Len Scrogan, 2019-07-12 In his poem *The Rock*, T.S. Eliot asks three piercing questions: Where is the life we have lost in living? Where is the wisdom we have lost in knowledge? Where is the knowledge we have lost in information? In our crazy, busy, app-driven lives, these questions become increasingly common. Find a few of the answers in Verbz, a modern, fresh, and gutsy take on the Jewish Proverbs and our continual search for the pathway toward living wisdom. Beyond the T-Test

Scott A. Pardo, 2025-06-04 This book was inspired by years of questions asked by non-statistical professionals from social scientists, public policy analysts, regulatory affairs specialists, engineers, and physical scientists. It provides them with both an intuitive explanation of many common statistical methods and enough mathematical background to help them justify those methods to others such as regulatory agencies. It provides an introduction to commonly used methods that are not covered in a first elementary statistics course, such as partial least squares, MCMC, and neural networks. It also provides R code for making all the computations described in the text. As a textbook, it could be used as a second course in statistics for non-statisticians in fields such as social sciences, public policy, engineering, chemistry, and physics. Many first-year graduate students have had an elementary statistics course but were not exposed to enough of the mathematics to justify the application of those methods. Furthermore, they often encounter methods and concepts not touched upon in their first statistics course. This book provides the tools required to give a deeper understanding of statistical methods without being all about theorems and proofs. *What Can a Modern Jew Believe?*
