*Library Management Problems Today* Wayne Disher, 2021-03-25

Here's the first comprehensive case studies in library management book to be published since 1981. The book uses case studies gleaned from TODAY'S library world to help students take analytical approaches to library problems. Much research points to the fact that students are more inductive than deductive reasoners. Therefore, books like this, which provide actual examples to explore and think about, are far more useful than many of the existing texts which start with theory and basic principles. Case studies are often used in business, law, and medical schools. This book will facilitate instructors pushing students to explore how what they have learned applies to real-world situations. Cases are organized in six sections that parallel basic library management functions: Planning, Organizing, Leading, Controlling, Staffing, Communicating. Each section features case studies, each with the case description and three responses from library leaders from a wide variety of library types and sizes.

*Library Management Problems Today: Case Studies* will allow students to put themselves in the center of actual library problems and ask, "What would I do?"
