Doppler Radar Observations Joan Bech, Jorge Luis Chau, 2012-04-05 Doppler radar systems have been instrumental to improve our understanding and monitoring capabilities of phenomena taking place in the low middle and upper atmosphere Weather radars wind profilers and incoherent and coherent scatter radars implementing Doppler techniques are now used routinely both in research and operational applications by scientists and practitioners This book brings together a collection of eighteen essays by international leading authors devoted to different applications of ground based Doppler radars Topics covered include among others severe weather surveillance precipitation estimation and nowcasting wind and turbulence retrievals ionospheric radar and volcanological applications of Doppler radar The book is ideally suited for graduate students looking for an introduction to the field or professionals intending to refresh or update their knowledge on Doppler radar applications

**Electromagnetic Scintillation: Volume 1, Geometrical Optics** Albert D. Wheelon, 2001-09-06 Electromagnetic Scintillation describes the phase and amplitude fluctuations imposed on signals that travel through the atmosphere The volumes that make up Electromagnetic Scintillation will provide a modern reference and comprehensive tutorial treating both optical and microwave propagation and integrating measurements and predictions at each step of the development This first volume deals with phase and angle of arrival measurement errors accurately described by geometrical optics It will be followed by a further volume examining weak scattering In this book measured properties of tropospheric and ionospheric irregularities are reviewed first Electromagnetic fluctuations induced by these irregularities are then estimated for a wide range of applications The book will be of interest to those working in the resolution of astronomical interferometers and large single aperture telescopes as well as synthetic aperture radars and laser pointing tracking systems It is also directly relevant to those working in laser metrology GPS location accuracy and terrestrial and satellite communications
