Distortions to Agricultural Incentives in Africa Kym Anderson, William A. Masters, 2009-03-13 The vast majority of the world's poorest households depend on farming for their livelihoods. During the 1960s and 1970s, most developing countries imposed pro-urban and anti-agricultural policies, while many high-income countries restricted agricultural imports and subsidized their farmers. Both sets of policies inhibited economic growth and poverty alleviation in developing countries. Although progress has been made over the past two decades to reduce those policy biases, many trade and welfare-reducing price distortions remain between agriculture and other sectors and within the agricultural sector of both rich and poor countries. Comprehensive empirical studies of the disarray in world agricultural markets appeared approximately 20 years ago. Since then, the Organisation for Economic Co-operation and Development has provided estimates each year of market distortions in high-income countries, but there have been no comparable estimates for the world's developing countries. This volume is the third in a series; other volumes cover Asia, Europe's transition economies, and Latin America and the Caribbean, that not only fills that void for recent years but extends the estimates in a consistent and comparable way back in time and provides analytical narratives for scores of countries that shed light on the evolving nature and extent of policy interventions over the past half-century. *Distortions to Agricultural Incentives in Africa* provides an overview of the evolution of distortions to agricultural incentives caused by price and trade policies in the Arab Republic of Egypt plus 20 countries that account for about 90 percent of Sub-Saharan Africa's population, farm households, agricultural output, and overall GDP. Sectoral trade and exchange rate policies in the region have changed greatly since the 1950s, and there have been substantial reforms since the 1980s. Nonetheless, numerous price distortions in this region remain; others have been added in recent years, and there has also been some backsliding, such as in Zimbabwe. The new empirical indicators in these country studies provide a strong evidence-based foundation for assessing the successes and failures of the past and for evaluating policy options for the years ahead.

The Oxford Handbook of the African Sahel Leonardo A. Villalón, 2021-10-15 Long on the margins of both scholarly and policy concerns, the countries of the West African Sahel have recently attracted world attention primarily as a key battleground in the global war on terror. This book moves beyond this narrow focus, providing a multidimensional and interdisciplinary assessment of the region in all of its complexity. The focus is on the six countries at the heart of the Sahelian geographic space: Senegal, Mauritania, Mali, Burkina Faso, Niger, and Chad. Collectively, the chapters explore the commonalities and interconnections that link these countries and their fates, while also underscoring their diversity and the variations in their current realities. The Sahel today is at an important crossroads under multiple pressures of diverse kinds: environmental, political, demographic, and economic, as well as rapidly changing social and religious dynamics. It is also marked by striking dynamism and experimentation, drawing on a long history of innovation and cultural transfer. In many ways, the Sahel is today on the cutting edge of grand natural experiments exploring how humans will adapt to climate change, technological innovation, the global movement of populations, and the restructuring of world politics to urbanization, social change, and

rapid demographic growth and to inter religious contact The region is a weathervane on the front lines of the forces of global change In nine thematic sections the chapters in this book offer holistic analyses of the key forces shaping the region Including scholars based in Africa Europe and the United States the authors represent an exceptional breadth and depth of expertise on the Sahel

Finance, Development, and the IMF James M. Boughton, Domenico Lombardi, 2009-06-25 This book provides an assessment of the role of the International Monetary Fund in poor countries In recent years a large portion of the work of the IMF has focused on the economies of low income countries by aiming to create conditions conducive to poverty reduction and stable economic growth More than two fifths of the IMF s 185 members are low income countries and many others have substantial pockets of poverty in their populations Since economic development and the reduction of poverty are the most important economic challenges that these countries face how can the IMF best help them How can the imperative of macroeconomic and financial stability be reconciled with the requirements for sustained economic growth This volume brings together the research of leading economists political scientists and historians to suggest ways for the IMF to address these issues effectively
