Moments For Each Other:

The End of the World and Other Teachable Moments Michael Naas, 2014-10-15 The End of the World and Other Teachable Moments follows the remarkable itinerary of Jacques Derrida's final seminar The Beast and the Sovereign 2001-3 as the explicit themes of the seminar namely sovereignty and the question of the animal come to be supplemented and interrupted by questions of death mourning survival the archive and especially the end of the world The book begins with Derrida's analyses in the first year of the seminar of the question of the animal in the context of his other published works on the same subject It then follows Derrida through the second year of the seminar presented in Paris from December 2002 to March 2003 as a very different tone begins to make itself heard one that wavers between melancholy and an extraordinary lucidity with regard to the end Focusing the entire year on just two works Daniel Defoe's Robinson Crusoe and Martin Heidegger's seminar of 1929-30 The Fundamental Concepts of Metaphysics the seminar comes to be dominated by questions of the end of the world and of an originary violence that at once gives rise to and effaces all things The End of the World and Other Teachable Moments follows Derrida as he responds from week to week to these emerging questions as well as to important events unfolding around him both world events the aftermath of 9/11 the American invasion of Iraq and more personal ones from the death of Maurice Blanchot to intimations of his own death less than two years away All this the book concludes makes this final seminar an absolutely unique work in Derrida's corpus one that both speaks of death as the end of the world and itself now testifies to that end just one though hardly the least of its many teachable moments *Teachable Moments and the Science of Education* Greg Seals, 2018-08-06 This book develops a general theory of autonomous teaching by examining a mysterious educational idea the teachable moment By formulating an understanding of the teachable moment as predicated upon educational energy this book takes up John Dewey's view of teaching to articulate a law like scientifically oriented pedagogical theory By offering a testable hypothesis about effective teaching through an innovative reading of Dewey's law this book also provides insights into changes in school practice and schooling policy consonant with an understanding of teaching as a science **The Tattoo Trail** Gurucharan Singh Gandhi, Vishnukant Ahlawat a top defence honcho working on India's response to the Chinese Doklam intransigence is killed in his hospital room Is it a coincidence that the international summit where peace is supposedly being brokered between India and China is just a week away The soft spoken and sophisticated Kali Nath Singh is the suspect caught on CCTV camera for this murder Keshav Kumar an uncouth yet astute investigator from Bihar along with his unlikely deputy the shrewd Sumitra Devi an ex wrestler from Haryana is tasked to solve the murder mystery What started as a straightforward murder case seemed to be hopelessly tangled with oddly dissimilar things false identity the Goa mining scam and even a love story Will Keshav and Sumitra succeed in cracking this case An unusual whodunnit that has stories within stories this book will keep you riveted to the very end *A Treatise on the Dynamics of a System of Rigid Bodies: The elementary part* Edward John Routh, 1897 *Stirring of*

Soul in the Workplace Alan Briskin, 1998-12-28 This deeply lyrical book offers perspective for those struggling to hear the quiet voice of the soul over the din of the contemporary workplace Alan Briskin shows how the modern organization has gradually increased its demands on us beginning with our bodies then our minds and now our souls But through the moving personal stories of people fighting to reclaim their souls he also sends a message that encourages individuals to keep their spiritual integrity and values alive In *The Stirring of Soul In the Workplace* Briskin weaves together lessons from history psychology and management theory with numerous real life examples to tell the story of how the modern workplace has evolved to value technology and productivity over soulfulness and relationship From the Industrial Revolution's marriage of mechanization and efficiency to the management theories of the early 20th century Briskin traces the emergence of the quest for efficiency and control in the workplace He questions the corporate concept of individual personality that asks us to check our emotions fantasies imaginations and souls at the door He describes the history of the soul as a dynamic force that continues to influence our behavior and shows how excluding it from our work life actually flattens our potential and dampens our creativity Rather than solve the conventional question organizations have been asking for years how can we change people Alan Briskin examines how organizations can better reflect personal and human values in the workplace For organizations that too often have sacrificed the well being of the individual for the goals of the organization the author suggests a more active way of taking up our work roles that can bring more of our experience and imagination into play He points out that meaning cannot come from corporate mission statements or reengineering programs Instead it needs to be nurtured through dialogue and reflection the courage to ask troubling questions and a willingness to face the consequences of our collective and individual actions When we learn to honor the contradictions uncertainties and interconnections inherent in the workplace the energies of the soul will begin to stir with revitalizing results

The Life and Thought of Lev Karsavin Dominic Rubin, 2013 At last Russia has begun to speak in a truly original voice So said Anatoly Vaneev a Soviet dissident who became Karsavin's disciple in the Siberian gulag where the philosopher spent his last two years The book traces the unusual trajectory of this inspiring voice Karsavin started his career as Russia's brightest historian of Catholic mysticism however his radical methods which were far ahead of their time shocked his conservative colleagues The shock continued when Karsavin turned to philosophy writing flamboyant and dense essays in a polyphonic style which both Marxists and religious traditionalists found provocative There was no let up after he was expelled by Lenin from Soviet Russia in exile he became a leading theorist in the Eurasian political movement combining Orthodox theology with a left wing political orientation Finally Karsavin found stability when he was invited to teach history in Lithuania there he spent twenty years reworking his philosophy before suffering the German and Soviet invasions of his new homeland and then deportation and death Clearing away misunderstandings and putting the work and life in context this book shows how Karsavin made an original contribution to European philosophy inter religious dialogue Orthodox and Catholic theology and the understanding of history

Steinwachs,2013-10-30 This thesis explores the idea that the Higgs boson of the Standard Model and the cosmological inflation are just two manifestations of one and the same scalar field the Higgs inflation By this unification two energy scales that are separated by many orders of magnitude are connected thereby building a bridge between particle physics and cosmology An essential ingredient for making this model consistent with observational data is a strong non minimal coupling to gravity Predictions for the value of the Higgs mass as well as for cosmological parameters are derived and can be tested by future experiments The results become especially exciting in the light of the recently announced discovery of the Higgs boson The model of non minimal Higgs inflation is also used in a quantum cosmological context to predict initial conditions for inflation These results can in turn be tested by the detection of primordial gravitational waves The presentation includes all introductory material about cosmology and the Standard Model that is essential for the further understanding It also provides an introduction to the mathematical methods used to calculate the effective action by heat kernel methods **The**
