career it came to symbolize what could be achieved with a modern monoplane fighter aircraft instilling fear and respect into Allied pilots wherever it was encountered 35 000 of the ubiquitous Messerschmitts were eventually built making it the most produced fighter in history This is the first Air Vanguard volume to cover the Bf 109 detailing models A D Featuring stunning aerial photos the title explores in depth the technical characteristics and combat performance of the early Bf 109s including their combat debut in the Spanish Civil War their employment in the invasion of Poland and showing how the type became one of the most famous names in aviation history

Day Fighter Aces of the Luftwaffe Jeremy Dixon,2023-09-30 Dixon's work should be a must read to the aviation historian who specializes in the Luftwaffe or the early European air war Taken in small digestible portions the reader will come away with a much deeper understanding of these aviators The Journal of the Air Force Historical Foundation The German fighter pilots of the Second World War are among the undoubted heroes of the conflict their reputation for flying skill single minded determination and solitary courage hasn't diminished or been clouded by controversy over the years Their daring and commitment often displayed when towards the end of the war they were fighting against the odds matches that of any of the other air forces they fought against This detailed highly illustrated reference book which covers the exploits of the most famous and successful individuals among them shows just how effective and undaunted they were All the Luftwaffe day fighter pilots who flew single seater aircraft and won the Knight's Cross during the war are featured The entries give information about their early lives and pre war careers and record how many aircraft they shot down the type of aircraft involved and where and when the combat took place Included are accounts of particular actions which led to the award of the Knight's Cross and the fate of these remarkable pilots later in the war and in the post war world is described too Jeremy Dixon's book will be fascinating reading and reference for anyone who is interested in the aviation history of the Second World War

Polikarpov's Biplane Fighters Yefim Gordon,Keith Dexter,2002 The Soviet Polikarpov design bureau is perhaps best known for the I 16 fighter the world's first monoplane fighter to have a retractable undercarriage This aircraft is covered in Volume 3 of the Red Star series This book explores the development of Polikarpov's fighting biplanes from the 2I N1 to his first aircraft to see production to the I 3 and the I 5 created while the designer was in prison This design paved the way for the I 15 which earned fame as the Chato during the Spanish Civil War and also saw action against the Japanese and the I 15bis which owed its existence mainly to Soviet Air Force's prejudice against gull wings and the famous I 153 Chaika a gull wing biplane with retractable landing gear Experimental versions of this aircraft are also included in the book A detailed account of the combat role of these aircraft is given as are structural descriptions The book also includes details of the ill starred I 190 which was to have superseded the Chaika and of privately owned I 15bis and I 153s which have been restored to airworthy condition
