Political Psychology Prof. Dr. Bilal Semih Bozdemir, While fear motivates immediate action in response to specific threats anxiety often manifests as a chronic concern that drives individuals to seek answers and stability through political engagement High levels of anxiety can lead to increased

information seeking behavior prompting individuals to research candidates and policies in search of assurance. Anxious individuals may gravitate towards political figures who embody calmness or assertiveness interpreting such traits as signals of competence and reliability. As a result during election cycles characterized by economic instability or social upheaval people may prioritize candidates who convey certainty and effective management capabilities over those who communicate ambitious but unrealistic promises. Intriguingly anxiety can produce conflicting effects on political decision making. While it compels individuals to become more informed it can also lead to avoidance behavior when faced with overwhelming information. Voters may disengage from the political process or gravitate towards simplistic narratives or authoritarian candidates who promise to alleviate their anxiety. Hence understanding the paradoxical nature of anxiety is critical for dissecting its influence on political behavior.

Introduction to Political Psychology Prof. Dr. Bilal Semih Bozdemir, Schemas cognitive structures that organize knowledge and guide information processing are fundamental in shaping political judgments They consist of preconceived notions about political entities including parties ideologies and individuals that affect how information is perceived and interpreted For instance an individual with a schema that associates an opposing political party with corruption may filter new information through this lens leading to an automatic dismissal or reinterpretation of positive news about that party The influence of schemas is further compounded by the social context in which individuals operate Group norms and values often dictate what is deemed acceptable within a political discourse This social interdependence affects not only personal judgments but also broader political ideologies that dominate public discussions
