

Avogadro's Law:

under the same temperature and pressure, same volume of gases will consist of the same number of moles of gases.

Volume ratio = Mole ratio
of gases of gases

E.g. if 3 moles of gas A occupies 12 dm³, then 3 moles of gas B at the same temperature and pressure will also occupy 12 dm³.

Limiting reagent: check when no. of moles of all reactants are given

Qn: 0.200 mol of H₂ was reacted with 0.400 mol of O₂ to produce water. Determine the limiting reagent of the reaction.

Ans: 0.200 mol of H₂ required 0.100 mol of O₂ for complete reaction. However 0.400 mol of O₂ was supplied. Therefore O₂ is in excess and H₂ is the limiting reagent.

Academic Success And Social Power Richard Teese, 2013-04-18 A most significant text that says something new about how student achievement is shaped Richard Teese cuts across much of the recent talk about reform and allows us to think about the issues afresh His findings will fascinate all Professor Simon Marginson Monash University This eye opening study of Australian secondary education looks beyond clichés about excellence to analyse the historically specific nature of the scholarly ideal against which successive generations of Australian students have been judged Drawing on a wealth of strikingly original research Richard Teese offers a penetrating analysis of Victorian secondary schooling in the half century after World War Two This was a era in which higher secondary schooling ceased to be the preserve of an elite and emerged as a system of mass education It was also a period marked by successive waves of reform in curriculum and assessment Yet at the end of it all Australians have been left with a sharply polarised system of schooling in which the most economically vulnerable populations of young people are also those most at risk of educational failure This book asks the hard questions Are our systems of secondary teaching and the expectations they place on students anachronistic in an age of mass education How far is the curriculum itself responsible for the manifest disparities in achievement between sectors and regions and between boys and girls What has been the universities role in the process of reform and counter reform And what have all these upheavals implied for the practice of teaching
