**Methodology for the Assessment of Innovative Nuclear Reactors and Fuel Cycles** International Atomic Energy Agency,2004 The main objectives of INPRO are to help ensure that nuclear energy is available to contribute towards fulfilling energy needs in the 21st century in a sustainable manner and bring together both technology holders and technology users to consider jointly the international and national actions required to achieve desired innovations in nuclear reactors and fuel cycles Within INPRO the future energy demand and supply was explored and several scenarios were identified The following requirement for energy supply will play a crucial role sustainability of the way the energy supply will be realized Fulfilling the growing need for energy in developing countries is also an important issue On the basis of scenarios for the next fifty years requirements for the different aspects of the future of nuclear energy systems such as those on economics environment safety waste proliferation resistance and

infrastructure have been identified as well as a methodology developed to assess innovative nuclear systems and fuel cycles. On the basis of this assessment the need for innovations in existing nuclear technology to be achieved via research development and demonstration can be defined. To facilitate the deployment of innovative nuclear systems different aspects of the infrastructure technical as well as institutional also have been reviewed and recommendations for changes are made to anticipate the main developments worldwide such as ongoing globalization.

### **Uranium Extraction Technology**

International Atomic Energy Agency, 1993. The purpose of this publication is to update and expand the first edition which was published in 1983 and to report on later advances in uranium ore processing. It includes background information about the principles of the unit operations used in uranium ore processing and summarizes the current state of the art. Extensive references provide sources for specific technological details.

### **Assessing the Need for Radiation Protection Measures in Work Involving Minerals and Raw Materials**

International Atomic Energy Agency, 2006. Provides information on the relevant industrial activities, materials and expected exposure levels in order to assist in identifying the activities for which regulatory controls are most likely to be needed and for such activities determining the most appropriate regulatory approach.
