Russia's Ekranoplans Sergey Kommissarov, Sergey Komissarov, 2002 81 2 x 11 128 pgs 150 color b w photos For decades the Soviet Union and now Russia have held leading positions in the development of a special class of vehicles that are neither aircraft nor ships or both at once Known as wing in ground effect WIGE craft or by their Russian name of ekranoplan these vehicles combined the best of both worlds operating on the borderline between the sky and the sea offering the speed of an aircraft coupled with better operating economics and the ability to operate pretty much anywhere on the world s waterways As such they promptly attracted the attention of the military and thus have been veiled in secrecy until recently The book describes in detail the many series of WIGE vehicles developed by various design bureaus including the Orlyonok the only ekranoplan to see squadron service the missile armed Loon and the famous and awesome KM or Caspian Sea Monster which first attracted the attention of the West to these developments

Antonov Jet Twins E. Gordon, Yefim Gordon, Dmitrii Komissarov, 2005 The need to provide a state of the art jet successor to the ubiquitous An 26 led Antonov to develop a twin turbo fan tactical airlifter the An 72 which made use of the Coanda effect improving wing lift and field performance dramatically The prototype flew in 1977 but it was not until the mid 1980s that production began in Khar kov The baseline military airlifter soon spawned a wide selection of derivatives First was the An 74 originally conceived as a specialized version for Arctic and Antarctic support it entered production as an ordinary civil transport Concerted efforts by the Antonov OKB to enhance the capabilities of the An 72 An 74 family led to the development of the An 72P armed border patrol version the convertible cargo passenger An 74T and An 74TK the An 74S flying hospital and the radically redesigned An 74TK 300 with engines on underwing pylons an arrangement which improved the all important economic efficiency The most intriguing An 72 derivative was the unorthodox An 71 AEW aircraft originally meant for shipboard operations it was prevented from entering production by the political and economic situation

King of Fighters -- Nikolay Polikarpov and His Aircraft Designs Mikhail Maslov, 2021-01-19 In the century long history of the conquest of the sky there have been a number of outstanding personalities Among them is the name of designer Nikolay Polikarpov 1892 1944 which is inseparably associated with the best achievements of the Russian and Soviet aviation His practical activity in the aircraft industry began upon graduation from the Petersburg Polytechnic Institute in 1916 Aged 25 Polikarpov was sent to the Russo Baltic Wagon Factory RBWF where the four engined Ilya Muromets bombers designed by Igor Sikorsky were being built at that time Later beginning from August 1918 he worked in Moscow at the Dux aircraft factory For several years he was engaged in improving products manufactured by the factory and upgrading production aircraft to accommodate the available engines equipment and materials From 1922 Polikarpov focused his attention on fighter aircraft creation of which was a priority for him during

the following years The first of them was the IL 400 monoplane designated I 1 by the Air Force The monoplane was followed by biplanes including the 2I N1 1925 the I 3 1927 the D 2 1928 and the I 6 1929 It was specialization in fighter aircraft which from then on became his mission in life At the peak of his career as a designer Polikarpov was informally styled the King of Fighters which was quite in line with the level of his merits and achievements In the 1930 s the TsKB 3 I 15 and TsKB 12 I 16 fighters were designed under Polikarpov s supervision These aircraft were the designer s undoubtable success They also were the main combat fighters in service with the Red Army Air Force For the creation of the I 15 and the I 16 fighters Polikarpov was awarded the Order of Lenin in 1935 and the Order of the Red Star a year later In the 1930 s Nikolay Polikarpov devised a lot of aircraft of various designs the majority of which can be described as advanced and innovative In 1940 Polikarpov was granted the degree of the Doctor of Engineering and the title of the Chief Designer of the highest category In the same year he was awarded the title of the Hero of Socialist Labor A year later he became a recipient of the Stalin Prize The gifted Soviet engineer was destined to live only 52 years On 30 July 1944 Nikolay Polikarpov died of a rapidly evolving oncological disease To venerate his memory the U 2 trainer has ever since been designated the Po 2 Polikarpov 2 The book which is presented to the reader describes all Polikarpov s original projects both those put into reality and unimplemented ones It took the author many years to prepare for the creation of the book The author studied materials on the respective topics in all Russian archives and made use of remembrances of Polikarpov s contemporaries and publications by other researchers For purposes of clarity and in order to facilitate publication the author split the book on Nikolai Polikarpov s aircraft into two parts the Biplane Era and the Monoplane Era Indeed during the designer s activity from 1918 through to 1932 he devoted himself predominantly to creating biplanes For the 1920 s the biplanes were a preferable option they were more common more reliable better studied and even more desirable for the Red Army Air Force The first design of the IL 400 I 1 monoplane fighter appeared as early as 1923 however it was through its novelty and unpredictability that the aircraft failed to achieve the deserved success It should be noted that the U 2 Po 2 and the R 5 biplanes which were created during that period became one of the best Polikarpov aircraft and brought him recognition as a reputed designer In the 1930 s Nikolai Polikarpov s activity reached its pinnacle It was during that period that he created his advanced monoplanes such as the I 16 the I 17 the VIT 2 and others He continued his fruitful and quite successful activity in the area of creating modern aircraft during the war of 1941 45 as well

Polikarpov I-15, I-16 and I-153 Aces Mikhail Maslov, 2013-02-20 From the heat of Spain to the frozen wastelands of Finland this book reveals the combat stories of the pilots who flew the Polikarpov fighters from 1936 until the end of World War II The I 15 I 16 and I 153 fighters were the world s first mass produced fighters Some 17 000 Polikarpovs had been manufactured by the time production ceased in 1941 They served with the Republicans in the Spain the Chinese against Japan in 1937 38 and the Soviets against both Japan in the Nomonhan Incident and Finland during the Winter War By 1941 more than 20 Soviet pilots had made ace in Polikarpovs and many more attained

that status during the first months of the German invasion Though thoroughly outclassed this book shows how the Polikarpov was the backbone of the Soviet air force during the early months of the war in the east and continued to serve as training aircraft and as frontline fighters some right through to 1945 *Red Star Airacobra* Evgeniy Mariinskiy,2006 Evgeniy Mariinskiy a Soviet fighter ace and Hero of the Soviet Union shot down 20 enemy planes in aerial combat over the Eastern Front between 1943 and 1945 He frequently engaged enemy fighters and bombers shot down many but was himself shot down several times This is his extraordinary story His vivid inside view of the ruthless war in the air on the Eastern Front gives a rare insight into the reality of fighting and tactics of the Red Army Air Force In his own words and with a remarkable clarity of recall Evgeniy Mariinskiy describes what combat was like in the air face to face with a skilled deadly and increasingly desperate enemy The reader can follow his career from an unskilled novice who has just arrived at his regiment through to him becoming an ace and Hero of the Soviet Union under the leadership of experienced commanders The terrifying moments of action engagements with enemy fighters forced landings nervous strain before attacks loss of comrades and everyday life of pilots all these aspects of a Soviet fighter pilot s experience during the Great Patriotic War are brought dramatically to life in his memoirs In his memoirs Mariinskiy describes tactics which enabled him to have an upper hand in dogfights against experienced German pilots The grand strategy of the campaigns across the Eastern Front is less important here than the sequence of engagements that were the firsthand experience of the author It is this close up view of combat that makes Evgeniy Mariinskiy s reminiscences of such value Key sales points A gripping and superbly readable memoir of the war in the air over the Eastern Front 1943 45 penned by a Hero of the Soviet Union and air ace credited with 20 victories Covers the author s full aviation career including training and his initial experiences over the front as well as his increasingly successful combat with a skilled enemy Evgeniy Mariinskiy served with the 129th Guards Fighter Regiment 1943 45 undertaking 210 sorties participating in 60 air to air engagements and shooting down 20 enemy aircraft In 1945 he was awarded the Gold Star of Hero of the Soviet Union *Red Star Against The Swastika* Vasily Emelianenko,2005-12-01 This is the extraordinary story of Vasily B Emelianenko the veteran pilot of one of the Soviet Union s most contradictory planes of WWII the I1 2 This heavily armoured aircraft was practically unrivalled in terms of fire power but it was slow to manoeuvre and an easy target for fighters I1 2 had to attack enemy flak columns at extremely low altitudes which led to enormous tolls both in equipment and personnel **Red Star Airacobra** Evgenii Mariinskii,2006 Evgeniy Mariinskiy a Soviet fighter ace and Hero of the Soviet Union shot down 20 enemy planes in aerial combat over the Eastern Front between 1943 and 1945 He frequently engaged enemy fighters and bombers shot down many but was himself shot down several times This is his extraordinary story His vivid inside view of the ruthless war in the air on the Eastern Front gives a rare insight into the reality of fighting and tactics of the Red Army Air Force In his own words and with a remarkable clarity of recall Evgeniy Mariinskiy describes what combat was like in the air face to face with
