Momentum Living Studies:

The Ecology of Purposeful Living Across the Lifespan Anthony L. Burrow, Patrick L. Hill, 2020-08-19 This book explores what it means to live a purposeful life and outlines the benefits associated with purpose across different life domains. It also demonstrates that purpose in life is not reducible to constructs such as happiness, well-being, or identity development. The importance of having a sense of purpose in life is attracting renewed attention in both scientific and social arenas. Mounting evidence from intricately designed experiments and large scale studies reveals how pursuing a purpose can make a person happier, healthier, and even lengthen their lifespan. However, existing texts on purpose have said little on why having has these effects, how it may influence our ability to navigate diverse environments, or how best to consider the construct from a multidisciplinary approach that moves beyond psychology. Recognizing this gap in the literature, this book provides multidisciplinary perspectives on the topic of purpose and examines what we can do as researchers, interventionists, and society as a whole to imbue purposefulness in the lives of people across the lifespan. It includes contributions from key figures on topics such as identity, health, youth programs, and youth purpose, diversity, aging, and work.

Ageing in Everyday Life Stephen Katz, 2019-10-09 Applying interdisciplinary perspectives about everyday life to vital issues in the lives of older people, this book maps together the often taken-for-granted aspects of what it means to age in an ageist society. Part of the Ageing in a Global Context series, the two parts address the materialities and the embodiments of everyday life respectively. Topics covered include household possessions, public and private spaces, older drivers, media representations, dementia care, health tracking, dress, and sexuality. This focus on micro-sociological conditions allows us to rethink key questions which have shaped debates in the social aspects of ageing. International contributions including from the UK, USA, Sweden, and Canada provide a critical guide to inform thinking and planning our ageing futures.

The Natural Law of Cycles

James H. Bunn, 2017-07-28 *The Natural Law of Cycles* assembles scientific work from different disciplines to show how research on angular momentum and rotational symmetry can be used to develop a law of energy cycles as a local and global influence. Angular momentum regulates small scale rotational cycles such as the swimming of fish in water, the running of animals on land, and the flight of birds in air. Also, it regulates large scale rotation cycles such as global currents of wind and water. James H. Bunn introduces concepts of symmetry, balance, and angular momentum, showing how together they shape the mobile symmetries of animals. Chapter 1 studies the configurations of animals as they move in a head first direction. Chapter 2 shows how sea animals follow currents and tides generated by the rotational cycles of the earth. In chapter 3, Bunn explores the biomechanical pace of walking as a partial cycle of rotating limbs. On a large scale, angular momentum governs balanced shifts in plate tectonics. Chapter 4 begins with an examination of rotational wind patterns in terms of the counterbalancing forces of angular momentum. The author shows how these winds augment the flights of birds during migrations. A final chapter centres on the conservation of energy as the most basic principle of science. Bunn argues that in the nineteenth century, the unity of nature was seen in the emergent concept of energy, not matter, as the source of power, including the movements of animals and machines. In each chapter, Bunn features environmental writers who celebrate mobile symmetries. This book will interest students, naturalists, and advocates of the environmental movement. **Encyclopedia of the**

Enlightenment Michel Delon, 2013-12-04 This acclaimed translation of Michel Delon's *Dictionnaire Europeen des Lumieres* contains more than 350 signed entries covering the art, economics, science, history, philosophy, and religion of the Enlightenment. Delon's team of more than 200 experts from around the world offers a unique perspective on the period, providing not only factual information but also critical opinions that give the reader a deeper level of understanding. An international team of translators, editors, and advisers, under the auspices of the French Ministry of Culture, has brought this collection of scholarship to the English speaking world for the first time. *The Secret Life of Things* Mark

Blackwell, 2007 This collection enriches and complicates the history of prose fiction between Richardson and Fielding at mid-century and Austen at the turn of the century by focusing on its narratives, a once popular form largely forgotten by readers and critics alike. The volume also advances important work on eighteenth century consumer culture and the theory of things. The essays that comprise *The Secret Life of Things* thus bring new texts and new ways of thinking about familiar ones to our notice. Those essays range from the role of its narratives in period debates about copyright to their complex relationship with object-riddled sentimental fictions, from anti-Semitism in *Chrysalis* to jingoistic imperialism in *The Adventures of a Rupee*, from the narrative as a variety of whore's biography to a consideration of its contributions to an emergent middle class ideology.

As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
