Momentum Living Studies:

The Ecology of Purposeful Living Across the Lifespan Anthony L. Burrow, Patrick L. Hill, 2020-08-19 This book explores what it means to live a purposeful life and outlines the benefits associated with purpose across different life domains. It also demonstrates that purpose in life is not reducible to constructs such as happiness, well-being, or identity development. The importance of having a sense of purpose in life is attracting renewed attention in both scientific and social arenas. Mounting evidence from intricately designed experiments and large scale studies reveals how pursuing a purpose can make a person happier, healthier, and even lengthen their lifespan. However, existing texts on purpose have said little on why having has these effects, how it may influence our ability to navigate diverse environments, or how best to consider the construct from a multidisciplinary approach that moves beyond psychology. Recognizing this gap in the literature, this book provides multidisciplinary perspectives on the topic of purpose and examines what we can do as researchers, interventionists, and society as a whole to imbue purposefulness in the lives of people across the lifespan. It includes contributions from key figures on topics such as identity, health, youth programs, and youth purpose, diversity, aging, and work. *Ageing in Everyday Life* Stephen Katz, 2019-10-09 Applying interdisciplinary perspectives about everyday life to vital issues in the lives of older people, this book maps together the often taken-for-granted aspects of what it means to age in an ageist society. Part of the *Ageing in a Global Context* series, the two parts address the materialities and the embodiments of everyday life respectively. Topics covered include household possessions, public and private spaces, older drivers, media representations, dementia care, health tracking, dress, and sexuality. This focus on micro-sociological conditions allows us to rethink key questions which have shaped debates in the social aspects of ageing. International contributions including from the UK, USA, Sweden, and Canada provide a critical guide to inform thinking and planning our ageing futures. **Automatic Control in Aerospace 1989** T. Nishimura, 2014-05-23 The papers presented at the Symposium covered the areas in aerospace technology where automatic control plays a vital role. These included navigation and guidance, space robotics, flight management systems, and satellite orbital control systems. The information provided reflects the recent developments and technical advances in the application of automatic control in space technology. **A Studied Impression of That Which Is** R. Garner Brasseur, 2006-09 *Mind your business* Theo Vorster, 2013-11-01 *Mind your Business* is a compilation of the success stories of prominent South African businesspeople from entrepreneurs to chief executives of multinational business giants. This book is the outgrowth of South African channel kykNet's popular TV series *Sakegesprek met Theo Vorster*. After many inquiries from viewers, Theo decided to summarise his 38 interviews from the show in book form and to share these informative and inspiring conversations with readers. Each chapter tells the story of a business leader's personal journey to success, including the setbacks and obstacles that had to be overcome. Theo explains key principles and offers some of his own observations about his interaction with the business people. This book is intended for anyone who is interested in the success stories of

business leaders and would like to apply some of the key principles in their own enterprises or careers **Secrets to a Richer Life** Earl Ernest Guile,2005-03 Collected interviews of a group of distinguished people review how to strengthen simplify and enjoy life *Volume Based Portfolio Strategies* Alexander Brändle,2010-06-28 Alexander Brändle investigates the relationship between different measures of trading volume and returns in the Swiss stock market He discovers that stocks with unusual trading volume in a given month experience systematically higher subsequent returns **The Many Faces of Maxwell, Dirac and Einstein Equations** Waldyr A. Rodrigues, Jr,Edmundo Capelas de Oliveira,2016-04-26 This book is an exposition of the algebra and calculus of differential forms of the Clifford and Spin Clifford bundle formalisms and of vistas to a formulation of important concepts of differential geometry indispensable for an in depth understanding of space time physics The formalism discloses the hidden geometrical nature of spinor fields Maxwell Dirac and Einstein fields are shown to have representatives by objects of the same mathematical nature namely sections of an appropriate Clifford bundle This approach reveals unity in diversity and suggests relationships that are hidden in the standard formalisms and opens new paths for research This thoroughly revised second edition also adds three new chapters on the Clifford bundle approach to the Riemannian or semi Riemannian differential geometry of branes on Komar currents in the context of the General Relativity theory and an analysis of the similarities and main differences between Dirac Majorana and ELKO spinor fields The exercises with solutions the comprehensive list of mathematical symbols and the list of acronyms and abbreviations are provided for self study for students as well as for classes From the reviews of the first edition The text is written in a very readable manner and is complemented with plenty of worked out exercises which are in the style of extended examples their book could also serve as a textbook for graduate students in physics or mathematics Alberto Molgado Mathematical Reviews 2008 k **Assessment of the U.S. Outer Continental Shelf Environmental Studies Program** Division on Earth and Life Studies,Commission on Geosciences, Environment and Resources,Committee to Review the Outer Continental Shelf Environmental Studies Program,1990-02-01 A report by the Physical Oceanography Panel of the National Research Council of the United States into the physical oceanographic aspects of the Environmental Studies Program The Committee evaluated the quality and relevance of studies carried out in waters under federal control which extend from the limits of state jurisdictions 3 12 miles offshore and include the central and outer continental shelf waters and the continental slope of the United States Life Care Planning and Case Management Across the Lifespan Tanya Rutherford-Owen,Mary Barros-Bailey,Roger O. Organization Studies and Posthumanism François-Xavier de Vaujany,Silvia Gherardi,Polyana Silva,2024-04-05 This book aims at exploring the reception of critical posthumanist conversations in the context of Management and Organization Studies It constitutes an invitation to de-center the human subject and thus an invitation to the ongoing deconstruction of humanism The project is not to deny humans but to position them in relation to other nonhumans more than humans the non-living world and all the missing masses from organizational inquiry What is under critique is humanism's anthropocentrism essentialism exceptionalism and speciesism in the context of the Anthropocene and the contemporary crisis the world experiences From climate change to the loss of sense at work to the new geopolitical crisis to the unknown effects of the diffusion of AI all these powerful forces have implications for organizations and organizing A re-imagining of concepts theories and methods is needed in organization studies to cope with the challenge of a more-than-human world New Studies in Literature Edward Dowden,1895 **The Natural Law of Cycles** James H. Bunn,2017-07-28 The Natural Law of Cycles assembles scientific work from different disciplines to show how research on angular momentum and rotational symmetry can be used to develop a law of energy cycles as a local and global influence Angular momentum regulates small-scale rotational cycles such as the swimming of fish in water the running of animals on land and the flight of birds in air Also it regulates large-scale rotation cycles such as global currents of wind and water James H Bunn introduces concepts of symmetry balance and angular momentum showing how together they shape the mobile symmetries of animals Chapter 1

studies the configurations of animals as they move in a head first direction Chapter 2 shows how sea animals follow currents and tides generated by the rotational cycles of the earth In chapter 3 Bunn explores the biomechanical pace of walking as a partial cycle of rotating limbs On a large scale angular momentum governs balanced shifts in plate tectonics Chapter 4 begins with an examination of rotational wind patterns in terms of the counter balancing forces of angular momentum The author shows how these winds augment the flights of birds during migrations A final chapter centres on the conservation of energy as the most basic principle of science Bunn argues that in the nineteenth century the unity of nature was seen in the emergent concept of energy not matter as the source of power including the movements of animals and machines In each chapter Bunn features environmental writers who celebrate mobile symmetries This book will interest students naturalists and advocates of the environmental movement
