Corps Rebecca Robbins Raines, 1996 Getting the Message Through the companion volume to Rebecca Robbins Raines Signal Corps traces the evolution of the corps from the appointment of the first signal officer on the eve of the Civil War through its stages of growth and change to its service in Operation DESERT SHIELD DESERT STORM Raines highlights not only the increasingly specialized nature of warfare and the rise of sophisticated communications technology but also such diverse missions as weather reporting and military aviation Information dominance in the form of superior communications is considered to be sine qua non to modern warfare As Raines ably shows the Signal Corps once considered by some Army officers to be of little or no military value and the communications it provides have become integral to all aspects of military operations on modern digitized battlefields The volume is an invaluable reference source for anyone interested in the institutional history of the branch Every American an Innovator Matthew Wisnioski, 2025-05-13 A landmark cultural

history that reveals how the relentless pursuit of innovation has transformed our society our institutions and our inner selves For half a century innovation served as a universal good in an age of fracture That consensus is cracking While the imperative to innovate for a better future continues to fuel systemic change around the world critics now assail innovation culture as an engine of inequality or accuse its do gooders of woke groupthink What happened Drawing on a decade of research Every American an Innovator by Matthew Wisnioski investigates how innovation a once obscure academic term became ingrained in our institutions our education and our beliefs about ourselves Wisnioski argues that innovation culture did not spring from the digital revolution nor can it be boiled down to heroic entrepreneurs or villainous capitalists Instead

he reveals the central role of a new class of experts in spreading toolkits and mindsets from the cornfields of 1940s Iowa to Silicon Valley tech giants today This group of engineers philosophers bureaucrats and business leaders posited that innovators were society s most important change agents and remade the nation in their image The innovation culture they built transcended partisan divisions and made strange bedfellows Wisnioski shows how Kennedy era policymakers inspired President Nixon s dream of a Nobel Prize for innovators how anti military professors built the first university incubators for entrepreneurs how radical feminists became millionaire consultants how demands for a rust belt manufacturing renaissance inspired theories of a global creative class how programs that encouraged girls and minority children to pursue innovative lives changed the nature of childhood play and why the innovation consensus is now in dispute **Biographies of**
