Incentives and Political Economy Jean-Jacques Laffont, 2000-03-30 Mainstream economics has recognized only recently the necessity to incorporate political constraints into economic analysis intended for policy advisors Incentives and Political Economy uses recent advances in contract theory to build a normative approach to constitutional design in economic environments The first part of the book remains in the tradition of benevolent constitutional design with complete contracting It treats politicians as informed supervisors and studies how the Constitution should control them in particular to avoid capture by interest groups Incentive theories for the separation of powers or systems of checks and balances are developed The second part of the book recognises the incompleteness of the constitutional contract which leaves discretion to the politicians selected by the electoral process Asymmetric information associates information rents with economic policies and the political game becomes a game of costly redistribution of those rents Professor Laffont investigates the trade offs between an inflexible constitution which leaves little discretion to politicians but sacrifices ex post efficiency and a constitution weighted towards ex post efficiency but also giving considerable discretion to politicians to pursue private agendas The final part of the book reconsiders the modeling of collusion given asymmetric information It proposes a new approach to characterizing incentives constraints for group behaviour when asymmetric information is non verifiable This provides a methodology to characterise the optimal constitutional response to activities of interest groups and to study the design of any institution in which group behavior is important

The Cultural Industries David Hesmondhalgh, 2007-04-25 The first edition of The Cultural Industries moved us irrevocably past the tired debates between political economy and cultural studies approaches This second edition takes on new and vital targets for example claims that the Internet is replacing television in everyday media consumption In the process Hesmondhalgh provides us with an essential toolkit for making critical sense of the digital media age and our places

Theodore Ely,1889 **National System of Political Economy** Friedrich List,2005-12-01 If we wish to remain true to the laws of logic and of the nature of things we must set the economy of individuals against the economy of societies and discriminate in respect to the latter between true political or national economy and cosmopolitan economy which originates in the assumption that all nations of the earth form but one society living in a perpetual state of peace from Chapter 11 Political and Cosmopolitical Economy One of the most prominent economic philosophers of the 19th century on a par with but espousing quite different thinking than Karl Marx and Adam Smith explores in the three volume National System of Political Economy a reasoned doctrine of national and pan national management of trade a global collaboration between government and business In Volume 2 he delineates his theory of supportive interconnectedness discussing everything from the value of the individual's ability to produce wealth to the edge established businesses have over new ones A close reading of this 1841 classic is an absolute necessity for anyone who hopes to understand world economic history of the last 150 years German economist and journalist FRIEDRICH LIST 1789 1846 served as professor of administration and politics at the University of Tübingen but was later jailed and later exiled to America for his political views His is also the author of Outlines of American Political Economy 1827 **Political Economy for the 21st Century** Charles J. Minsky,2015-04-15 This text provides an alternative to conventional economics drawing on the neoclassical and non neoclassical insights of Lester Thurow Robert Heilbroner Alice Amsden Barry Bluestone and 11 other prominent economists from America and England It is intended to provide productive analyses of several contemporary economic problems **The**

Journal of Political Economy ,1914 *The Science of Political Economy* Henry George,2006-10-01 Economist HENRY GEORGE 1839 1897 was at the height of his popularity in the 1880s and 1890s considered the third most famous American behind Mark Twain and Thomas Edison and his liberal philosophies on taxation copyrights poverty issues and more continue to influence progressive movements today This is George s grand overview of the science and philosophy of economics from the largest question what do we mean by civilization to the most specific what is the difference between money and wealth A replica of a manuscript written in the 1890s and unpublished at the author s death this remains a vital resource for anyone wishing to understand economics from a financial legal and even moral perspective ALSO FROM COSIMO George s Progress and Poverty The Condition of Labor A Perplexed Philosopher Protection or Free Trade and Social Problems **From Political Economy to Economics** Dimitris Milonakis,Ben Fine,2009-01-13 Economics has become a monolithic science variously described as formalistic and autistic with neoclassical orthodoxy reigning supreme So argue Dimitris Milonakis and Ben Fine in this new major work of critical recollection The authors show how economics was once rich diverse multidimensional and pluralistic and unravel the processes that lead to orthodoxy s current predicament The book details how political economy became economics through the desocialisation and the dehistoricisation of the dismal science accompanied by the separation of economics from the other social sciences especially economic history and sociology It is argued that recent attempts from within economics to address the social and the historical have failed to acknowledge long standing debates amongst economists historians and other social scientists This has resulted in an impoverished historical and social content within mainstream economics The book ranges over the shifting role of the historical and the social in economic theory the shifting boundaries between the economic and the non economic all within a methodological context Schools of thought and individuals that have been neglected or marginalised are treated in full including classical political economy and Marx the German and British historical schools American institutionalism Weber and Schumpeter and their programme of Social konomik and the Austrian school At the same time developments within the mainstream tradition from marginalism through Marshall and Keynes to general equilibrium theory are also scrutinised and the clashes between the various camps from the famous Methodenstreit to the fierce debates of the 1930s and beyond brought to the fore The prime rationale underpinning this account drawn from the past is to put the case for political economy back on the agenda This is done by treating economics as a social science once again rather than as a positive science as has been the inclination since the time of Jevons and Walras It involves transcending the boundaries of the social sciences but in a particular way that is in exactly the opposite direction now being taken by economics imperialism Drawing on the rich traditions of the past the reintroduction and full incorporation of the social and the historical into the main corpus of political economy will be possible in the future

One of the significant advantages of Political Economy books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes.
