Poland In Transition 19891991:

The Political Economy of Transitions to Peace Galia Press-Barnathan, 2009-07-05 Much attention has focused on the ongoing role of economics in the prevention of armed conflict and the deterioration of relations In *The Political Economy of Transitions to Peace* Galia Press Barnathan focuses on the importance of economics in initiating and sustaining peaceful relations after conflict Press Barnathan provides in depth case studies of several key relationships in the post World War II era Israel and Egypt Israel and Jordan Japan the Philippines and Indonesia Japan and South Korea Germany and France and Germany and Poland She creates an analytical framework through which to view each of these cases based on three factors the domestic balance between winners and losers from transition to peace the economic disparity between former enemies and the impact of third parties on stimulating new cooperative economic initiatives Her approach provides both a regional and cross regional comparative analysis of the degree of success in maintaining and advancing peace of the challenges faced by many nations in negotiating peace after conflict and of the unique role of economic factors in this highly political process Press Barnathan employs both liberal and realist theory to examine the motivations of these states and the societies they represent She also weighs their power relations to see how these factor into economic interdependence and the peace process She reveals the predominant role of the state and big business in the initial transition phase cold peace but also identifies an equally vital need for a subsequent broader societal coalition in the second normalizing phase warm peace Both levels of engagement Press Barnathan argues are essential to a durable peace Finally she points to the complex role that third parties can play in these transitions and the limited long term impact of direct economic side payments to the parties

Intermarium Marek Jan Chodakiewicz, 2017-09-08 History and collective memories influence a nation its culture and institutions hence its domestic politics and foreign policy That is the case in the Intermarium the land between the Baltic and Black Seas in Eastern Europe The area is the last unabashed rampart of Western Civilization in the East and a point of convergence of disparate cultures Marek Jan Chodakiewicz focuses on the Intermarium for several reasons Most importantly because as the inheritor of the freedom and rights stemming from the legacy of the Polish Lithuanian Ruthenian Commonwealth it is culturally and ideologically compatible with American national interests It is also a gateway to both East and West Since the Intermarium is the most stable part of the post Soviet area Chodakiewicz argues that the United States should focus on solidifying its influence there The ongoing political and economic success of the Intermarium states under American sponsorship undermines the totalitarian enemies of freedom all over the world As such the area can act as a springboard to addressing the rest of the successor states including those in the Caucasus Central Asia and the Russian Federation Intermarium has operated successfully for several centuries It is the most inclusive political concept within the framework of the Commonwealth By reintroducing the concept of the Intermarium into intellectual discourse the author highlights the autonomous and independent nature of the area This is a brilliant and innovative addition to European Studies

and World Culture Poland and Germany, 1989-1991 Randall Everest Newnham, 2000 Democratic Government in Poland G. Sanford, 2002-07-16 Democratic government has now been entrenched in Poland An increasingly significant European actor Poland presents problematic but also stimulating challenges to new NATO and EU associates This authoritative overview examines in depth the constitutional and governmental framework in Poland since 1989 and its central political institutions mechanisms and actors Sanford demonstrates how the governmental system evolved pragmatically during the 1990s to cope with modernization and consolidated viable independent statehood consensually around Poland's hardy constitutional values

Transformation of the Telecommunication Environment in Poland, 1989-1991 Andrzej Tomasz Jarmoszko, 1994 **Poland in Transition** David R. Pichaske, 1994 Poland's Security Policy Justyna Zajac, 2016-11-02 This book examines how the changing post Cold War order affected Poland's security policy and particularly how the West's weakening position and Russia's revisionist policy reinforced the traditional view of security in Poland It addresses the reasons why Poland a middle power in Central Europe adopted a bridging strategy in the early 1990s how this strategy changed along with the redistribution of power in the international system why after the 2008 Georgian Russian War Poland took steps to support NATO consolidation strengthen relations with the USA and expand its own military capabilities and how the Ukraine crisis affected Poland's security This overview is an invaluable resource for students of international and European studies security studies political science as well as for decision makers politicians EU staff and anyone interested in international politics in Central Europe

Progressive Corporate Governance for the 21st Century Lorraine Talbot, 2013-06-03 Progressive Corporate Governance for the 21st Century is a wide ranging and ambitious study of why corporate governance is the shape that it is and how it can be better The book sets out the emergence of shareholder primacy orientated corporate governance using a study of historical developments in the United Kingdom and the United States Talbot sees shareholder primacy as a political choice made by governments not a natural feature of the inevitable market She describes the periods of progressive corporate governance which governments promoted in the middle of the 20th century using a close examination of the theories of the company which then prevailed She critically examines the rise of neoliberal theories on the company and corporate governance and argues that they have had a negative and regressive impact on social and economic development In examining contemporary corporate governance she shows how regulatory styles as informed and described by prevailing regulatory theories enables neoliberal outcomes She illustrates how United Kingdom derived corporate governance codes have informed the corporate governance initiatives of European and global institutions From this she argues that neoliberalism has re entered ex command transition economies through those United Kingdom and OECD inspired corporate governance Codes over a decade after the earlier failed and destructive neoliberal prescriptions for transition had been rejected Throughout Talbot argues that shareholder primacy has socially regressive outcomes and firmly takes a stand against current initiatives to enhance shareholder voting in such issues as

director remuneration The book concludes with a series of proposals to recalibrate the power between those involved in company activity shareholders directors and employees so that the public company can begin to work for the public and not shareholders

International Trade and Restructuring in Eastern Europe János Gács, 2013-11-11 János Gács and Georg Winekler In recognition of the key position of international trade in the transition and the need for concentrated discussions of topical trade issues the International Institute for Applied Systems Analysis IIASA organized an international conference on International Trade and Restructuring in Eastern Europe which took place in Laxenburg Austria on 19 and 21 November 1992 The Austrian National Bank joined IIASA to co sponsor the event Participants of the conference were experts of international economics and trade policy from East and West policy makers and representatives of international organizations like the IMF the Commission of the European Communities the OECD and the European Bank for Reconstruction and Development EBRD The papers prepared for the event and the lively discussions during the conference itself prove that the topics are intellectually challenging and timely for policy makers It has widely been recognized that international economic relations play a crucial role in the transition of countries of Central and Eastern Europe The scope speed and success of the efforts to transform the formerly centrally planned economies to market economies have increasingly become dependent on the pattern these countries have in their relation to the rest of the world Transition comprises three major processes macro stabilization marketization and restructuring The success of these three hinges to a large extent on the response of these economies to the new conditions set by international trade and exchange regimes

Europe's Growth Champion Marcin Piatkowski, 2025-09-30 What makes countries rich What makes countries poor Europe's Growth Champion Insights from the Economic Rise of Poland seeks to answer these questions and many more through a study of one of the biggest and least heard about economic success stories Over the last thirty years Poland has transitioned from a perennially backward poor and peripheral country to unexpectedly join the ranks of the world's high income countries Europe's Growth Champion is about the lessons learned from Poland's remarkable experience the conditions that keep countries poor and the challenges that countries need to face in order to grow It defines a new growth model that Poland and its Eastern European peers need to adopt in order to continue to grow and catch up with their Western counterparts Europe's Growth Champion emphasizes the importance of the fundamental sources of growth institutions culture ideas and leaders in economic development It argues that a shift from an extractive society where the few rule for the benefit of the few to an inclusive society where many rule for the benefit of many was the key to Poland's success It asserts that a newly emerged inclusive society will support further convergence of Poland and the rest of Central and Eastern Europe with the West and help to sustain the region's Golden Age It also acknowledges the future challenges that Poland faces and that moving to the core of the European economy will require further reforms and changes in Poland's developmental character This new edition analyses what has changed in the global and Polish economy since 2018 In particular it discusses the effects of the

COVID 19 pandemic climate change Russia's aggression against Ukraine and the ongoing restructuring of the global value chains It also diagnoses new opportunities and challenges for the future of Poland
