Deep Fakes Michael Filimowicz, 2022-03-01 Deep Fakes Algorithms and Society focuses on the use of artificial intelligence technologies to produce fictitious photorealistic audiovisual clips that are indistinguishable from traditional video media For over a century the indexical relationship of the photographic image and its related media of film and video to the scene of capture has served as a basis for truth claims Historically the iconicity of these images has featured a causal traceback to actual light rays in a particular time and space which were fixed by chemical reactions or digital sensors to the resultant image Today photorealistic audiovisual media can be generated from deep learning networks that sever any connection to an actual event

Should society instantiate new regimes to manage this new challenge to our sense of reality and the traditional evidential capacities of the mechanical image How do these images generate information disorder while also providing the basis for legitimate tools used in entertainment and creative industries Scholars and students from many backgrounds as well as policymakers journalists and the general reading public will find a multidisciplinary approach to questions posed by deep fake research from Communication International Studies Writing and Rhetoric Billboard ,1999-09-11 In its 114th year Billboard remains the world's premier weekly music publication and a diverse digital events brand content and data licensing platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends **The History of Television, 1942 to 2000** Albert Abramson,2007-09-15 Albert Abramson published with McFarland in 1987 a landmark volume titled The History of Television 1880 1941 massive research Library Journal voluminous documentation Choice many striking old photos The TV Collector At last he has produced the follow up volume the reader may be assured there is no other book in any language that is remotely comparable to it Together these two volumes provide the definitive technical history of the medium Upon the development in the mid 1940s of new cameras and picture tubes that made commercial television possible worldwide the medium rose rapidly to prominence Perhaps even more important was the invention of the video tape recorder in 1956 allowing editing re shooting and rebroadcasting This second volume 1942 to 2000 covers these significant developments and much more Chapters are devoted to television during World War II and the postwar era the development of color television Ampex Corporation's contributions television in Europe the change from helical to high band technology solid state cameras the television coverage of Apollo II the rise of electronic journalism television entering the studios the introduction of the camcorder the demise of RCA at the hands of GE the domination of Sony and Matsushita and the future of television in cinema and the 1080 P24 format The book is heavily illustrated as is the first volume **Strategy & Business** ,2009
