Radiation Risks Risk Perception And Social Constructions:

Radiation Risk, Risk Perception and Social Constructions J. B. Reitan, G. N. Kelly, 1996 Risks in Technological Systems Göran Grimvall, Åke Holmgren, Per Jacobsson, Torbjörn Thedéen, 2009-11-03 Risks in Technological Systems is an interdisciplinary university textbook and a book for the educated reader on the risks of today's society. In order to understand and analyze risks associated with the engineering systems on which modern society relies, other concerns have to be addressed besides technical aspects. In contrast to many academic textbooks dealing with technological risks, this book has a unique interdisciplinary character that presents technological risks in their own context. Twenty-four scientists have come together to present their views on risks in technological systems. Their scientific disciplines cover not only engineering, economics, and medicine but also history, psychology, literature, and philosophy. Taken together, these contributions provide a broad but accurate interdisciplinary introduction to a field of increasing global interest as well as rich opportunities to achieve in-depth knowledge of the subject. The Social and Cultural Construction of Risk B.B. Johnson, V.T. Covello, 2012-12-06 The Social and Cultural Construction of Risk: Issues, Methods, and Case Studies. Vincent T. Covello and Branden B. Johnson. Risks to health, safety, and the environment abound in the world, and people cope as best they can. But before action can be taken to control, reduce, or eliminate these risks, decisions must be made about which risks are important and which risks can safely be ignored. The challenge for decision makers is that consensus on these matters is often lacking. Risks believed by some individuals and groups to be tolerable or acceptable, such as the risks of nuclear power or industrial pollutants, are intolerable and unacceptable to others. This book addresses this issue by exploring how particular technological risks come to be selected for societal attention and action. Each section of the volume examines from a different perspective how individuals, groups, communities, and societies decide what is risky, how risky it is, and what should be done. The writing of this book was inspired by another book, Risk and Culture: An Essay on the Selection of Technological and Environmental Dangers, published in 1982 and written by two distinguished scholars, Mary Douglas, a British social anthropologist, and Aaron Wildavsky, an American political scientist. The book received wide critical attention and offered several provocative ideas on the nature of risk, selection, perception, and acceptance. **What is Safe?** David R. Williams, 1998 Is it safe? What are the risks involved? are questions frequently asked by members of the public. This unique book explains the fundamental problems faced in modern-day life. Terms such as risk and safe are clearly defined, and the risks encountered between birth and death are discussed, including transport, the home, healthcare, diet, and the workplace. The perception of risk and the risks from radiation, natural radwaste, and nuclear reactors are covered, along with management of risk and the psychology of risk perception. What is Safe? The Risks of Living in a Nuclear Age is illustrated with examples from the most deeply researched areas. Written for the lay person, the volume also includes a complete reprint of the late Lord Walter Marshall's famous lecture, The Radioactive Garden. It will be of interest to students, teachers,

researchers industrialists or indeed anyone wishing for an up to date view of risk and safety *Constructing Risk and Safety in Technological Practice* Boel Berner, Jane Summerton, 2003-08-29 Modern technological systems entail risks and uncertainties of hitherto unknown dimensions This book discusses the construction of risk and safety within a variety of empirical contexts where technologies and their risk are debated and handled by individuals groups or organizations With contributions from leading scholars from Europe and the USA it presents original theoretical discussions linked to detailed empirical case studies *The SAGE Handbook of Risk Communication* Hyunyi Cho, Torsten Reimer, Katherine A. Perspectives on Ignorance from Moral and Social Philosophy Rik Peels, 2016-06-23 This edited collection focuses on the moral and social dimensions of ignorance an undertheorized category in analytic philosophy Contributors address such issues as the relation between ignorance and deception ignorance as a moral excuse ignorance as a legal excuse and the relation between ignorance and moral character In the moral realm ignorance is sometimes considered as an excuse some specific kind of ignorance seems to be implied by a moral character and ignorance is closely related to moral risk Ignorance has certain social dimensions as well it has been claimed to be the engine of science it seems to be entailed by privacy and secrecy and it is widely thought to constitute a legal excuse in certain circumstances Together these contributions provide a sustained inquiry into the nature of ignorance and the pivotal role it plays in the moral and social domains

Risk Management Gerald Mars, David T. H. Weir, 2020-06-18 First published in 2000 *Risk Management* is a two volume set comprised of the most significant and influential articles by the leading authorities in the studies of risk management The volumes includes a full length introduction from the editor an internationally recognized expert and provides an authoritative guide to the selection of essays chosen and to the wider field itself The collections of essays are both international and interdisciplinary in scope and provide an entry point for investigating the myriad of study within the

discipline **The Perception of Risk** Paul Slovic, 2016-10-06 The concept of risk is an outgrowth of our society's great concern about coping with the dangers of modern life. *The Perception of Risk* brings together the work of Paul Slovic, one of the world's leading analysts of risk, risk perception and risk management to examine the gap between expert views of risk and public perceptions. Ordered chronologically, it allows the reader to see the evolution of our understanding of such perceptions from early studies identifying public misconceptions of risk to recent work that recognizes the importance and legitimacy of equity, trust, power and other value-laden issues underlying public concern. *The Social Amplification of Risk* Nick Pidgeon, Roger E. Kasperson, Paul Slovic, 2003-07-10 This volume, edited by three of the world's leading analysts of risk and its communication, brings together contributions from a group of international experts working in the field of risk perception and risk communication. Key conceptual issues are discussed as well as a range of recent case studies spanning BSE and food safety, AIDS, HIV, nuclear power, child protection, Y2K, electromagnetic fields and waste incineration that take forward the state of the art in risk amplification theory. The volume also draws attention to lessons for public policy, risk management and risk communication practice. Compassion in Disaster Management Mark Croweller, 2024-08-02 Should leadership minimise suffering? This book argues yes, offering leaders, especially those in disaster management, a way to improve their ability to lead, serve and protect others during disasters and crises. Drawing upon his own experiences as a disaster management specialist as well as high-level interviews with disaster management leaders from the USA, Australia and New Zealand, Croweller bridges theory and practice to achieve three objectives. Firstly, to establish the political and socio-cultural context in which disaster management leaders find themselves when seeking to protect citizens and minimise their suffering and vulnerability. Secondly, to provide an empirical account of how certain sociocultural influences affect their efficacy as leaders and that of their organisations when seeking to improve well-being, provide protection and reduce suffering and vulnerability. Thirdly, to propose a relational leadership framework centred upon an ethic of compassion and supported by behaviours, characteristics and practices that can guide leaders when addressing the causes of suffering and vulnerability across the entire disaster management cycle. This framework progressively emerges as the reader navigates their way through each chapter. An essential text for aspiring and experienced leaders, especially those in the fields of Emergency Medical Services, fire services, law enforcement and emergency management. It will also appeal to students and researchers in related disciplines. **Risk in Social Science** Peter Taylor-Gooby, Jens O. Zinn, 2006-10-05 Intended for students and scholars from the social sciences, this is an introduction to work on risk. It discusses the basic issues in risk research and examines some of the key themes in this field, looking at topics such as the media, crime, the environment and social inequality. *The Sociology of Health and Illness* Peter Conrad, Valerie Leiter, 2023-05-12 This anthology for Medical Sociology courses is edited by two leading experts in the field. It brings together readings from the scholarly literature on health, medicine and health care, covering some of the most timely health issues of our day, including eating disorders, the

The Institutional Dynamics of Culture, Volumes I and II Perri Six, 2018-12-20 These two volumes present the most important recent developments in the institutional theory of culture and demonstrate their practical applications Sometimes called grid group analysis or cultural theory they derive from the work of Durkheim in the 1880s and 1900s and develop the insights of the anthropologist Mary Douglas and her followers from the 1960s on First redefined within social and cultural anthropology the theory's influence is shown in recent years to have permeated all the main disciplines of social science with substantial implications for politics history business work and organizations the environment technology and risk and crime and consumption Today the institutional theory of culture now rivals the rational choice Weberian and postmodern outlooks in influence across the social sciences

The Tolerability of Risk Frederic Boudier, David Slavin, 2013-09-05 There is an increasing dissatisfaction about how risk is regulated leading to vivid debates about the use of risk assessment and precaution As a result academics government officials and industry leaders are calling for new approaches and fresh ideas This book provides a historical and topical perspective on the alternative concept of Tolerability of Risk and its concrete regulatory applications In the UK Tolerability of Risk has been developed into a sophisticated framework particularly within the health and safety sectors It is expected to guide decision makers when applying their legal obligation of keeping risks as low as practically reasonable Could Tolerability of Risk become a wider source of inspiration across the full scope of risk analysis and management Written by leading academics and risk practitioners from industry and government The Tolerability

of Risk presents a summary of theoretical perspectives on risk approaches providing a detailed elicitation of the methods and approaches used to build the Tolerability of Risk framework and examining the prospect of universal application of that framework From nuclear power to environmental pollution climate change and drug testing the Tolerability of Risk framework may offer a workable pragmatic solution for balancing risks against the costs involved in controlling them as well as developing the institutional capacity to make effective decisions in all jurisdictions worldwide
