Political concepts and time Javier Fernández Sebastián ,Hans Erich Bodeker ,Pim den Boer ,Peter Burke ,Giuseppe Duso ,Alexandre Escudier ,João Feres Júnior ,Michael Freeden ,Jacques Guilhaumou ,Jörn

Leonhard,Christian Meier ,Faustino Oncina ,Kari Palonen ,Elías José Palti ,2011-08-10 The essays compiled in this volume written by distinguished experts present a broad panorama of the most important methodological challenges faced by conceptual history today as well as some more specific contributions regarding the temporal dimension of certain modern concepts At a moment when time and concepts and political concepts in particular are no longer obvious and taken for granted but have themselves become historical matter this book does not limit itself to an updating of the state of the art it also offers very useful lessons for the development of future research into this field

The impact of feminism on political concepts and debates Georgina Blakeley, Valerie Bryson, 2024-06-04 Many feminists have engaged with the man made concepts and approaches of traditional political analysis to produce an increasingly sophisticated and wide ranging body of thought The starting point of this book is the belief that such work is not simply something for the girls rather it has profound and complex implications without which our understanding of political processes and ideas would be impoverished This book provides an accessible overview and assessment of the impact of recent feminism by bringing together leading feminist and pro feminist political theorists and analysts to focus on key concepts such as rationality citizenship democracy and democratisation development and empowerment Each chapter takes a mainstream concept and examines both the critical debates around it and feminist reactions critiques It then analyses the significance and implications of feminism for the concept considers whether it can simply be extended to include women or whether it should be radically transformed or even abandoned and assesses whether feminist input has become part of the mainstream debate or remains marginalised

Political Concepts Adi M. Ophir, Ann Laura Stoler, 2018-01-02 Deciding what is and what is not political is a fraught perhaps intractably opaque matter Just who decides the question on what grounds to what ends these seem like properly political questions themselves Deciding what is political and what is not can serve to contain and restrain struggles make existing power relations at once self evident and opaque and blur the possibility of reimagining them differently Political

Concepts seeks to revive our common political vocabulary both everyday and academic and to do so critically Its entries take the form of essays in which each contributor presents her or his own original reflection on a concept posed in the traditional Socratic question format What is X and asks what sort of work a rethinking of that concept can do for us now The explicitness of a radical questioning of this kind gives authors both the freedom and the authority to engage intervene in critique and transform the conceptual terrain they have inherited Each entry either implicitly or explicitly attempts to re open the question What is political thinking Each is an effort to reinvent political writing In this setting the political as such may be understood as a property a field of interest a dimension of human existence a set of practices or a kind of event Political Concepts does not stand upon a decided concept of the political but returns in practice and in concern to the question What is the political by submitting the question to a field of plural contention The concepts collected in Political Concepts are Arche Stathis Gourgouris Blood Gil Anidjar Colony Ann Laura Stoler Concept Adi Ophir Constituent Power Andreas Kalyvas Development Gayatri Spivak Exploitation tienne Balibar Federation Jean Cohen Identity Akeel Bilgrami Rule of Law J M Bernstein Sexual Difference Joan Copjec and Translation Jacques Lezra Freedom, Power and Political Morality I. Carter, M. Ricciardi, 2001-03-13 This collection of new essays on political and legal theory concentrates on themes dealt with in the work of Felix Oppenheim including fundamental political and legal concepts and their implications for the scope of morality in politics and international relations Among the issues addressed are the relationship between empirical and normative definitions of freedom power and interests whether governments are free to act against the national interest and whether they can ever be morally obliged to do so **Decolonising Political Concepts** Valentin Clavé-Mercier, Marie Wuth, 2023-10-24 This book presents a transdisciplinary and transnational challenge to the enduring colonality of political concepts discussing the need to decolonise both their theoretical constructions as well as their substantive translations into practices Despite the acclaimed twentieth century decolonisation waves colonality still remains in subtle and obvious practices in visible and invisible mechanisms of power and in the privileging of certain knowledges and the dismissing of others Decolonising Political Concepts critically addresses the role political concepts play in the continuing legacies of colonialism and ongoing colonality This book building on postcolonial and decolonial thinkers and ideas demonstrates how concepts may be used as oppressing political and epistemological tools By presenting efforts to decolonise political concepts the book signals the potential for genuinely postcolonial academic and political contexts Bringing together scholars from different disciplines and engaging with a wide array of geographical contexts the chapters examine concepts such as agency violence freedom or sovereignty This book enables readers to critically engage with concepts used in political discourse and allows them to reflect on their impact and alternatives It will appeal to graduate students and scholars from international relations social sciences or philosophy as well as to socio political actors engaged in decolonisation agendas The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution

The Terms of Political Discourse William Connolly,1993-12-08

Power Interest Freedom Responsibility Connolly explores and confronts sets of interrelated concepts such as these concepts whose meanings are persistently subject to debate in the context of political discourse He illuminates the role played in political life and political enquiry by such conceptual contests And in staking out his own position in these contests he seeks both to politicize broad areas of social life and to weave norms of responsibility more thoroughly into politics

Varieties of Feminist Liberalism Amy R. Baehr,2004-04-05 Over the past thirty years western political philosophy has been enriched by a renewed interest in liberalism and by the development of feminism Although liberalism is one of the important historical roots of feminism many contemporary feminist political philosophers reject liberal political theory Indeed that liberalism and feminism are incompatible has been the dominant view among feminist scholars over the past 30 years *Varieties of Feminist Liberalism* is a groundbreaking collection that examines the relationship between these two rich normative traditions The essays in this volume present versions of feminism that are explicitly liberal or versions of liberalism that are explicitly feminist By bringing together some of the most respected and well known scholars in mainstream political philosophy today Amy R Baehr challenges the reader to reconsider the dominant view that liberalism and feminism are incompatible This long overdue volume is the first to bring together papers by feminist liberals and to aim explicitly at reconciling feminism and liberalism
