Modernity And Beyond:

Music, Modernity and Locality in Prewar Japan: Osaka and Beyond Alison Tokita, Hugh de Ferranti, 2016-12-05 This anthology addresses the modern musical culture of interwar Osaka and its surrounding Hanshin region. Modernity as experienced in this locale with its particular historical geographic and demographic character and its established traditions of music and performance gave rise to configurations of the new, the traditional and the hybrid that were distinct from their Tokyo counterparts. The Taisho and early Showa periods from 1912 to the early 1940s saw profound changes in Japanese musical life. Consumption of both traditional Japanese and Western music was transformed as public concert performances, music journalism and music marketing permeated daily life. The new bourgeoisie saw Western music, particularly the piano and its repertoire, as the symbol of a desirable and increasingly affordable modernity. Orchestras and opera troupes were established, which in turn created a need for professional conductors and both jazz and a range of hybrid popular music styles became viable bases for musical livelihood. Recording technology proliferated by the early 1930s; record players and SP discs were no longer luxury commodities; radio broadcasts reached all levels of society and talkies with music soundtracks were avidly consumed. With the perceived need for music that suited modern life, the seeds for the pre-eminent position of Euro-American music in post-Second World War Japan were sown. At the same time, many indigenous musical genres continued to thrive but were hardly immune to the effects of modernization. In exploring new musical media and techniques drawn from Western music, performer-composers initiated profound changes in composition and performance practice within traditional genres. This volume is the first to draw together research on the interwar musical culture of the Osaka region and addresses comprehensively both Western and non-Western musical practices and genres, questioning the common perception of their being wholly separate domains.

Modernism beyond the Human, 2023-10-09 One of the defining features of modernism lies in its far-reaching rethinking of the relation between the human and the non-human. In the present volume, this crucial aspect of modernism's legacy is investigated from an authentically transnational perspective, taking an innovative stance on a diverse range of authors from posthumanist classics such as Beckett and Woolf to Valentine de Saint Point, Radoje Domanovic and Aldo Palazzeschi, among others. On the one hand, this collection sheds new light on the modernist contribution to posthumanism, providing a valuable reference point for future studies on the topic. On the other, it offers a new take on the transnational dimension of modernism, highlighting unexplored convergences between modernist authors from several different national contexts.

Between the Middle Ages and Modernity Charles H. Parker, Jerry H. Bentley, 2007 This groundbreaking book examines the complex relationships between individuals and communities in the profound transitions of the early modern period. Taking a global and comparative approach to historical issues, the distinguished contributors show that individual and communal

Magazines and Modern Identities Tim Satterthwaite, Andrew Thacker, 2023-09-21 In the late nineteenth and early twentieth century, ideals of technological progress and mass consumerism shaped the print cultures of

countries across the globe Magazines in Europe the USA Latin America and Asia inflected a shared internationalism and technological optimism But there were equally powerful countervailing influences of patriotic or insurgent nationalism and of traditionalism that promoted cultural differentiation In their editorials images and advertisements magazines embodied the tensions between these domestic imperatives and the forces of global modernity Magazines and Modern Identities explores how these tensions played out in the magazine cultures of ten different countries describing how publications drew on resisted and informed the ideals and visual forms of global modernism Chapters take in the magazines of Australia Europe and North America as well as China The Soviet Turkic states and Mexico With contributions from leading international scholars the book considers the pioneering developments in European and North American periodicals in the modernist period whilst expanding the field of enquiry to take in the vibrant magazine cultures of east Asia and Latin America The construction of these magazines modern ideals was a complex dialectical process in dialogue with international modernism but equally responsive to their local cultures and the beliefs and expectations of their readers Magazines and Modern Identities captures the diversity of these ideals in periodicals that both embraced and criticised the globalised culture of the technological era

Modernity and Beyond, 1996 **Beyond the Supersquare** Antonio Sergio Bessa, 2014-07-01

Beyond the Supersquare Art and Architecture in Latin America after Modernism which developed from a symposium presented by the Bronx Museum of the Arts in 2011 showcases original essays by distinguished Latin American architects historians and curators whose research examines architecture and urban design practices in the region during a significant period of the twentieth century Drawing from the exuberant architectural projects of the 1940s to the 1960s as well as from critically engaged artistic practices of the present day the essays in this collection reveal how the heroic visions and utopian ideals popular in architectural discourse during the modernist era bore complicated legacies for Latin America the consequences of which are evident in the vastly uneven economic conditions and socially disparate societies found throughout the region today The innovative contributions in this volume address how the modernist movement came into being in Latin America and compellingly explore how it continues to resonate in today's cultural discourse Beyond the Supersquare takes themes traditionally examined within the strict field of urbanism and architecture and explores them against a broader range of disciplines including the global economy political science gender visual arts philosophy and urban planning Containing a breadth of scholarship this book offers a compelling and distinctive view of contemporary life in Latin America Among the topics explored are the circulation of national cultural identities through architectural media the intersection of contemporary art and urban social politics and the recovery of canonically overlooked figures in art and architectural histories such as Lina Bo Bardi and Joao Filgueiras Lima Lele from Brazil Juan Legarreta of Mexico and Henry Klumb in Puerto Rico

Managing Modernity Stewart R. Clegg, Martin Harris, Harro Höpfl, 2011-01-27 Bureaucracy has long been a cornerstone of advanced industrial societies and a defining feature of modernity At the same time many

commentators from all quarters argue that it is on the wane in this post this or that world or that if it isn't it should be dismantled to free up organizations enterprise and innovation But do we live in a more or less bureaucratic world Do contemporary forms and means of communication undermine or modify bureaucracy or does technology create new iron cages and forms of control If bureaucratic models of organization are abandoned do we run risks of organizational failure and inequity Are there certain moral professional and social values associated with bureaucratic models This book explores these issues in different organizational contexts public administration the National Health Service the modern firm and corporation and offers new insights into enduring questions It will be an invaluable resource for academics researchers and students in organization studies management public administration and sociology The volume will also appeal to managers planners and policy makers who deal with these challenges

Modernity, Religion, and the War on Terror Richard Dien Winfield, 2016-04-15 The war on terror cannot be truly understood without investigating the legitimacy of modernity the challenge that religion presents to modernization the inescapable conflicts attending the emergence and expansion of modernity and the post colonial predicament from which Islamist reaction arises Richard Dien Winfield illuminates the war on terror in light of these issues presenting an anti foundationalist justification of the rationality and freedom of modernity while assessing how religion can stand in opposition to modernity and why Islam has been a privileged vehicle of anti modern religious revolt Winfield shows that the privatization that religion must undergo to be compatible with modern freedom involves no capitulation to relativism but rather is a theological imperative on which the truth of religion depends Exposing the limits of any purely secular modernization of Islam Winfield shows how Islam can draw upon its core tradition to repudiate the oppression of Islamist reaction and become at home in the modern world

The Post-Apocalyptic Novel in the Twenty-First Century H. Hicks, 2016-04-08 Since the beginning of the twenty first century major Anglophone authors have flocked to a literary form once considered lowbrow genre fiction the post apocalyptic novel Calling on her broad knowledge of the history of apocalyptic literature Hicks examines the most influential post apocalyptic novels written since the beginning of the new millennium including works by Margaret Atwood David Mitchell Cormac McCarthy Jeanette Winterson Colson Whitehead and Paolo Bacigalupi Situating her careful readings in relationship to the scholarship of a wide range of historians theorists and literary critics she argues that these texts use the post apocalyptic form to reevaluate modernity in the context of the new century's political economic and ecological challenges In the immediate wake of disaster the characters in these novels desperately scavenge the scraps of the modern world But what happens to modernity beyond these first moments of salvage In a period when postmodernism no longer defines cultural production Hicks convincingly demonstrates that these writers employ conventions of post apocalyptic genre fiction to reengage with key features of modernity from historical thinking and the institution of nationhood to rationality and the practices of literacy itself

Educational Secularization within Europe and Beyond Mette Buchardt, 2024-11-04 Did religion disappear with

modernization and the secularization reforms that changed the relation between religion and state throughout the European empires and nation states from late nineteenth century onwards Or was religion rather transformed becoming a part of the new social and national imaginaries on the road from European empires to African Middle Eastern European Union and Post Soviet nation states What are the historical roots behind the divisions of state church and education that characterized the late nineteenth and during the twentieth century What has been the role of education in this context both with regard to political reforms targeting the education systems and with regard to broader public enlightenment efforts and modernization of the state Connecting scholars across the fields of history and historical sociology of education church history and historical religion research and political history and covering the time span from the early modern period and up until the present this volume explores how education reform has functioned as an arena for the political project of secularization and in which way this contributed to transforming and revitalizing religion

Modernism Beyond the Avant-Garde Jason M. Baskin, 2019 Uses the idea of embodiment to reconceptualize postwar literary history and recognize the political significance of literary modernism after 1945

Modernism and the Middle Passage Laura Winkiel, 2025-10-14 Modernism is typically thought of as focusing on the new and now not looking backward at historical catastrophes Yet in many surprising often submerged ways the transatlantic slave trade shaped the works of both Black and white writers This book reveals how modernists turned to the Middle Passage and in so doing upended Western ideas about time and space race and gender and the category of the human Bringing together Afro diasporic and Black studies scholarship modernist aesthetics and environmental studies Laura Winkiel presents a new literary history of modernism from the perspective of the Atlantic and its role in slavery and colonization She examines the works of African Caribbean British and US writers including Joseph Conrad William Faulkner Langston Hughes Zora Neale Hurston Claude McKay Jean Rhys Amos Tutuola and Virginia Woolf as well as later interlocutors such as Marlon James and Jamaica Kincaid Paying particular attention to settings on shorelines deltas archipelagos and the ocean Winkiel argues that allusions to the slave trade make visible the exploitative structural relations between the metropolis and the colonies and between the liberal subject and its others By turning to the ocean and its violent histories this groundbreaking book rethinks the fraught relationship of modernism and race

Modernity as Experience and Interpretation Peter Wagner, 2013-04-18 We are all modern today But modernity today is not what it used to be Over the past few decades modernity has been radically changed by globalization individualization new inequalities and fundamentalism A novel way of analysing contemporary societies is needed This book proposes such an analysis Every society seeks answers to certain basic questions how to order life in common how to satisfy human needs how to establish knowledge Sociology long assumed that the answers had been found once and for all a liberal democratic state a market economy and free scientific institutions This trinity used to be called modern society By contrast this book is based on the idea that under conditions of modernity there are no stable and certain answers to these questions There is a plurality of possible answers every proposed

answer can be criticized and contested and every society needs to find its answer on its own This new sociology of modernity proposes two key instruments through which to understand the answers given to those questions the experiences human beings have of their own modernity and the interpretations they give to those experiences It reviews the history of Western modernity in this light and then focuses on the specific answers that were and are being developed in Europe Critical Theory and Political Modernity José Maurício Domingues, 2019-01-22 This book draws together philosophy jurisprudence political science and international relations to study the main categories of political modernity and its development trends Grounded in critical theory from Marx to later currents such as the Frankfurt School Critical Theory and Political Modernity circulates around state power and oligarchy as well as emancipatory possibilities from their foundations to the present such as radical democracy Domingues analyzes the main categories of political modernity including the juridical dimension to conceptually articulate its long term processes of development In so doing he examines rights law and citizenship state and domination abstract and concrete the political system state power freedom and autonomy scalar configurations political regimes oligarchy and democracy English Studies Beyond the 'Center' Myles Chilton, 2015-11-06 This book addresses the shape of English studies beyond the center by analyzing how the discipline has developed and by considering how lessons from this analysis relate to the discipline as a whole The book aims to open a cross disciplinary conversation about the nature of the English major in both non Anglophone and Anglophone countries by addressing the tensions between language and literature pedagogy the relevance of a focus on hyper canonical Anglophone literature in a world of global Englishes world literature and multilingual students and by reflecting on the necessary contingency and cross purposes of blended literature and language classrooms Many of the book's points of discussion arise from the author's experience as an English professor in Japan where the particularities of English language and literature pedagogy raise significant challenges to Anglo centric critical and pedagogical assumptions English Studies Beyond the Center Teaching Literature and the Future of Global English therefore argues that English literature must make a case for itself by understanding its place in a newly configured discipline Issues discussed in the book include English language and literature pedagogy in Japan The modes through which EFL and English literary studies converge and diverge Globalized English beyond the Anglo American perspective English classroom practices particularly in Japan Beyond Neoliberalism Marian Burchardt, Gal Kirn, 2017-02-20 This book explores how changes that occurred around 1989 shaped the study of the social sciences and scrutinizes the impact of the paradigm of neoliberalism in different disciplinary fields The contributors examine the ways in which capitalism has transmuted into a seemingly unquestionable triumphant framework that globally articulates economics with epistemology and social ontology The volume also investigates how new narratives of capitalism are being developed by social scientists in order to better understand capitalism's ramifications in various domains of knowledge At its heart Beyond Neoliberalism seeks to unpack and disaggregate neoliberalism and to take readers beyond the analytical limitations that a traditional

framework of neoliberalism entails This book is a result of discussions at and support from the Irmgard Coninx Foundation

Imaginations of Death and the Beyond in India and Europe Günter Blumberger, Sudhir Kakar, 2018-03-27 This volume explores current images of afterlife afterdeath and the presence of the dead in the imaginations of the living in Indian and European traditions Specifically it focuses on the deepest and most fundamental uncertainty of human existence the awareness of human mortality on which depends any assignment of meaning to earthly existence as also to notions of worldly and otherworldly salvation This central idea is addressed in the literature arts audiovisual media and other cultural artefacts of the two traditions The chapters are based on two main assumptions First that one cannot report on the direct experience of death so it is only possible to speak allegorically of it Second in contemporary Western societies marked by structural atheism people look at literature the arts and mass media to study their depiction and reading of traditionally religious questions of disease death and the Beyond This is in contrast to Asian civilizations whose preoccupation with death and Beyond is persistent and perhaps central to the civilizations highest thought The chapters cover a wide spectrum of disciplinary approaches from psychoanalysis to religious anthropological literary and film studies from sociology and philosophy to art history and address issues of unsettling power comforting illusions of afterlife the relations between afterlife and fertility visions of technological immortalization of mankind the problem of thinking about death after the death of God socialist utopias of bodily immortality fear of Hell and punishment different concepts in relating the living and the dead near death experiences and cultural practices of spiritualism occultism and suicide

Transcultural Memory and Globalised Modernity in Contemporary Indo-English Novels Nadia Butt, 2015-09-14 This book places transcultural memory in the South Asian cultural and literary context Divided into two parts the book first defines transcultural memory in the age of globalised modernity both as a theory and social practice Then it examines contemporary Indo English novels from India and Pakistan with the theoretical and methodological tool of transcultural memory to shed new light on the connection between memory and modernity and memory and South Asian cultures in the wake of new social and political transformations on the Indian subcontinent A special focus on commemorative tropes in the novels not only show the possibility of a dialogue with different versions of the past but also how such a dialogue shapes processes of remembrance between and beyond borders Hence the books comes up with alternative ways of reading the Indo English novels divesting the concept of trans cultural memory from its Euro centrism and claiming it as equally significant in comprehending the new configurations of memory and modernity in non Western locations
