The St. James's Magazine ,1863 **The God Factory** Mike Hockney,2011-10-23 Illumination the religion of the Ancient Order of the Illuminati began with Pythagoras and is the world s only Logos religion i e a rational religion founded on mathematics science and philosophy It has no connection with Mythos religions such as Judaism Christianity and Islam Illumination is the Grand Unified Theory of Everything linking science religion psychology philosophy and even the paranormal It does so via the only medium of truth and absolute knowledge mathematics which Pythagoras enigmatically declared to be the arche the fundamental substance of existence Whereas science is based on mathematical materialism Illumination uses Leibnizian mathematical idealism This is one of a series of books providing the ultimate answers to the nature of existence *Mythology for the Microcosm* A. Brian Lasater,2005-12 About my book Although there is nothing new under the sun it is always useful to reevaluate old ideas and principles and express them in new and original ways There are many books on the Kabala but based on what I have seen and read there is room for a comprehensive approach Many authors leave out fundamental princi ples altogether like the authors who don t even mention the celestial bodies and the Zodiac On the other hand scholars of mythology generally do not even refer to astrology and the Kabala and apparently do not recognise that the celestial bodies were the principle gods of the ancient pantheon My approach has been to briefly discuss some of the fundamental elements of the old theologies and relate them to astrology and the Kabala from a modern perspective Thus I have laid an essential foundation for the Kabala and astrology and placed them the context of Greek and Roman mythology Since I have adopted a broad perspective the reader has a basis for pursuing these subjects in a variety of ways I have not seen any other book that relates astrology and the Kabala to Greek and Roman mythology the Bible and then relates these to Mesopotamian and Egyptian mythology The ancient theologies have many fundamental elements in common and these form key parts of the foundation of astrology and the Kabala In addition I have given a concise discussion of the Four Alchemical Elements the Signs of the Zodiac and the Celestial Bodies and placed them in a Kabalistic framework To truly comprehend the Kabala and Astrology it must be remembered that it is one com plete whole and it is broken down to make analysis practicable Therefore I have discussed Creation and the Ten Sephiroth the trinity in some of its forms as a sacred elements in Creation and in Man and Woman the Four Elements and the Zodiac Then from a mythological and theological perspective I have looked briefly at Mesopotamia and Egyptian As a counterweight to our cynical age I have look ed at the Golden Age of Atlantis and the mythological heroes and heroines of the primordial past serve as exemplars and encourage us to strive to attain some of Occidental Civilization s highest ideals On the other hand Atlantis is a warn ing the misuse of knowledge and power leads to the destruction of civilization Further from a theological and mythical perspective the Sephiroth were divine in struments used in Creation On a more mundane level the Kabala and astrology are a means to know ourselves and obey the injunction Know Thyself that used to be inscribed on Apollo s temple at Delphi This book is

based on the work of the ancients whose writing is superb The quotes in English from the ancients are the best part of the book and it is a pleasure to read Aristotle reads Hippocrates ,2024-08-05 Despite Aristotle s family background and his undeniable impact on ancient Greek medicine the influence of medicine on Aristotle s philosophy is controversial and far from universally acknowledged The aim of this volume is to re examine the influence of medical knowledge and literature on Aristotle s work in particular to explore the connections with the Hippocratic writings The volume encourages further exploration of this interdisciplinary area and offers new insights by presenting a series of case studies that examine in detail specific debates within the Aristotelian corpus in relation to the medical literature *The Gardeners' Chronicle and Agricultural Gazette* ,1861 **Rainforest Creatures** Benita Sen,2007-07-15 Provides profiles of animals who live in rain forests covering common and scientific names size prey and diet behaviors enemies and whether they are considered endangered Living in the Realm of Miracles and Angel Encounters Brigitte A. images of long flowing locks can express sexuality and the cutting of a woman's hair often signals her feminine misbehavior Artists of all kinds in the Middle Ages used women's long hair to manipulate their audience's estimation of their female figures This interdisciplinary work explores the significance of women's hair in literature and art from the medieval period through 1525 putting into historical context the ways in which hair participates in construction of the female identity
