist single party regimes Argentina Brazil and Chile as military regimes electoral

authoritarian Malaysia and Mexico personalist dictatorships in Belarus and Russia and the Gulf monarchies Through close analysis of the way leadership functions in these different countries the book shows how the rules have worked in different institutional settings It also shows how the power distribution in authoritarian oligarchies is related to the rules The book transforms our understanding of how authoritarian systems work

**Balkan Strongmen** Bernd Jürgen Fischer, 2007 Bernd J Fischer has put together a collection that highlights the impact of Balkan leaders on nationalism ethnic and sociocultural factors economic frameworks and other territorial dynamics that provided the undercurrents that were exposed during the Balkan s recent fragmentation

**Dictators** Frank Dikötter, 2020-07-09 A New Statesman Financial Times and Economist Book of the Year Brilliant NEW STATESMAN BOOKS OF THE YEAR Enlightening and a good read SPECTATOR Moving and perceptive NEW STATESMAN Mussolini Hitler Stalin Mao Zedong Kim Il sung Ceausescu Mengistu of Ethiopia and Duvalier of Haiti No dictator can rule through fear and violence alone Naked power can be grabbed and held temporarily but it never suffices in the long term A tyrant who can compel his own people to acclaim him will last longer The paradox of the modern dictator is that he must create the illusion of popular support Throughout the twentieth century hundreds of millions of people were condemned to enthusiasm obliged to hail their leaders even as they were herded down the road to serfdom In Dictators Frank Dikötter returns to eight of the most chillingly effective personality cults of the twentieth century From carefully choreographed parades to the deliberate cultivation of a shroud of mystery through iron censorship these dictators ceaselessly worked on their own image and encouraged the population at large to glorify them At a time when democracy is in retreat are we seeing a revival of the same techniques among some of today s world leaders This timely study told with great narrative verve examines how a cult takes hold grows and sustains itself It places the cult of personality where it belongs at the very heart of tyranny

*Backwardness and Modernization: Poland and Eastern Europe in the 16th-20th Centuries* Jacek Kochanowicz, 2018-01-31 The subject of this book is the economic backwardness of Poland and Eastern Europe in the modern era The studies in the first part analyse various aspects of the region s economic and social history in the period from the 16th to the 20th centuries such as the nature of peasant economics the character of economic evolution and the ambiguity of social and economic relations between Poland and the West The second part deals with the change following the fall of state socialism Papers in this part argue that for understanding the present it is necessary to take into consideration historical legacies It is also important to look at the process of this recent change comparatively both within Eastern Europe and comparing this region with other parts of the world Professor Kochanowicz s contention in these essays is that the so called transformation has had to cope not only with the effects of state socialism but also with a much longer legacy of backwardness

The Future of Peace and Justice in the Global Village Thomas R. McFaul, 2006-09-30 Many authors have written on the effect technology economics and politics have on globalization but few have addressed the potential impact of world religions on the future direction of globalization McFaul s fascinating book explores what others

have not the part the world's major religions Hinduism Buddhism Jainism Zoroastrianism Judaism Christianity and Islam will play in bringing either greater peace and justice or hatred and hostility to the global village Will these religions which exert the greatest amount of influence worldwide be a force for good or ill in the emerging global village of the 21st century This book answers that question and more Covering the religions to which the majority of world's population adheres it offers insight into the commonalities differences and potential for coming together to create peace to be found among the major faiths The world's seven major religions are covered and topics such as sexuality ethics violence and the tension between secular and sacred arenas are discussed for each McFaul argues that if the leaders and laity of these religions are able to find common ground efforts toward peace and justice in the global village can be more effective and lasting If they accentuate their differences he suggests they will only produce more hatred and hostility
