Some of these include the extraordinary and complex effort to build the Temple of Jupiter the creative actions and diverse encounters tied to luxury objects like the Ficoroni Cista and the important meanings held by sacred temple sculpture and votive offerings through their making and subsequent practices of devotion A key purpose of this book is to question an idea of Rome that has focused on elite production and the textual record Hopkins instead calls attention to the lesser known often silenced actors who were integral players The result is a deep understanding of a diverse and historically rich Italic and Mediterranean world as well as the myriad cultures communities and individuals who would have made and experienced art within and around the changing political boundaries of Rome
