## **Molecular Biology Labfax Labfax Series:**

**Molecular Biology Labfax** Terence A. Brown, **Molecular Biology LabFax** T. A. Brown, 1998-07-28 Volume 2

*Molecular Biology Labfax* Terence Austen Brown, 1998 **Biochemistry LabFax**, 2014-06-28 LABFAX volumes are purpose designed data reference books for practising scientists Each book presents key information for a major subject in one place and so saves hours of searching It does not simply collect together data which are already available in catalogues since these are often incomplete and can contain conflicting information Rather the authors and editors of each LABFAX volume have searched the original literature for the accurate data which they know the specialist needs Biochemistry LabFax is a detailed compendium of essential information on radioisotopes enzymes proteins nucleic acids lipids plus data on selected techniques such as chromatography electrophoresis etc needed on an almost daily basis by researchers in any area of biochemistry In addition the book acts as a gateway to other sources for information more specific than can be covered in a volume of this size **Immunochemistry LabFax**, 2012-12-02 LABFAX volumes are purpose designed data reference

books for practicing scientists Each book presents key information for a major subject in one place and so saves hours of searching The authors and editors of each LABFAX volume have searched the original literature for the accurate data which they know the specialist needs Immunochemistry Labfax is a detailed compendium of essential information on plasma proteins immunoglobulin properties and purification antibody production labeling and derivatization plus data on techniques such as ELISA blotting and immunolocalization needed constantly by researchers in any area of immunology and related disciplines *Neuroscience LabFax* M. A. Lynch, S. M. O'Mara, 1997-04-25 A collection of up to date methods and data available in neuroscience addressing issues from the molecular to the cellular and systems level of analysis This volume includes coverage of electrophysical recording neuronal cell culture and preparation of tissues for microscopy or analysis

**Molecular Biology Labfax: Gene analysis** Terence A. Brown, 1998 **Cellular Immunology LabFax**, 2014-05-19 LABFAX volumes are purpose designed data reference books for practicing scientists Each book presents the key information for a major subject in one place and so saves hours of searching The authors and editors of each LABFAX volume have searched the original literature for the accurate data they know the subject specialist needs Cellular Immunology Labfax is a detailed compendium of information on the tissues and cells of the immune system cell lines and hybridomas antigens and receptors the major histocompatibility complex soluble immunoregulatory molecules in vivo procedures important features of species used in immunological research and much more The contents of Cellular Immunology Labfax have been carefully chosen to complement the data presented in Immunochemistry Labfax It is therefore the companion volume to this text

Cell Biology Labfax G. B. Dealtry, David Rickwood, 1992 LABFAX volumes are purpose designed data reference books for practicing scientists Each book presents the key information for a major subject in one place and so saves hours of searching It does not simply collect together data which is already available in catalogues since this is often incomplete and can contain

conflicting information Rather the authors and editors of each LABFAX volume have searched the primary research literature for the accurate data they know the subject specialist needs Cell Biology Labfax is a detailed compendium of essential information on microscopy subcellular organelles membranes receptors inhibitors hormones genes buffers etc needed on an almost daily basis by researchers in cell and molecular biology As a data reference source it is a natural companion to Molecular Biology Labfax Plant Molecular Biology LabFax R. R.D Croy,1993 A single source of reference to key data and information required by the plant molecular biologist on an almost daily basis A team of editors and contributors have compiled this manual to provide a guide to researchers in the most important basic and applied aspects of plant molecular biology Enzymology Labfax Paul C. Engel,1996 A comprehensive compendium of data on enzyme kinetics measurement of enzyme activity physical factors which affect activity and patterns of enzyme inhibition Coverage includes information on co enzymes and analogs and the analysis of ligand binding and metalloenzyme reactivity *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1993 *Biocatalysis* Andreas S. Bommarius,Bettina R. Riebel-Bommarius,2007-02-27 The whole range of biocatalysis from a firm grounding in theoretical concepts to in depth coverage of practical applications and future perspectives The book not only covers reactions products and processes with and from biological catalysts but also the process of designing and improving such biocatalysts One unique feature is that the fields of chemistry biology and bioengineering receive equal attention thus addressing practitioners and students from all three areas **Proteins LABFAX ; Edited by N.C. Price** N. C. Price,1996 Proteins Labfax is a detailed and comprehensive compendium of information on protein chemistry and the purification and physical characterization of proteins The book provides data on all the procedures used on a regular basis by researchers studying proteins including chromatography crystallization size determination computer aided structure analysis amino acid analysis and the chemical modification of amino acid side chains General data is also given on buffers salting out criteria of purity expression systems and protein stability The contents of Protein Labfax have been carefully chosen to complement the data presented in its companion volume Enzymology Labfax Serves as a companion volume to Enzymology Labfax Comprehensive coverage of protein chemistry and the purification and physical characterization of proteins Extensive information presented on procedures used regularly by researchers A complete one stop source for biochemists and researchers in the field *Using the Biological Literature* Diane Schmidt,2014-04-14 The biological sciences cover a broad array of literature types from younger fields like molecular biology with its reliance on recent journal articles genomic databases and protocol manuals to classic fields such as taxonomy with its scattered literature found in monographs and journals from the past three centuries Using the Biological Literature A Practical Guide Fourth Edition is an annotated guide to selected resources in the biological sciences presenting a wide ranging list of important sources This completely revised edition contains numerous new resources and descriptions of all entries including textbooks The guide emphasizes current materials in the English language and includes

retrospective references for historical perspective and to provide access to the taxonomic literature It covers both print and electronic resources including monographs journals databases indexes and abstracting tools websites and associations providing users with listings of authoritative informational resources of both classical and recently published works With chapters devoted to each of the main fields in the basic biological sciences this book offers a guide to the best and most up to date resources in biology It is appropriate for anyone interested in searching the biological literature from undergraduate students to faculty researchers and librarians The guide includes a supplementary website dedicated to keeping URLs of electronic and web based resources up to date a popular feature continued from the third edition      ***Virology Labfax*** David R. Harper, 1993 LABFAX volumes are reference tools for practising scientists Previously vital information has been available only by consulting a wide variety of journals manuals and scraps of paper Finding exactly what you need to know takes time and can be a frustrating experience Each LABFAX brings together the key data for a major subject in a single volume saving hours of searching The LABFAX series is a natural companion to the many laboratory methods books Possible approaches are described and evaluated with full bibliographies provided for further reference where required *Virology Labfax* is a detailed compendium of the essential information on taxonomy culture and safe handling of viruses immunology monoclonal antibodies antivirals vaccines and many other subjects needed constantly by working virologists      ***Cell Culture Labfax*** Michael Butler, M. Butler, M. Dawson, 1992 Interest has steadily increased in the mammalian cell cultures for a wide variety of applications *Cell Culture Labfax* is a convenient user friendly reference tool for all researchers and students in biology biotechnology and biomedicine who currently use or will need to use animal cell culture This new volume in the LABFAX Series comprehensively covers reference data relevant to cell culture thus eliminating the need to search through a variety of journals manuals and catalogs Spiral bound with a hard case for durability this book can be used as a prime reference tool at the laboratory bench An index helps locate facts quickly This data book complements protocol oriented laboratory guides with up to date data and references on cell lines culture techniques cell characterization separation cloning media preservation growth factors products equipment safety terminology suppliers and associations      ***Current Catalog*** National Library of Medicine (U.S.), 1993 First multi year cumulation covers six years 1965 70      ***Molecular Biology of the Cell***, 1995      **ENZYMES: Catalysis, Kinetics and Mechanisms** Narayan S. Punekar, 2025-02-01 The second edition of the textbook *Enzymes Catalysis Kinetics and Mechanisms* focuses on the two broad mechanistic facets of enzymology namely the chemical and the kinetic It endeavors to bring out the synergy between enzyme structures and mechanisms Written with a self study approach in mind the emphasis is on how to begin experiments with an enzyme and subsequently analyze the data The book is divided into six major sections 1 Enzyme Catalysis A Perspective 2 Enzyme Kinetic Practice and Measurements 3 Elucidation of Kinetic Mechanisms 4 Chemical Mechanisms and Catalysis 5 Exploiting Enzymes and 6 An end piece on Frontiers in Enzymology The individual concepts are treated as stand alone short sections In case the reader needs to use

any one concept it should be possible with minimal cross referencing to the rest of the book Further the book presents specialized techniques and complex approaches that require involved experimentation in theory with suitable references to guide the reader The book is proposed more as a textbook in a self learning mode to students of modern biology particularly those with limited exposure to quantitative aspects and organic chemistry
