Jones, 2022-02-24 A comprehensive survey of organic compounds used as poisons on arrows and spears in food and even as insecticides by numerous Native American tribes Biological warfare is a menacing twenty first century issue but its origins extend to antiquity While the recorded use of toxins in warfare in some ancient populations is rarely disputed the use of arsenical smoke in China which dates to at least 1000 BC for example the use of poison arrows and other deadly substances by Native American groups has been fraught with contradiction At last revealing clear documentation to support these

theories anthropologist David Jones transforms the realm of ethnobotany in *Poison Arrows* Examining evidence within the few extant descriptive accounts of Native American warfare along with grooved arrowheads and clues from botanical knowledge Jones builds a solid case to indicate widespread and very effective use of many types of toxins He argues that various groups applied them to not only warfare but also to hunting and even as an early form of insect extermination Culling extensive ethnological historical and archaeological data Jones provides a thoroughly comprehensive survey of the use of ethnobotanical and entomological compounds applied in wide ranging ways including homicide and suicide Although many narratives from the contact period in North America deny such uses Jones now offers conclusive documentation to prove otherwise A groundbreaking study of a subject that has been long overlooked *Poison Arrows* imparts an extraordinary new perspective to the history of warfare weaponry and deadly human ingenuity A unique contribution to the field of American Indian ethnology This information has never been compiled before and I doubt that many ethnologists in the field have ever suspected the extent to which poison was used among North American Indians This book significantly extends our understanding Wayne Van Horne Associate Professor of Anthropology Kennesaw State University **CRC World**
