Modernities A Geohistorical Interpretation:

Modernities Peter James Taylor, 1999 A thoroughly readable far reaching analysis of modernity and the modern this book focuses on the specific periods and places where ideas and practices of being modern are created and challenged Peter J Taylor contends that modernity is a multiple phenomenon that is different modern times and different modern spaces exist in a world of multiple modernities He argues that three prime modernities have been defined by the development of the modern world from mercantile modernity to British led industrial modernity to today s American led consumer modernity and illustrates the cultural expression of these modernities as acts of the ordinary such as paintings the home and the suburbs

Modernities Peter J. Taylor, 2013-05-02 Taylor develops a geohistorical argument which focuses on the periods and places of modernities offering a grounded analysis of what it is to be modern He identifies three prime modernities which have defined the development of our modern world today s consumer modernity preceded by the industrial modernity of the nineteenth century which was itself preceded by mercantile modernity *WORLD SYSTEM HISTORY-Volume I* George Modelski and Robert A. Denemark, 2009-09-19 World System History is a component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on World System History presents the study of the history of the world system World system history offers an array of tools with which to apprehend the future This volume discuss the essential aspects such as World Systems Analysis Big History Epistemology of World System History Long Term Processes and Cycles One World System or Many The Continuity Thesis in World System History World Population History States Systems and Universal Empires The Silk Road Afro Eurasian Connectivity Across the Ages Dark Ages in World System History The Kondratieff Waves as Global Social Processes Globalization in Historical Perspective Emergence of a Global Polity World Urbanization The Role of Settlement Systems in Human Social Evolution Democratization The World Wide Spread Of Democracy in The Modern Age The Rise of Global Public Opinion East Asia In the World System Incorporating North America into the Eurasian World System This volume is aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers NGOs and GOs In Defence of Modernity Efraim Podoksik, 2013-05-14 Although Oakeshott s philosophy has received considerable attention the vision which underlies it has been almost completely ignored This vision which is rooted in the intellectual debates of his epoch cements his ideas into a coherent whole and provides a compelling defence of modernity The main feature of Oakeshott s vision of modernity is seen here as radical plurality resulting from fragmentation of experience and society On the level of experience modernity denies the existence of the hierarchical medieval scheme and argues that there exist independent ways of understanding our world such as science and history which cannot be reduced to each other On the level of society modernity finds expression in liberal doctrine according to which society is an aggregate of individuals each

pursuing his or her own choices For Oakeshott to be modern means not only to recognise this condition of radical plurality but also to learn to appreciate and enjoy it Oakeshott did not think that it was possible to find a comprehensive philosophical justification for modernity therefore the only way to preserve modern civilisation seemed to be an appeal to sentiment As a consequence he was a passionate defender of liberal education as the best way to underwrite the conversation of mankind

Postcolonial Grief Jinah Kim,2019-01-17 In Postcolonial Grief Jinah Kim explores the relationship of mourning to

transpacific subjectivities aesthetics and decolonial politics since World War II Kim argues that Asian diasporic subjectivity exists in relation to afterlives because the deaths of those killed by U S imperialism and militarism in the Pacific remain unresolved and unaddressed Kim shows how primarily U S based Korean and Japanese diasporic writers artists and filmmakers negotiate the necropolitics of Asia and how their creative refusal to heal from imperial violence may generate transformative antiracist and decolonial politics She contests prevalent interpretations of melancholia by engaging with Frantz Fanon s and Hisaye Yamamoto s decolonial writings uncovering the noir genre s relationship to the U S war in Korea discussing the emergence of silenced colonial histories during the 1992 Los Angeles riots and analyzing the 1996 hostage takeover of the Japanese ambassador s home in Peru Kim highlights how the aesthetic and creative work of the Japanese and Korean diasporas offers new insights into twenty first century concerns surrounding the state s erasure of military violence and colonialism and the difficult work of remembering histories of war across the transpacific

Feminism and War Robin Riley,Chandra Talpade Mohanty,Minnie Bruce Pratt,2013-04-04 Women across the globe are being dramatically affected by war as currently waged by the USA But there has been little public space for dialogue about the complex relationship between feminism women and war The editors of *Feminism and War* have brought together a diverse set of leading theorists and activists who examine the questions raised by ongoing American military initiatives such as What are the implications of an imperial nation state laying claim to women s liberation What is the relation between this claim and resulting American foreign policy and military action Did American intervention and invasion in fact result in liberation for women in Afghanistan and Iraq What multiple concepts are embedded in the phrase women s liberation How are these connected to the specifics of religion culture history economics and nation within current conflicts What is the relation between the lives of Afghan and Iraqi women before and after invasion and that of women living in the US How do women who define themselves as feminists resist or acquiesce to this nation state claim in current theory and organizing *Feminism and War* reveals and critically analyzes the complicated ways in which America uses gender race class nationalism imperialism to justify legitimate and continue war Each chapter builds on the next to develop an anti racist feminist politics that places imperialist power and forms of resistance to it central to its comprehensive analysis

Hollywood Aida Hozic,2018-10-18 Hollywood is currently one of the largest and most profitable sectors of the U S economy In just a few decades it has transformed itself from a dying company town into a merchandising emporium of movies games and licensed characters It is quickly moving even further into cyberspace virtual reality and digital imaging Aida Hozic writes of these enormous changes in the film industry from a novel perspective by tracing shifts in spatial organization of film production from the enclosed worlds of old Hollywood studios through globally dispersed location shooting to digital production and distribution Hozic s fascinating tale of latter day capitalism suggests that the physical reorganization of production across the American economy but in Hollywood in particular alters material and conceptual boundaries between work and leisure public and private reality and fantasy

Particular economic regimes and forms of spatial organization have specific moral implications and so the story of Hollywood's cultural production is partly a story of censorship and moral surveillance. Hozic's account of industrial change in Hollywood and of its attempts at moral control over the production of fantasy is an illuminating confrontation with the peculiar nature of Hollywood's political authority and of its complex power.

Expertise in Regulation and Law Gary Edmond, 2017-07-05 This collection of essays examines the multi-faceted roles of experts and expertise in and around contemporary legal and regulatory cultures. The essays illustrate the complexity intrinsic to the production and use of expert knowledge particularly during transition from specialist communities to other domains such as policy formulation, regulatory standard setting and litigation. Several themes pervade the collection. These include the need to recognize that expert knowledge and opinion is often complex, controversial and contested; there are no simple criteria for resolving disagreements between experts; appeals to objectivity and impartiality tend to be rhetorical rather than analytical; contests in expertise are frequently episodes in larger campaigns; there are many different models of expertise and knowledge processes designed to deal with expert knowledge; are unavoidably political questions around who is an expert and what should count as expertise; are not always self-evident and the evidence rarely speaks for itself.

Hegel's Antiquity Will D. Desmond, 2020-07-30 Hegel's *Antiquity* aims to summarize, contextualize and criticize Hegel's understanding and treatment of major aspects of the classical world, approaching each of the major areas of his historical thinking in turn: politics, art, religion, philosophy and history itself. The discussion excerpts relevant details from a range of Hegel's works with an eye both to the ancient sources with which he worked and the contemporary theories: German aesthetic theory, Romanticism, Kantianism, Idealism, including Hegel's own and emerging historicism which coloured his readings. What emerges is that Hegel's interest in both Greek and Roman antiquity was profound and is essential for his philosophy, arguably providing the most important components of his vision of world history. Hegel is generally understood as a thinker of modernity in various senses but his modernity can only be understood in essential relation to its predecessors and others, notably the Greek world and Roman world whose essential spirit he assimilates to his own notion of Geist.

Cultural Dynamics and Leadership Nathan W. Harter, 2022-05-19 The intersection of leadership and culture is undertheorized. This Element looks behind familiar titles in leadership at materials from anthropology, sociology and history to gain a more nuanced understanding of culture. Of particular relevance is an interpretive approach elaborated in the works of Simmel, Cassirer, Ortega y Gasset and Gadamer. A five-part schema examines permutations pertaining to the relationship between culture and leadership as separate, conflicting, derivative or engaged, with the most attractive being the possibility that leadership and culture are mutually constituting. To explain cultural change, Ortega y Gasset suggested as a unit of analysis the idea of a generation, illustrated in a historical account of translating the Bible. Archer proposed as a mechanism for cultural change the idea of social morphogenesis, which this Element applies to evolving issues of race in the civic order. This process is illustrated in the thinking of pundit William F. Buckley Jr.
