Political Economy Of International Financial Crisis Interest Groups Ideologies And Institutions:

The Political Economy of International Financial Crisis Shale Asher Horowitz, Uk Heo, 2001 The world financial crisis of 1997-99 was the most important international economic event since the oil shocks of the 1970s and the associated debt crisis of the 1980s What were its political causes and consequences In particular how did interest group coalitions and political institutions affect pre crisis economic policies and post crisis responses This book focuses on how policymaking coalitions are formed and how political institutions mediate the pressure of rival coalitions This approach is applied to 13 countries drawn from the main crisis affected regions of the world economy East Asia Southeast Asia Latin America and Eastern Europe International Monetary Power David M. Andrews, 2006 This book provides a thorough overview of how money is used as a tool to achieve international political aims Handbook of the International Political Economy of Monetary Relations Thomas Oatley, W. Kindred Winecoff, 2014-06-27 This extensive Handbook provides an in depth exploration of the political economy dynamics associated with the international monetary and financial systems Leading experts offer a fresh take on research into the interaction between system structure and The Political Economy of International Financial Crisis : Interest Groups, Ideologies, and Institutions Shale Horowitz, 2001 *The Political Economy of Integration* Jeffrey W. Cason, 2010-10-04 This book assesses South America's most ambitious attempt at economic integration Mercosur It explains the main and inherent weaknesses of the integration effort through explicit comparison with the European experience with integration Jeffrey Cason argues that the three main reasons for Mercosur's limited success are weak domestic political institutions in the member countries vulnerability in the global political economy and a serious imbalance in the economic and political weight of the member countries In addition to providing this overarching explanation for Mercosur's limitations the book tells the story of Mercosur's genesis development and frustrations This book provides both an explanatory framework for understanding Mercosur and a story It considers how Mercosur emerged why it was greeted with great enthusiasm and huge trade growth and how it hit stumbling blocks as it sought to be more than it was capable of being The book also focuses on how and why developing countries are inherently limited in any economic integration project The Political Economy of Developmental States in East Asia Tian He, 2020-11-13 This book explores the variations in the transformation of the Asian developmental state in South Korea Singapore and Taiwan Based on an original theory the author argues that these variations are influenced by two factors industrial structure and democratic transition both of which are shaped by the strategic calculations of the ruling elites to maintain power The theory concerns two concurrent political processes during the state's development process namely the emergence of economic interest groups with varying levels of policy constraints on the state and the process of democratic transition driven by the rise of the middle class The book will appeal to students and researchers in the fields of Asian politics development studies political economy and comparative politics **Regulatory Cycles: Revisiting the Political Economy of Financial Crises** Jihad

Dagher,2018-01-15 Financial crises are traditionally analyzed as purely economic phenomena The political economy of financial booms and busts remains both under emphasized and limited to isolated episodes This paper examines the political economy of financial policy during ten of the most infamous financial booms and busts since the 18th century and presents consistent evidence of pro cyclical regulatory policies by governments Financial booms and risk taking during these episodes were often amplified by political regulatory stimuli credit subsidies and an increasing light touch approach to financial supervision The regulatory backlash that ensues from financial crises can only be understood in the context of the deep political ramifications of these crises Post crisis regulations do not always survive the following boom The interplay between politics and financial policy over these cycles deserves further attention History suggests that politics can be the undoing of macro prudential regulations

Moments of Truth Francisco Panizza,George Philip,2013-11-07 The current financial and sovereign debt crisis of the European Union and the United States can be regarded as the most recent of a wave of financial and sovereign debt crises that have affected different regions of the world over the past quarter century While there is a large and growing body of literature on the economic aspects of financial crises its political elements remain surprisingly under studied Moments of Truth The Politics of Financial Crises in Comparative Perspective fills this gap in the literature by looking at the political repercussions and policy implications of financial crises in comparative perspective using case studies in Latin America Korea and Russia as well as the contemporary crises in the US and in key European countries Contributors to this volume look at the crises as critical junctures that generate high levels of uncertainty while calling for decisive action The chapters emphasize structural or agency based explanations and give relevance to the role of ideas interests and institutions in explaining different outcomes The questions addressed by the case studies include how the crises were defined by key actors the range of political and policy options available to deal with their impact the role of ideas in policy shifts how political and economic actors redefine their interests in contexts of uncertainty how political institutions mediate reactions to the crises what explains the choice of a certain option over other alternatives and whether the crisis has so far resulted in significant political and policy changes or in incremental adjustments to the status quo The first book to comparatively analyze the political dimensions of financial crises across different global regions Moments of Truth will be highly significant for any scholars interested in the contemporary debate on financial crises

Economic Crises and the Breakdown of Authoritarian Regimes Thomas B. Pepinsky,2009-08-17 Why do some authoritarian regimes topple during financial crises while others steer through financial crises relatively unscathed In this book Thomas B Pepinsky uses the experiences of Indonesia and Malaysia and the analytical tools of open economy macroeconomics to answer this question Focusing on the economic interests of authoritarian regimes supporters Pepinsky shows that differences in cross border asset specificity produce dramatically different outcomes in regimes facing financial crises When asset specificity divides supporters as in Indonesia they desire mutually incompatible adjustment policies yielding incoherent adjustment policy followed by regime

collapse When coalitions are not divided by asset specificity as in Malaysia regimes adopt radical adjustment measures that enable them to survive financial crises Combining rich qualitative evidence from Southeast Asia with cross national time series data and comparative case studies of Latin American autocracies Pepinsky reveals the power of coalitions and capital mobility to explain how financial crises produce regime change The Palgrave Encyclopedia of Imperialism and Anti-Imperialism Immanuel Ness,Zak Cope,2016-04-29 The Palgrave Encyclopedia Imperialism and Anti Imperialism objectively presents the prominent themes epochal events theoretical explanations and historical accounts of imperialism from 1776 to the present It is the most historically and academically comprehensive examination of the subject to date
