Political Space Reading The Global Through Clayoquot Sound:

A Political Space Warren Magnusson, Karena Shaw, 2002 **A Political Space** Warren Magnusson, Karena Shaw, 2002-12-09 An innovative look at the convergence of global trends and local struggles in this out of the way place Clayoquot Sound on the remote outer coast of Vancouver Island might seem to be at the periphery of contemporary power and authority Yet as the disputed land of Native peoples and the contentious site of corporate logging in one of the world's last remaining temperate rain forests it is squarely in the middle of global politics A Political Space develops a new way of making sense of the rapidly changing character of political life in our day and reveals the political problems and possibilities inherent in the convergence of the global and the local so dramatically enacted in Clayoquot Sound **A Political Space** Warren Magnusson, 2002 The authors develop a new way of making sense of the rapidly changing character of political life in our day revealing the political problems and possibilities inherent in the convergence of the global and the local so dramatically enacted in Clayoquot Sound **An Introduction to Political Geography** Martin Jones, Rhys Jones, Michael Woods, Mark Whitehead, Deborah Dixon, Matthew Hannah, 2014-11-13 An Introduction to Political Geography continues to provide a broad based introduction to contemporary political geography for students following undergraduate degree courses in geography and related subjects The text explores the full breadth of contemporary political geography covering not only traditional concerns such as the state geopolitics electoral geography and nationalism but also increasing important areas at the cutting edge of political geography research including globalization the geographies of regulation and governance geographies of policy formulation and delivery and themes at the intersection of political and cultural geography including the politics of place consumption landscapes of power citizenship identity politics and geographies of mobilization and resistance This second edition builds on the strengths of the first The main changes and enhancements are four new chapters on political geographies of globalization geographies of empire political geography and the environment and geopolitics and critical geopolitics significant updating and revision of the existing chapters to discuss key developments drawing on recent academic contributions and political events new case studies drawing on an increasing number of international and global examples additional boxes for key concepts and an enlarged glossary As with the first edition extensive use is made of case study examples illustrations explanatory boxes guides to further reading and a glossary of key terms to present the material in an easily accessible manner Through employment of these techniques this book introduces students to contributions from a range of social and political theories in the context of empirical case study examples By providing a basic introduction to such concepts and pointing to pathways into more specialist material this book serves both as a core text for first and second year courses in political geography and as a resource alongside supplementary textbooks for more specialist third year courses **The Oxford Handbook of Food Ethics** Anne Barnhill, Tyler Doggett, Mark Budolfson, 2018-01-08 The handbook is a partial survey of multiple areas of food ethics conventional agriculture and

alternatives to it animals consumption ethics food justice food workers food politics and policy gender body image and healthy eating and food culture and identity **From Kyoto to the Town Hall** Anders Biel, Lennart J. Lundqvist, 2013

International agreements such as the Kyoto Protocol EU regulation and country specific national climate policies offer some hope of addressing climate change But all too often implementation of these high level objectives is derailed at the sub national local and perhaps most important individual level by a variety of structural policy and perceived barriers that result in a failure of effective action Drawing on original research from Sweden a world leader in effective environmental solutions this volume examines the difficulties of aligning climate policy from international to national and sub national levels The authors address the full range of barriers and complexities including governance structures the relationship between experts and the public political feasibility tax measures perceptions of fairness and self interest and the importance of environmental values Also covered are the roles and perceptions of organizations and professions the place of carbon free technologies such as wind power the relationship between national and EU regulations and the monumental challenge of governing the climate in a bordered and divided world This volume is a vital source of information for all those seeking to create effective coordinated responses to the challenge of climate change **Out of Line** R.B.J. Walker, 2015-08-27 A collection of essays on the politics of boundaries this book addresses a broad range of cases some geographical some legal and some involving less tangible practices of inclusion and exclusion The book begins by exploring the boundary between modern Western forms of international relations and their constitutive outsides Beyond this the author engages with relations between subjectivity and security security and nature social movements and a world politics as well as the politics of spatiotemporal dislocation Two chapters address the work of Thomas Hobbes and Max Weber as exemplary accounts of the relationship between boundaries and the constitution of modern forms of politics Each chapter speaks not only to the politics of specific boundary practices but also to the limits within which modern politics has been shaped in relation to claims about spatiality temporality sovereignty and subjectivity In this way the book draws attention to a pervasive account of a scalar order of higher and lower that has shaped more familiar distinctions between internality and externality Offering an analysis of the relation between concepts of internationalism imperialism and exceptionalism as well as the implications of spatiotemporal dislocation for claims about democracy the book links contemporary claims about the transformation of boundaries to various ways in which political life is said to be in crisis and in need of novel forms of critique Brought up to date by a new and extensive introductory essay and an assessment of the status of political judgement after 9 11 this book is essential reading for students and scholars of politics international relations political theory and political sociology Global Civil Society Gideon Baker, David Chandler, 2004-11-23 For many commentators global civil society is revolutionising our approach to global politics as new non state based and border free expressions of political community challenge territorial sovereignty as the exclusive basis for political community and identity This challenge from below to the nation state system is increasingly seen

as promising nothing less than a reconstruction or a re imagination of world politics itself Whether in terms of the democratisation of the institutions of global governance the spread of human rights across the world or the emergence of a global citizenry in a worldwide public sphere global civil society is understood by many to provide the agency necessary for these hoped for transformations Global Civil Society asks whether this idea is such a qualitatively new phenomenon after all whether the transformation of the nation state system is actually within its reach and what some of the drawbacks might be

Understanding Sustainable Development John Blewitt, 2017-12-22 A truly comprehensive introduction to the topic Understanding Sustainable Development is designed to give students on a wide range of courses an appreciation of the key concepts and theories of sustainable development Fully updated the third edition includes detailed coverage of the Sustainable Development Goals and their impact on global development Major challenges and topics are explored through a range of international case studies and media examples which maintain the global to local structure of the previous edition With an extensive website and pedagogy Understanding Sustainable Development is the most complete guide to the subject for course leaders undergraduates and postgraduates *Global Environmental Politics* Ronnie D. Lipschutz, 2003-07-30 Traditional views of global environmental politics take the structures and relations of international politics as a given Solutions to environmental problems then must be products of concession negotiation and inevitable compromise a world of top down planetary management Lipschutz challenges students to question these conventional approaches He argues that much light can be shed on global environmental degradation if we look beyond the politics of conflict and cooperation and explore environmental problems from their very roots Using a framework that accounts for the ontologies material conditions and power relations that structure global environmental problems Lipschutz is able to more effectively question attempts to clean up the globe and sustain the world's natural resources Throughout the text the author uses compelling cases to illustrate the effects of globalization and capitalism yet is careful to make the link between the local and the global to show how we as individuals are both consumers of goods and producers of pollution A powerful new approach How is the financing of a water system in Bolivia linked to long standing forestation practices in India Taking nothing for granted the root causes of major global environmental problems are exposed and subjected to rigorous analysis Lipschutz shows for instance how privatization operates in different global contexts with strikingly similar consequences In what ways are liberalism and realism actually two sides of the same coin Both make self interest of the individual and of the state key operating terms In a revealing comparison Lipschutz explores the limits of these dominant political models to effectively frame and solve environmental problems What kinds of political social and environmental practices bring about meaningful change By emphasizing the global impacts of local actions the text shows how attempts to control environmental problems may actually reproduce the very systems they are meant to ameliorate Combined with practical pedagogy Rich historical background helps contextualize contemporary issues Extensive suggested reading lists at the end of each chapter guide students to

further research while tables and figures elegantly show data and concepts The emphasis on assessing the root causes of global environmental problems and models encourages critical thinking Students are also encouraged to rethink their own role in the global environmental system and to get involved in effective forms of social change
