lines the two volumes are intended to make these cultures available for the global market of ideas and also help rethinking some of the basic assumptions about the history of modern political thought and modernity as such The first volume deals with the period ranging from the Late Enlightenment to the First World War It is structured along four broader chronological and thematic units Enlightenment reformism Romanticism and the national revivals late nineteenth century institutionalization of the national and state building projects and the new ideologies of the fin de siècle facing the rise of mass politics Along these lines the authors trace the continuities and ruptures of political discourses They focus especially on the ways East Central European political thinkers sought to bridge the gap between the idealized Western type of modernity and their own societies challenged by overlapping national projects social and cultural fragmentation and the lack of institutional continuity

**The Coming African Hour** Luc Sindjoun, 2010 The Coming African hour is not a slogan nor wishful thinking It is a conclusion that derives from an insightful analysis of the current situation pertaining on the continent Several African scholars coming from different regions and

academic backgrounds are elaborating ideas and arguments in order to explain the constraints and to illustrate the opportunities. The result of that scientific gathering is a book that synthesizes and renews the reflections on development. What is at stake is not to be pessimistic or optimistic about Africa. The epistemological challenge is to understand what is going on. By focusing on converging and diverging African realities on the issues of state, civil society, gender and development strategies, the authors of the book show under which conditions the African hour is coming. At that level, the commitment for political science meets the commitment for Africa. The main success of this book is to overcome the preconceived ideas and self-fulfilling prophecies about Africa. Here, the analysis avoids the trap of indulgence; then hope is based on truth. Consequently, the coming African hour is not inescapable; it is as analyzed a possibility that its achievement depends on institutional, human, political, social and economic factors.

*Political Change* David E. Apter, 2012-11-12

Published in the year 1973, *Political Change* is a valuable contribution to the field of Politics. The problem in the social sciences has been to improve the quality of the relationship between the creative and didactic sides and produce more interesting and verifiable hypotheses and propositions. The literature dealing with this problem has grown and become increasingly technical. This collection of essays are between creativity and didactics. Some are experiments in the mind as it were, plundering history for purpose. Others seek criteria for a politics of development. Still others are more analytical, seeking criteria for theory as in the articles on political studies and on political systems. In all, however, there is a common thread: the creation and use of intermediate categories and their applications to real life, historical or contemporary development situations.

**The Anglo-American Tradition of Liberty** João Carlos Espada, 2016-06-03

Giving a broad overview of the tradition through summaries of the careers and ideas of fourteen of its key thinkers, neglected despite having been tremendously influential in the tradition of liberty, the author engages with current set ideas about the meaning of liberal and conservative to offer an engaging intellectual case for liberal democracy.
