Molecular Pathology Of Alcoholism:

The Molecular Pathology of Alcoholism T. Norman Palmer, 1991 The last few years have seen major advances in our understanding of the molecular and genetic events associated with alcohol abuse The advent of recombinant DNA technology has allowed the structure of the genes and proteins of alcohol metabolism to be identified and this work has formed the basis for genetic studies of factors that influence drinking behavior and alcoholism This book provides an introduction for the non specialist reader to recent developments concerning the molecular pathology of alcohol related disease It gives substance to the view that alcoholism is an organic disorder that stems from the specific interaction of alcohol and its metabolites with cellular components Particular attention is paid to the molecular biology of the enzymes of alcohol metabolism

Alcoholism: A Molecular Perspective T. Norman Palmer, 2012-12-06 This book contains selected proceedings from the NATO Advanced Study Institute AS I The Molecular Pathology of Alcoholism held at the Hotel Il Ciocco in Tuscany during 26th August 6th September 1990 Alcoholism remains one of the most challenging problems in medical care with far reaching medical social and economic consequences For example in the U S estimates indicate that 18 million people have a serious drinking problem and that the total cost to the economy of alcohol abuse is 117 billion Treatment of alcohol dependence and other alcohol related disorders accounts for almost 15% of the total health bill of the United States Despite the scale of the medical problem biomedical research on alcoholism remains something of a Cinderella science Research funding from government and other bodies is relatively poor and the number of medical scientists working in the field remains small The Organizing Committee for this NATO ASI comprising Charles Lieber New York Timothy Peters London Mario Dianzani Torino Emanuele Albano Torino and Norman Palmer perth Director were therefore particularly grateful to the NATO Scientific Affairs Division for their active support of this AS I the first dealing with a topic related to alcohol abuse We moreover hope that this support will continue The theme of the ASI was an in depth discussion of the molecular events initiated by alcohol abuse that culminate in onset of alcohol related disease Alcohol-Associated Liver Disease - From Pathogenesis to
