Political Science Multimedia Manager:

Using Computer Science in Media Careers Don Rauf, 2019-07-15 Technology has dramatically changed the world of media. People stream programs on demand to their televisions, they read books on handheld tablets, they get their news via the Internet and listen to podcasts on their mobile phones. This authoritative book gives an overview of media careers that depend on a knowledge of computer science, including special effects designers, social media managers, and the programmers and developers who work on everything from satellite radio to web-based videos. Those passionate about media careers learn about the skills and education needed to pursue these careers and the rewarding opportunities that may be in their future.

Power and Politics in the Media Robert X. Browning, 2023-12-15 *Power and Politics in the Media: The Year in C-SPAN Archives Research Volume 9* features articles from multiple disciplines that use the C-SPAN Video Library to explore recent controversies in American politics. Topics covered include Supreme Court nominations, Supreme Court oral arguments, rhetoric on disasters and COVID-19, and the effect of clothing on the approval of women in power. What unites these topics is the unique use of the video record of C-SPAN to explore the intersections of politics, power, rhetoric, and the media in the contemporary United States. Written in accessible prose, this volume showcases some of the most pressing issues today in a variety of political and communication issues while demonstrating video research methodologies.

Social Media, Parties, and Political Inequalities Kristof Jacobs, Niels Spierings, 2016-01-05 This book examines how social media have transformed politics in established democracies. Specifically, the authors examine the influence of the unique qualities of social media on the power balance between and within parties. They present a general theory as well as an in-depth case study of the Netherlands and compare it to the US and European democracies. The authors show how and why social media's introduction leads to equalization for some and normalization for others. Additional to national politics, Jacobs and Spierings investigate often overlooked topics such as local and European politics and the impact on women and ethnic minorities.

Presidential Polls And The News Media Paul J. Lavrakas, Michael Traugott, Peter V. Miller, 2019-06-26 Most news media are data-rich but analysis-poor when it comes to election polling. Since election polls clearly have the power to influence campaigns and election post-mortems, it is important that spin not take precedence over significance in the reporting of poll results. In this volume, experts in the media and in academe challenge the conventional approaches that most news media take in their poll-based campaign coverage. The book reports new research findings on news coverage of recent presidential elections and provides a myriad of examples of how journalists and news media executives can improve their analysis of poll data, thereby better serving our political processes.

The Power and Limits of NGOs Sarah Elizabeth Mendelson, John K. Glenn, 2002 This text assesses the impact of non-governmental organizations' efforts to build democratic institutions in Central and Eastern Europe and Eurasia. Case studies provide a portrait of the mechanisms by which ideas commonly associated with democratic states have evolved in formerly communist states.

Media and Democracy in the Middle

East Nael Jebril, Mohammed-Ali Abunajela, 2023-09-20 This edited volume examines the current challenges to media freedom and democratisation in the Middle East The book revisits the relationship between media consumption and activism in the region providing thorough analyses on the appropriation of social media for political engagement Since the outburst and spread of what was known as the Arab Uprisings in 2010 the political and media landscapes in the Middle East region have dramatically changed The initial hope for democratic change and governance quality improvements has faded as several regimes in the Middle East have strengthened their repressive tactics toward voices deemed critical of governments practices including journalists bloggers and activists The crumbling Arab media scene has also reached an abysmal low with little to no independence and public perception of basic freedoms in the region has significantly dropped as has trust in media and government institutions This book examines current challenges to media freedom political participation and democratisation in the region while reassessing the dynamic relationship between media use and political engagement amidst a complex political environment accompanied by a rapidly changing digital media landscape This book's relevance will appeal to varied audiences such as scholars and students of journalism communication political science and Middle Eastern studies It will also prove to be an invaluable resource for organisations dedicated to the research of political communication media freedom and use patterns of nontraditional or new media
