Radical Dinosaurs:

Obamacare, Dinosaurs, Red Necks, and Radicals Rose M. Colombo, 2013-03-18 no summary **Creationism USA** Adam Laats, 2020-09-24 Who are America's creationists? What do they want? Do they truly believe Jesus rode around on dinosaurs as sometimes depicted? Creationism USA reveals how common misconceptions about creationism have led Americans into a century of unnecessary culture war histrionics about evolution, education, and creationism. Adam Laats argues that Americans do not have deep fundamental disagreements about evolution, not about the actual science behind it, and not in ways that truly matter to public policy. Laats asserts that Americans do, however, have significant disagreements about creationism. By describing the history of creationism and its many variations, Laats demonstrates that the real conflict about evolution is not between creationists and evolution. The true landscape of American creationism is far more complicated than headlines suggest. Creationism USA digs beyond those headlines to prove two fundamental facts about American creationism: First, almost all Americans can be classified as creationists of one type or another. Second, nearly all Americans, including self-identified creationists, want their children to learn mainstream evolutionary science. Taken together, these truths about American creationism point to a large and productive middle ground: a widely shared public vision of the proper relationship between schools, science, and religion. Creationism USA both explains the current state of America's battles over creationism and offers a nuanced yet straightforward prescription to solve them.

Marxism Against Postmodernism in Educational Theory Mike Cole, Dave Hill, Peter McLaren, 2002-12-11 Postmodernism has become the orthodoxy in educational theory. It heralds the end of grand theories like Marxism and liberalism, scorning any notion of a united feminist challenge to patriarchy, of a united anti-racist struggle, and of united working class movements against capitalist exploitation and oppression. For postmodernists, the world is fragmented, history is ended, and all struggles are local and particularistic. Written by internationally renowned British and American educational theorists, *Marxism Against Postmodernism in Educational Theory* is a substantially revised edition of the original 1999 work. *Postmodernism in Educational Theory* critically examines the infusion of postmodernism and theories of postmodernity into educational theory, policy, and research. The writers argue that postmodernism provides neither a viable educational politics nor the foundation for effective radical educational practice and offer an alternative politics of human resistance which puts the challenge to capitalism firmly on the agenda of educational theory, politics, and practice.

Feathered Dinosaurs John Long,Peter Schouten,2008-09-01 Scientists have recovered more than a billion fossils but no discovery has been more breath taking than the fossils recently found in northern China findings which prove that several families of dinosaurs had feathers or feathery hair like coverings adorning their bodies Now in the beautifully designed Feathered Dinosaurs paleontologist John Long and illustrator Peter Schouten provide a stunning visual record of these extraordinary prehistoric creatures illuminating the evolutionary march from primitive feathered dinosaurs through to the first true flying birds Schouten an acclaimed natural history artist has created 80 full color paintings that capture the striking physical traits of these feathered dinosaurs Drawing on his extensive knowledge of the lifestyles of modern birds and mammals plus the extant scientific data regarding how these dinosaurs might have looked and behaved Schouten has produced not only the most beautiful but also the most accurate visual representations of these animals in print Equally

important John Long a noted paleontologist and widely published science author with some 24 books to his credit provides an engaging companion text that places these feathered dinosaurs within the larger family of dinosaurs for instance outlining their relationship to T Rex and Velociraptor species well known to Jurassic Park fans and discusses the factual information that can be deduced from their fossil remains in effect providing an insightful natural history of this remarkable group A true marriage of art and science Feathered Dinosaurs presents an unprecedented visual record of one of the most significant breakthroughs in the history of vertebrate paleontology the discovery that many predatory dinosaurs were cloaked with feathers perhaps just as colorful and fanciful as those of their living relatives

The Paleobiological Revolution David Sepkoski, Michael Ruse, 2015-03-04 The Paleobiological Revolution chronicles the incredible ascendance of the once maligned science of paleontology to the vanguard of a field With the establishment of the modern synthesis in the 1940s and the pioneering work of George Gaylord Simpson Ernst Mayr and Theodosius Dobzhansky as well as the subsequent efforts of Stephen Jay Gould David Raup and James Valentine paleontology became embedded in biology and emerged as paleobiology a first rate discipline central to evolutionary studies Pairing contributions from some of the leading actors of the transformation with overviews from historians and philosophers of science the essays here capture the excitement of the seismic changes in the discipline In so doing David Sepkoski and Michael Ruse harness the energy of the past to call for further study of the conceptual development of modern paleobiology
