Manning,2012 Poison Ivy creates a voracious vine and covers the Daily Planet building with her creeping creation *A Handful of Blossoms* Lara Biyuts, *POISON* James G. Zomchick,2023-10-09 In the year 2312 the crew of a stranded corporation ship makes a horrifying discovery Come and follow the epic story of this soon to be legend Lieutenant Vicky Young is a Hispanic soldier ostracized within her own community for her race She ventures on a supposedly simple mission and evolves to become the leader others see in her but she never thought to see in herself She discovers that Earth was involved in the greatest war we ve ever known and no one remembers it Vicky s tenacity and fire to save her crew might just save the universe Does this clue to our past lead down the road to salvation or annihilation for us all Come and join author James G Zomchick in this labyrinth of suspense and mystery Poison Poison s what they fed me poison is what they made me Poison is who I am When Kingdom Come D H Blake,2018-04-26 Juan Reyes thought he was normal though he dreamed of being something more He sought out the spotlight on stage and screen and thought he had found where he truly belonged Until one day dragged along on a misguided adventure in the woods by a group of friends and acquaintances with too much time on their hands a strange and violent encounter turns his life upside down Juan learns that he once had another name another race and a whole other reality that he can hardly accept a reality in which alien civilizations exist and men can shake off the bonds of gravity and fly free But there is a cost and it is paid in blood Offered the chance to rejoin his people accepting their strange and sometimes brutal ways at the expense of his conscience and the woman he loves Juan has to make a choice Does he side with them

against the only people he has ever known people who are determined to eliminate the alien threat or side with humanity and turn his back on who he really is It s an impossible choice and he s running out of time Why You Need Chelation Therapy and Other Vital Detox Methods to Save Your Life Edward C. Kondrot,Garry Gordon,2015-05-14 Many of my colleagues asked me to bring the latest and now greatest news about chelation to the public as well as to the medical community at large I interviewed a number of doctors who provide chelation treatment and asked them to describe their approach as well as their clinical results Voila this book a compendium of chelation protocols products and spectacular cases Technonatures Damian F. White,Chris Wilbert,2010-04-05 Environmentalism and social sciences appear to be in a period of disorientation and perhaps transition In this innovative collection leading international thinkers explore the notion that one explanation for the current malaise of the politics of ecology is that we increasingly find ourselves negotiating technonatural space times International contributors map the political ecologies of our technonatural present and indicate possible paths for technonatural futures The term technonatures is in debt to a long line of environmental cultural theory from Raymond Williams onwards problematizing the idea that a politics of the environment can be usefully grounded in terms of the rhetoric of defending the pure the authentic or an idealized past solely in terms of the ecological or the natural In using the term technonatures as an organizing myth and metaphor for thinking about the politics of nature in contemporary times this collection seeks to explore one increasingly pronounced dimension of the social natures discussion Technonatures highlights a growing range of voices considering the claim that we are not only inhabiting diverse social natures but that within such natures our knowledge of our worlds is ever more technologically mediated produced enacted and contested Toxic Timescapes Simone M. Müller,May-Brith Ohman Nielsen,2023-01-17 An interdisciplinary environmental humanities volume that explores human environment relationships on our permanently polluted planet While toxicity and pollution are ever present in modern daily life politicians juridical systems media outlets scholars and the public alike show great difficulty in detecting defining monitoring or generally coming to terms with them This volume s contributors argue that the source of this difficulty lies in the struggle to make sense of the intersecting temporal and spatial scales working on the human and more than human body while continuing to acknowledge race class and gender in terms of global environmental justice and social inequality The term toxic timescapes refers to this intricate intersectionality of time space and bodies in relation to toxic exposure As a tool of analysis it unpacks linear understandings of time and explores how harmful substances permeate temporal and physical space as both event and process It equips scholars with new ways of creating data and conceptualizing the past present and future presence and possible effects of harmful substances and provides a theoretical framework for new environmental narratives To think in terms of toxic timescapes is to radically shift our understanding of toxicants in the complex web of life Toxicity pollution and modes of exposure are never static therefore dose timing velocity mixture frequency and chronology matter as much as the geographic location and societal position of those exposed Together these

factors create a specific toxic timescape that lies at the heart of each contributor's narrative. Contributors from the disciplines of history, human geography, science, and technology studies, philosophy, and political ecology come together to demonstrate the complex reality of a toxic existence. Their case studies span the globe as they observe the intersection of multiple times and spaces at such diverse locations as former battlefields in Vietnam, aging nuclear weapon storage facilities in Greenland, waste deposits in southern Italy, chemical facilities along the Gulf of Mexico, and coral breeding laboratories across the world.

Killing the Koala and Poisoning the Prairie Corey J. A. Bradshaw, Paul R. Ehrlich, 2015-10-05

Though separated by thousands of miles, the United States and Australia have much in common. Geographically, both countries are expansive: the United States is the fourth largest in land mass, and Australia is the sixth, and both possess a vast amount of natural biodiversity. At the same time, both nations are on a crash course toward environmental destruction. Highly developed super consumers with enormous energy footprints and high rates of greenhouse gas emissions, they are two of the biggest drivers of climate change per capita. As renowned ecologists Corey J. A. Bradshaw and Paul R. Ehrlich make clear in *Killing the Koala and Poisoning the Prairie*, both of these countries must confront the urgent question of how to stem this devastation and turn back from the brink. In this book, Bradshaw and Ehrlich provide a spirited exploration of the ways in which the United States and Australia can learn from their shared problems and combine their most successful solutions in order to find and develop new resources, lower energy consumption and waste, and grapple with the dynamic effects of climate change. Peppering the book with humor, irreverence, and extensive scientific knowledge, the authors examine how residents of both countries have irrevocably altered their natural environments, detailing the most pressing ecological issues of our time, including the continuing resource depletion caused by overpopulation. They then turn their discussion to the politics behind the failures of environmental policies in both nations and offer a blueprint for what must be dramatically changed to prevent worsening the environmental crisis. Although focused on two nations, *Killing the Koala and Poisoning the Prairie* clearly has global implications: the problems facing the United States and Australia are not theirs alone, and the solutions to come will benefit by being crafted in coalition. This book provides a vital opportunity to learn from both countries' leading environmental thinkers and to heed their call for a way forward together.
