Modernizing Chinas Military Progress Problems And Prospects:

Modernizing China's Military David Shambaugh,2002 Annotation The most thorough overview of the Chinese defense programs and Sino American military relations by a leading authority *Modernizing China's Military* ,2019 **Research Handbook on the Arms Trade** Andrew T.H. Tan,2020-12-25 This comprehensive Research Handbook examines the key drivers of the arms trade mapping the main trends in Asia Europe the Middle East Africa and Latin America It also explores the principal defence markets internationally including the US China India Russia and the UK in greater detail Military Modernization in an Era of Uncertainty National Bureau of Asian Research (U.S.),2005 Focuses on the defense capabilities of key Asian powers in the context of their grand strategies Through a combination of country regional and topical studies the book assesses how Asian states are modernizing their military programs in response to China s rise as a regional power the war on terrorism changes in U S force posture the revolution in military affairs and local security dilemmas In addition to this central theme each chapter examines the changing balance of power in Asia and identifies likely threats and opportunities that may arise in the next five years **The U.S.-China Military Scorecard** Eric Heginbotham,Michael Nixon,Forrest E. Morgan,Jacob L. Heim,Jeff Hagen,Sheng Li,Jeffrey Engstrom,Martin C. Libicki,Paul DeLuca,David A. Shlapak,David R. Frelinger,Burgess Laird,Kyle Brady,Lyle J. Morris,2015-09-14 A RAND study analyzed Chinese and U S military capabilities in two scenarios Taiwan and the Spratly Islands from 1996 to 2017 finding that trends in most but not all areas run strongly against the United States While U S aggregate power remains greater than China s distance and geography affect outcomes China is capable of challenging U S military dominance on its immediate periphery and its reach is likely to grow in the years ahead **Russia and China** Michal Lubina,2017-10-23 This book depicts the sophisticated relationship between Russia and China as a pragmatic one a political marriage of convenience Yet at the same time the relationship is stable and will remain so After all bilateral relations are usually based on pragmatic interests and the pursuit of these interests is the very essence of foreign policy And as often happens in life the most long lasting marriages are those based on convenience The highly complex complicated ambiguous and yet indeed successful relationship between Russia and China throughout the past 25 years is difficult to grasp theoretically Russian and Chinese elites are hard core realists in their foreign policies and the neorealist school in international relations seems to be the most adequate one to research Sino Russian relations Realistically throughout this period China achieved a multidimensional advantage over Russia Yet simultaneously Russia China relations do not follow the patterns of power politics Beijing knows its limits and does not go into extremes Rather China successfully seeks to build a longterm stable relationship based on Chinese terms where both sides gain albeit China gains a little more Russia in this agenda does not necessary lose just gains a little less out of this asymmetric deal Thus a new model of bilateral relations emerges which may be called by paraphrasing the slogan of Chinese diplomacy as asymmetric win win formula This model is a kind of back to the past a contemporary equivalent of the first model of Russia China relations the modus vivendi

Interpreting China's Military Power Ka Po Ng, 2005-08-09

Although inter state tensions have generally been easing after the Cold War military power remains a dominant factor in Asian regional politics As China operating the world s largest army grows stronger there are ongoing debates over the implications for Asia s regional security This book argues that it is imperative to look beyond the empirical observations and conventional materialist reading of Chinese military development to understand its dynamics and directions in doctrinal terms and put it in a readiness context for evaluation Military doctrine has long been under studied and is often treated as a subject separate from force development But as this study contends this factor is necessary for interpreting the making and purposes of China s military power because it forms the intellectual foundation of military structural and hardware development When loaded with political rhetoric it also communicates to us the intended uses of the military power The role of doctrine is reinforced in the context of military readiness which defines what for and how the army is getting ready Force development is evaluated in structural operational and directional terms The importance of this analytical framework based on military doctrine and readiness is demonstrated in a survey of the evolution of Chinese military doctrine and force development As the Chinese People s Liberation Army has continued to adjust its military structure and operation to follow the doctrinal lead its switches between the doctrines of local war and total war have seen corresponding changes to the emphasis between operational and structural readiness

China's New Foreign Policy Tilman Pradt, 2016-11-17 This book analyses how China overcame its meagre reputation in the early 1990s to become an aggressively growing military power and rising threat to the international system The author focuses on China s new multilateral foreign policy approach ambitious military build up programme and economic cooperation initiatives This book presents a much needed comparative perspective of China in terms of foreign policy seeking to develop analytical tools to assess China s motivations and moves The author suggests that understanding China s new foreign policy its tactics in multilateral organisations and approaches to conflict resolutions are elementary to grasp the new realities of international relations particularly relevant to newly established institutions in the evolving Asian political system which require basic knowledge for analysing the politics in this continent This book uses an innovative approach a qualitative analysis of China s foreign policy addressing criteria of reputation management to overcome the perceived China threat

Remade in China Scott Wilson, 2009-09-11 Since opening to foreign investment in 1979 China has emerged as the leading investment site for multinational corporations Remade in China looks beyond the macroeconomic effects of China s investment boom to analyze how foreign investors from the US Japan and other nations are shaping China s legal labor and business reforms Wilson draws on interviews with nearly 100 foreign and local managers attorneys workers and members of the business community to explain why Chinese laborers and firms have gravitated toward foreign models especially US businesses and their institutions Wilson uses the term state guided globalization to describe how China has used foreign engagement to advance its domestic reform objectives and to

enhance its role in international society Rather than undermining state power globalization actually has allowed China's state to push through difficult labor and legal reforms Wilson concludes that Chinese policy makers drew lessons from foreign investors and foreign legal experts on how to introduce difficult labor market reforms in its state owned enterprises and how to promote rule of law Remade in China examines globalization and foreign investment in a different light showing how these developments have helped to chart China's entry into international society China's WTO accession agreement and international norms have established parameters by which to judge Chinese legal and business reforms Although China's rise is a grave concern to the world Remade in China asserts that Chinese leaders now see compliance with international rules as a means to secure more investment and to enhance their international legitimacy Wilson provides a lucid and insightful analysis of how foreign and domestic actors from political leaders to average laborers have contributed to remaking China's institutions

China's Aerospace Strategy, 2013-02-15 China has emerged as a major regional power and has clear aspirations to be a global power in the not too distant future Comprehensive military modernisation programs sustained economic scientific and technological developments have substantially elevated China's international profile For the past three decades China has been modernising its strategic weaponry and enhancing the capabilities of its nuclear warheads It has also been developing new and complex military platforms that would be of great value to joint operations warfare The decade from 2011 through 2020 will prove critical to the PLA as it attempts to integrate many new and complex platforms and to adopt modern operational concepts including network centric warfare China's air force is in the midst of a transformation A decade ago it was an antiquated service equipped almost exclusively with weapons based on 1950s era Soviet designs and operated by personnel with questionable training according to outdated employment concepts Today the PLAAF appears to be on its way to becoming a modern highly capable air force for the 21st century The PLA Air Force has continued expanding its inventory of long range advanced SAM systems and now possesses one of the largest such forces in the world The January 2011 flight test of China's next generation fighter prototype the J 20 highlights China's ambition to produce a fighter aircraft that incorporates stealth attributes advanced avionics and super cruise capable engines over the next several years China is upgrading its B 6 bomber fleet with a new longer range variant that will be armed with a new long range cruise missile China's aviation industry is developing several types of airborne early warning and control system AWACS aircraft These include the KJ 200 based on the Y 8 airframe for AWACS as well as intelligence collection and maritime surveillance and the KJ 2000 based on a modified Russian IL 76 airframe China can decisively defeat India in any nuclear confrontation but is currently unable to match the IAF in any conventional conflict specifically along the border region of the Himalayas Also the IAF has greater experience than PLAAF in actual combat operations with its many conflicts India is gradually building powerful military capabilities in tune with its expanding geopolitical interests even as the eastern and western fronts are being strengthened to deter the twin Pakistan China threat IAF is on the path to transform into a true

aerospace power with the capability to rapidly deploy and operate at great distances As for the two front challenge apart from progressively basing Sukhoi 30MKI fighters and missile squadrons in the two theatres the plan also includes upgrading the airfields and advanced landing grounds in the sectors in order to give both defensive and offensive options It is important for India to realise the relevance of Chinese achievements in space technologies and to critically view and analyse Chinese achievements in the area of manned space missions In order to achieve further success in the space arena developments in cryogenic technology are important for India These should be pursued in order to develop the capability of launching 4 5 ton satellites which will help in achieving a greater commercial edge Programmes like moon and mars missions using robotic technologies are also important in order to know more about the nature of resources especially minerals available on these bodies and undertaking their mining It is also important to work towards launching satellites for India s armed forces which will help gain an advantage over adversaries The book is an attempt to analyse the strategic importance of rising economic political and military stature of China with a view to understand its regional and global implications in a new world order As a rational actor in a chaotic world China will defend its security interests at all costs Besides undertaking a comprehensive modernisation of its armed forces China is developing a series of offensive space capabilities while advocating the peaceful use of outer space The book will be of immense value not only to the readers of the countries in the immediate neighbourhood of China but to the strategic community across the globe since rise of China and other major Asian players including India will shape the strategic international environment in the decades to come during this century It is hoped that the book will contribute to the understanding of the growing importance of integration of air and space and the fact that aerospace has truly become the new theatre of war and thereby establishing a new milestone in mankind s history of warfare The unifying space dimension will remain the single most important source for information and communication which can be used in multiple forms Hence China s aerospace strategy and its implications for India assume greater military importance

Report to Congress of the U.S.-China Economic and Security Review Commission U.S.-China Economic and Security Review Commission,2011 *The PLA at Home and Abroad* :,2010 *Mao's Invisible Hand* Sebastian Heilmann,Elizabeth J. Perry,2020-10-26 Observers have been predicting the demise of China s political system since Mao Zedong s death over thirty years ago The Chinese Communist state however seems to have become increasingly adept at responding to challenges ranging from leadership succession and popular unrest to administrative reorganization legal institutionalization and global economic integration What political techniques and procedures have Chinese policymakers employed to manage the unsettling impact of the fastest sustained economic expansion in world history As the authors of these essays demonstrate China s political system allows for more diverse and flexible input than would be predicted from its formal structures Many contemporary methods of governance have their roots in techniques of policy generation and implementation dating to the revolution and early PRC techniques that emphasize continual experimentation China s long

revolution had given rise to this guerrilla style decisionmaking as a way of dealing creatively with pervasive uncertainty Thus even in a post revolutionary PRC the invisible hand of Chairman Mao tamed tweaked and transformed plays an important role in China s adaptive governance

Chinese Civil-Military Relations Nan Li,2010-04-05 This new book addresses three key issues What has changed in Chinese civil military relations What can account for changes And what are the implications for Chinese security policy and strategic behaviour It tackles these questions by sharply assessing civil military dynamics in elite politics such dynamics in national security and arms control policy relations between commanders and political commissars relations between the PLA and society civil military dynamics regarding defence economics and logistics and such dynamics regarding dual use technologies and defence industry These analyses build into the central theme that the emphasis of Chinese civil military relations is shifting from politics to military tasks This is an extremely important new development by a nation many predict to become a super power in the twenty first century This is therefore essential reading for all students and scholars of strategic and security studies Chinese studies and international relations

Why Taiwan? Geostrategic Rationales for China's Territorial Integrity Alan M. Wachman,2008 Why has the PRC been so determined that Taiwan be part of China Why since the 1990s has Beijing been feverishly developing means to prevail in combat with the U S over Taiwan s status Why is Taiwan worth fighting for To answer this book focuses on the territorial dimension of the Taiwan issue and highlights arguments made by PRC analysts about the geostrategic significance of Taiwan rather than emphasizing the political dispute between Beijing and Taipei It considers Beijing s quest for Taiwan since 1949 against the backdrop of recurring Chinese anxieties about the island s status since the seventeenth century

A War Like No Other Richard C. Bush, Michael E. O'Hanlon, 2007-04-01

Nobody approaches the objectivity and precision of Bush and O Hanlon when it comes to analysis of the military and political dimensions of the Taiwan issue This is one challenge that U S policymakers and military strategists cannot afford to get wrong and scholars cannot afford to ignore Michael Green former Senior Director for Asian Affairs National Security Council The Showdown to Come In 1995 during a heated discussion about that year s Taiwan crisis a Chinese general remarked to a U S diplomat In the end you care more about Los Angeles than you do about Taipei In a single sentence he both questioned the level of America s commitment to a longtime ally and threatened massive perhaps nuclear retaliation should the United States intervene militarily on Taiwan s behalf In the end President Clinton sent two aircraft carriers to the region and China ceased its military exercises in the Taiwan Strait A decade later however China is much stronger both economically and militarily and it holds a significant amount of America s national debt If another Taiwan crisis should occur as it almost certainly will would China back down In A War Like No Other you ll discover how little it would take to transform the close cooperation and friendly rivalry between the United States and the People s Republic of China into the first ever shooting war between two nuclear powers This chilling look into one possible future offers thoughtful advice to both governments on how to reduce the chances of such a nightmare actually occurring Two Brookings Institution scholars offer specific prescriptions on how the two nations can improve communications especially in times of crisis avoid risky behavior even when provoked and above all remember which buttons not to push
