Radio Astronomy Symp 4:

Solar System Radio Astronomy Jules Aarons, 2012-12-06 The Ionospheric Institute of the National Observatory of Athens has had two interests in recent years the study of the ionosphere and the study of the sun In our previous Advanced Study Institutes in 1960 1961 and 1962 we have emphasized the ionosphere For the Advanced Study Institute of 1964 however we invited Dr Jules Aarons of the Air Force Cambridge Research Laboratories to collaborate in preparing and directing a program of studies of the sun the moon the planets and the interplanetary medium The lectures of this Advanced Study Institute form essentially an advanced course in radio astronomy Without being a textbook on the matter we feel that the present book can be considered as an excellent reference for those students starting their research work in the field of solar system radio astronomy All lecturers tried to present their subjects in a simple form based upon their extensive personal experience but without emphasizing their personal research We must recognize that it was an excellent achievement for them to keep their text exactly at the level indicated by the Program Director and outlined by the general program of Advanced Study Institutes of NATO We are deeply grateful to all the invited scientists for their outstanding contributions in lecturing on their subjects in a clear and authoritative manner The Scientific Affairs Division of NATO in its aid to basic research sponsors various programs Among them is the Program of Advanced Study Institutes A Survey of Radio Observations of Solar Eclipses John P. Castelli, 1965 **Radio Physics of the Sun** M. R. Kundu, T.E. Gergely, 1980-06-30 For over 35 years radio astronomical techniques have made an impressive series of advances in our understanding of solar phenomena However although the subject has been partially discussed in Paris Symposium on Radio Astronomy in 1958 NASA GSFC Symposium on Physics of Solar Flares in 1963 and the IAU Symposium No 57 on Coronal Disturbances in 1973 there has not been a major international meeting dedicated to Radio Physics of the Sun This is the first major symposium on the subject held under the auspices of the International Astronomical Union It was jointly sponsored by IAU Commission 40 Radio Astronomy and by IAU Commission 10 Solar Activity It was also sponsored by the Solar Physics Division of the American Astronomical Society This volume contains the proceedings of this meeting IAU Symposium No 86 on Radio Physics of the Sun that was held in College Park Maryland August 7 10 1979 The Scientific Organizing Committee of the Symposium consisted of M R Kundu chairman G A Dulk O Hachenberg M Kuperus D J McLean D Melrose M Pick J L Steinberg T Takakura A Tlamicha and V V Zheleznyakov The topics and speakers were chosen in order to emphasize the current observational material with particular reference to centimeter wavelength observations of a few arc second resolution fast two dimensional pictures of the sun at meter decameter wavelengths and the recent advances in plasma and radiation theory **Fourth Symposium on Chemical Evolution and the Origin and Evolution of Life** Robert A. Jr Wharton, 1991 This symposium was held at the NASA Ames Research Center Moffett Field California July 24 27 1990 The NASA Exobiology principal investigators reported their recent research findings Scientific papers were presented in the
