Rationalizing Culture Georgina Born, 2023-09-01 Anthropologist Georgina Born presents one of the first ethnographies of a powerful western cultural organization the renowned Institut de Recherche et de Coordination Acoustique Musique IRCAM in Paris As a year long participant observer Born studied the social and cultural economy of an institution for research and production of avant garde and computer music She gives a unique portrait of IRCAM s composers computer scientists technicians and secretaries interrogating the effects of the cultural philosophy of the controversial avant garde composer Pierre Boulez who directed the institute until 1992 Born depicts a major artistic institution trying to maintain its status and legitimacy in an era increasingly dominated by market forces and in a volatile political and cultural climate She illuminates the erosion of the legitimacy of art and science in the face of growing commercial and political pressures By tracing how IRCAM has tried to accomodate these pressures while preserving its autonomy Born reveals the contradictory effects of institutionalizing an avant garde Contrary to those who see postmodernism representing an accord between high and popular culture Born stresses the continuities between modernism and postmodernism and how postmodernism itself embodies an implicit antagonism toward popular culture Anthropologist Georgina Born presents one of the first ethnographies of a powerful western cultural organization the renowned Institut de Recherche et de Coordination Acoustique Musique IRCAM in Paris As a year long participant observer Born studied Being English Julian Wolfreys, 1994-09-30 Drawing on recent developments concerning national identity in post Marxist criticism and Derridean philosophy Wolfreys looks at the ways in which literature is used to represent the English middle classes to themselves using texts by Coleridge Wordsworth Arnold Gaskell Collins Eliot and Trollope *The Philosopher and His Poor* Jacques Rancière, 2004-04-23 Rancière s account of Western philosophical thought from Plato to Bourdieu argues that philosophers depend on an ideal poor for

their own analyses but preclude them from abstract thought Historical Dictionary of Marxism Elliott Johnson, David Walker, Daniel Gray, 2014-09-09 The second edition of the Historical Dictionary of Marxism covers the basics of Karl Marx's thought, the philosophical contributions of later Marxist theorists and the extensive real world political organizations and structures his work inspired that is the myriad political parties, organizations, countries and leaders who subscribed to Marxism as a creed. This text includes a chronology, an introductory essay and an extensive bibliography. The dictionary section has over 500 cross-referenced entries on important personalities, both thinkers and doers, political parties and movements and major communist or ex-communist countries. This book is an excellent access point for students, researchers and anyone wanting to know more about Marxism Ideology Terry Eagleton, 1991 His thought is redneck, yours is doctrinal and mine is deliciously supple. Ideology has never been so much in evidence as a fact and so little understood as a concept as it is today. From the left it can often be seen as the exclusive property of ruling classes and from the right as an arid and totalizing exception to their own common sense. For some the concept now seems too ubiquitous to be meaningful for others too cohesive for a world of infinite difference. Here in a book written for both newcomers to the topic and those already familiar with the debate, Terry Eagleton unravels the many different definitions of ideology and explores the concept's tortuous history from the Enlightenment to postmodernism. Ideology provides lucid interpretations of the thought of key Marxist thinkers and of others such as Schopenhauer, Nietzsche, Freud and the various poststructuralists. As well as clarifying a notoriously confused topic, this new work by one of our most important contemporary critics is a controversial political intervention into current theoretical debates. It will be essential reading for students and teachers of literature and politics.

Modern Environmentalism David Pepper, 2002-06-01 Modern Environmentalism presents a comprehensive introduction to environmentalism, the origins of its main beliefs and ideas and how these relate to modern environmental ideologies. Providing a historical overview of the development of attitudes to nature and the environment in society, the book examines key environmentalist ideas, influences and movements. Science's role in mediating our view of nature is emphasised throughout. This entirely new account draws on the explosion of writing on socio-environment relations since Pepper's earlier work *The Roots of Modern Environmentalism*. **Western Conceptions of the Individual** Brian Morris, 2024-11-01 This is a comprehensive study of the varying conceptions of the human subject in the Western intellectual tradition. Although informed by an anthropological perspective, the author draws on material from all the major intellectual disciplines that have contributed to this tradition and offers biographical and theoretical vignettes of all the major Western scholars. By scrutinizing the classical texts of the Western tradition, he succeeds in delineating the differing conceptions of the human individual which emerge from these writings and gives a guide to the most important ideas in Western cultural traditions.

Hegel, Marx and the Contemporary World Kaveh Boiveiri, Emmanuel Chaput, 2016-06-22 This book is the result of a three-day conference held in April 2014 at the University of Montreal, Canada, discussing the relevance of the work of Hegel

and Marx in today's world particularly with regard to the ecological economic political and anthropological crisis facing humanity Accordingly the book an exploration of the specific nature of the crisis we face both in our everyday lives and in the realm of theory However if indeed the necessity of a proper critique *Kritikos* is intimately linked to a state of crisis *Krisis* the conceptual frame necessary to produce such a critique may itself be in crisis Among the vast number of critical oppositions to contemporary capitalism what are the keys available to understand the present forms of human conditions alienation and exploitation Controversies and divisions among the different tendencies within the critical tradition tend to highlight the point that there is also a theoretical crisis which prevents a proper diagnosis of the actual crisis and prevents in turn a proper plan of action from being established Looking back to Marx and Hegel allowed a return if not to the sources at least to two unavoidable influences among the various critical approaches to capitalism Be it with or against Hegel and or Marx the criticisms of modernity post modernity and capitalism cannot neglect the shadows of these thinkers Both Marx's and Hegel's philosophical sociological and political enterprises must be linked historically to the will to diagnose and solve what they saw as the most important crises of their own time from in Hegel's case the spiritual crisis which followed the advent of modernity and its accompanying turmoil to the social and political crisis caused by capitalism and the advent of a new industrial society in Marx's case Both intellectual ventures are at every turn haunted by the notion of crisis This book will appeal to anyone interested in Hegel's and Marx's philosophical and political theories Not only does it provide the historical context necessary to understand properly the relation between Marx and Hegel but it also places the relevance of their teachings for the contemporary reader in perspective

Eid, 2023-11-14 This book on entrepreneurship compiles a series of evidence-based episodes from the lives of the marginalized and the minority-oriented entrepreneurs to comprehend whether entrepreneurship is truly a socio-economic emancipatory strategy Varying experiences of entrepreneurs from different geographical territories origins and gender are examined under a critical lens to deconstruct its emancipatory potential and appreciate its power in generating human freedom equal opportunities and in uplifting the oppressed and suppressed classes globally In specific the book explores entrepreneurs located in two geographically diverse regions across the world The social entrepreneurs in the contested region of Palestine and the black and ethnic entrepreneurial group based in Georgia United States The book is a planned and purposeful compilation of raw i.e. in terms of emotions and feelings untold stories of entrepreneurs who have embraced entrepreneurship to eradicate their harsh realities and subsequently emancipate themselves The book integrates a critical perspective encompassing a variety of theoretical frameworks such as critical race theory critical theory critical realism and different power modalities and philosophies to investigate the emancipatory potential of entrepreneurship and justify it as a socio-economic emancipatory strategy This book ventures into the murky and dark waters of entrepreneurship by exploring this concept within the black and immigrant communities as a collective social entrepreneurship reform movement female entrepreneurship informal entrepreneurship operating under occupation to provide detailed insights on bricolage and other complexed economic issues **Du Bois's Dialectics** Reiland Rabaka, 2009-01-01 With chapters that undertake ideological critiques of education religion the politics of reparations and the problematics of black radical politics in contemporary culture and society Du Bois's Dialectics employs Du Bois as its critical theoretical point of departure and

Sharpe,2015-08-25 Camus Philosophe To Return to our Beginnings is the first book on Camus to read Camus in light of and critical dialogue with subsequent French and European philosophy It argues that while not an academic philosopher Albert Camus was a philosophe in more profound senses looking back to classical precedents and the engaged French *lumi res* of the 18th century Aiming his essays and literary writings at the wider reading public Camus criticism of the forms of political theology enshrined in fascist and Stalinist regimes singles him out markedly from more recent theological and messianic turns in French thought His defense of classical thought turning around the notions of natural beauty a limit and *mesure* makes him a singularly relevant figure given today's continuing debates about climate change as well as the way forward for the post Marxian Left
