Molecular Applications in Biological Anthropology Eric J. Devor, 1992-12-17 This volume presents the findings of a selection of pioneering research studies in which new molecular techniques have been used to address key questions in biological anthropology for example about the human genetic system the geographical movements of human populations in the past and primate evolution **Human Energetics in Biological Anthropology** Stanley J. Ulijaszek, 1995-06-30 Looks at energy intake expenditure and balance in traditional subsistence populations **Bioarchaeology** Clark Spencer Larsen, 1999-05-06 Comprehensive reference to use of human bones and teeth in interpreting past lives **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1965 **The Evolution of Modern Human Diversity** Marta Mirazón Lahr, 1996-05-30 Investigates the two main theories of how and where humans evolved **Genetic Variation and Human Disease** Kenneth M. Weiss, 1993 Recent developments in molecular and computational methods have made it possible to identify the genetic basis of any biological trait and have led to spectacular advances in the study of human disease This book provides an overview of the concepts and methods needed to understand the genetic basis of biological traits including disease in humans Using examples of qualitative and quantitative phenotypes Professor Weiss shows how genetic variation may be quantified and how relationships between genotype and phenotype may be inferred This book will appeal to many biologists and biological anthropologists interested in the genetic basis of biological traits as well as to epidemiologists biomedical scientists human geneticists and molecular biologists *Primate Behaviour* Duane Quiatt, Vernon Reynolds, 1995-01-27 Stressing direct connections between human and nonhuman society this book about the social life of monkeys apes and humans emphasizes the importance of social information and knowledge in the understanding of primate behavior and organization **The Health Consequences of 'Modernisation'** Roy J. Shephard, Andris Rode, 1996-02-23 What are the health consequences of a transition from an active hunter gatherer lifestyle to that of sedentary modern living In this book the impact of modernization is assessed in various populations in the circumpolar regions The hazards of living in polar regions and the adaptations shown culturally behaviourally and physically by the indigenous peoples are examined and the effect of changes in habitual activity diet and general lifestyle due to more urban living patterns on the body composition pulmonary function and susceptibility to disease discussed The implications of this switch are important not only for all those concerned about the survival of indigenous communities around the world but for all of us living in an increasingly sedentary urban environment Anthropologists physiologists and those interested in population fitness will find this a comprehensive and valuable volume *Current Catalog* National Library of Medicine (U.S.), 1993 Human Biology Sara Stinson, Barry Bogin, Dennis H. Mascie-Taylor, 1996-08-28 It is widely believed that reproductive cycles are very similar between human females However there are in fact considerable variations both between individuals and within the reproductive life of any given individual Normal reproductive cycles cover a wide range of eventualities and the likelihood of successful monthly egg release and ensuing pregnancy can be modified by a large number of factors In this book the variability of human fertility is examined by first looking at the physiological processes regulating reproduction and the roles of metabolic adaptation and metabolic load Inter population variation in normal ovarian function is then discussed covering the importance of factors such as age disease and breastfeeding in modifying ovarian function First published in 1996 this is an important book for all those interested in human fertility Meeting Anthropology Phase to Phase Robert Bates Graber, 2000 In Meeting Anthropology the major phases through which our species has passed provide the structure for a truly coherent encounter with general anthropology biological archaeological cultural and linguistic Part I Growing Up covers the evolution of upright large brained primates Part II Spreading Out details how culture allowed these handy intelligent beings to expand from their tropical homes to fill the world Part III Crowding In focuses on the dramatic cultural reconfigurations wrought by the growth of large societies as humans populated the earth ever more densely Part IV Switching On explores how contemporary culture emerged from and continues to be transformed by the emergence of a world system and the ongoing process of industrialization Throughout the book the imperative we share with all animals to find and use energy sources is a key integrative theme Also highly integrative is the book's consistency in defining and analyzing cultural systems including our own in terms of 1 the means by which societies interface with their physical and social environments 2 the customary ways in which members of society interact with one another and 3 the ideas through which reality is interpreted symbolically **A Companion to Biological**

going as scholars educators and practitioners in the field of marriage and family life we first need to know where we have been A perusal of early texts on marriage and family life provides some thought provoking insights into the accuracy of the saying what goes around comes around It is interesting to note who has been considered to be in a position to provide information on marriage and family life Included in the eclectic collection of texts we reviewed were ministers whose focus was on spirituality doctors who emphasized medical aspects of child and adult health and public health professionals and home economists concerned with fighting disease who emphasized cleanliness order fighting germs and eliminating rodents and insects There are also philosophers who drew from ancient texts when discussing family life and a count who assembled a group of German intellectual elites to address various topics An insightful essay of this type is by Marta Karlweis 1926 in which she notes There is no other fetish that society holds to so firmly as the conception woman with all its usual associations of infantilism and dependence The child requires protection is a minor and consequently a serf but above all it possesses no spiritual existence Neither doctorates or other distinctions nor the right to vote have as yet been able to dispel this sweet idea of the childishness of woman which man cherishes p
