Creatures Francesca Saggini, Anna Enrichetta Soccio, 2018-10-19 On the 200th anniversary of the first edition of Mary
Shelley's *Frankenstein* *Transmedia Creatures* presents studies of *Frankenstein* by international scholars from converging
disciplines such as humanities musicology film studies television studies English and digital humanities These innovative
contributions investigate the afterlives of a novel taught in a disparate array of courses *Frankenstein* disturbs and transcends
boundaries be they political ethical theological aesthetic and not least of media ensuring its vibrant presence in
contemporary popular culture *Transmedia Creatures* highlights how cultural content is redistributed through multiple media
forms and modes of production including user generated ones from below that often appear synchronously and dismantle and
renew established readings of the text while at the same time incorporating and revitalizing aspects that have always been
central to it The authors engage with concepts value systems and aesthetic moral categories among them the family horror
monstrosity diversity education risk technology the body from a variety of contemporary approaches and highly original
perspectives which yields new connections Ultimately *Frankenstein* as evidenced by this collection is paradoxically enriched
by the heteroglossia of preconceptions misreadings and overreadings that attend it and that reveal the complex interweaving
of perceptions and responses it generates Published by Bucknell University Press Distributed worldwide by Rutgers

State Building in Latin America Hillel David Soifer, 2015-06-09 State Building in Latin America diverges from existing scholarship in developing explanations both for why state building efforts in the region emerged and for their success or failure First Latin American state leaders chose to attempt concerted state building only where they saw it as the means to political order and economic development Fragmented regionalism led to the adoption of more laissez faire ideas and the rejection of state building With dominant urban centers developmentalist ideas and state building efforts took hold but not all state building projects succeeded The second plank of the book's argument centers on strategies of bureaucratic appointment to explain this variation Filling administrative ranks with local elites caused even concerted state building efforts to flounder while appointing outsiders to serve as administrators underpinned success Relying on extensive archival evidence the book traces how these factors shaped the differential development of education taxation and conscription in Chile Colombia Mexico and Peru
