This monograph explores not only how national identity is being re constructed by the Ukrainian state but also the processes by which it is negotiated through society The central argument of this work is that too much attention concerning identity in Ukraine has focused on markers of ethnicity and language Instead the author advocates a regional approach engaging with the issue of how Ukraine s regional differences affect nation building processes Following the tumultuous events of the Orange Revolution the view of Ukraine as a country inherently divided between East and West has re emerged to become a popular explanation for political events The study outlines the necessity for academics policymakers and indeed politicians to veer away from this simplistic West versus East divide The book advocates an analysis of Ukraine s unique brand of regionalism not in terms of divisions but in terms of regional differences and diversity The author deconstructs the concept of Eastern Ukraine by focusing on three Ukrainian localities all adjacent to the Ukrainian Russian border The study examines how individuals provide their own understanding of the place of their region within the wider processes of nation building across Ukraine In doing so the book develops a regional approach to the study of identity politics in Ukraine

Wolfgang,2017-07-12 Comparative Deviance represents a systematic attempt to survey public perceptions of deviant behavior cross culturally in India Indonesia Iran Italy Yugoslavia and the United States There is extensive diversity in both law and perception concerning such deviances as taking drugs homosexuality and abortion yet there is evidence for a

basically invariant structure in perception of deviance across all cultures Within the countries studied in this volume Geraeme Newman discovers that the strength of religious belief and urban rural background accounted for major differences in the perception of deviance when differences were identified Contrary to popular academic opinion in the United States Newman finds that those countries with the most liberal laws on deviance i e the least punitive sanctions are also those highly economically developed and least totalitarian United States and Italy But when public opinion is considered the public favors harsher punishments than the law provides In contrast in the developing countries of India Iran and Indonesia where penal sanctions are more severe public opinion is much more liberal The crucial question is the role criminal law plays in the process of modernization whether law is a stable cultural influence round which public opinion wavers in a startling fashion depending on the stage of modernization These findings challenge many assumptions of conflict theory in sociology of cultural relativism in anthropology and of ethical relativism in moral philosophy All findings are examined in relation to research on modernization social development and the evolution of law These fundamental issues are thus important to many different disciplines across the board

and wastewater sector varies significantly between countries and within countries and over time which has implications for how to regulate the sector      **Global Human Rights Law Collection** ,2008      **World Development Indicators 2002**

**Research and Sustainable Development** Ali Mufit Bahadir,Gheorghe Duca,2009-08-03 Sustainable Development has become the leading concept of the 21 century It describes a development which agrees with the needs of the present generation but does not endanger the chances of the coming generations to satisfy also their needs Sustainable development has become an important general goal for all fields of life like economy ecology and social balance The development and shaping of our future has been discussed internationally like on the summits of the Conferences in Rio and in Johannesburg But this is also a topic on national base in various countries Leading authorities in various fields of economy and politics have also accepted this concept Although the concept of sustainable development has been generally accepted there are still problems how to achieve and evaluate these general goals It is clear that the definitions about the prime needs vary from man to man from country to country and from continent to continent But pollution does not respect national borders Therefore it is necessary to develop the politics of economy ecology and social demands by a synergistic way that they are strengthened by each other If it is not possible to stop tendencies which threaten the future quality of life the cost demands of societies will dramatically increase and negative tendencies will become irreversible      **Index Medicus** ,2002 Vols for 1963 include as pt 2 of the Jan issue Medical subject headings      Who's who in European Research and Development ,1997
