RAF Bomber Command and Its Aircraft: 1941-1945 James Goulding, 1975      The RAF and Aircraft Design Colin S Sinnott, 2014-05-22 This work examines the evolution of the RAF's operational requirements for its home defence air force for bombers to mount a deterrent counter offensive and for fighters to provide direct defence of Britain It discusses the management processes policies and decisions relevant to operational requirements on the basis of a detailed study of Air Ministry papers of the time By tracing the development of operational requirements the author exposes the thinking behind the RAF's quest for effective fighter and bomber aircraft He describes the ideas and concepts of air warfare that were adopted in the 1920s and shows how these evolved into the Air Staff's requirements for the aircraft which the RAF entered and fought in World War II      **A - Airports** British Library, 2012-05-21 No detailed description available for A Airports

**The Hercules** Gordon A. A. Wilson, 2024-08-15 What links the Bristol Aeroplane Company Armstrong Whitworth AVRO Short Brothers PLC Handley Page Ltd and Vickers Aviation The Hercules engine      Operation Oyster World War II's Forgotten Raid Kees Rijken, Paul Schepers, Arthur G. Thorning, 2014-08-15 Operation Oyster was carried out on the 6th December 1942 by 2 Group RAF Considered to be a notable success for the allies it cost the Germans an estimated six months of lost production time at a critical point in the conflict It is arguable according to the authors that the operation was in fact rather more significant than Operation Chastise the Dambuster raid while accepting that was a remarkable feat of arms Operation Oyster struck at the very heart of what Churchill termed the wizard war against German radio navigational technology by attacking a central hub of activity the Philips Radio Works in Eindhoven The Netherlands The development of electronics in WWII was the most significant technical aspect of weaponry over the course of the conflict On both sides there were great advances in radar and communications which at that time depended on the wide scale use of high frequency radio valves few companies had the technology to produce these but the leading one in Europe was Philips in Eindhoven Thus it was determined that Philips was the most important target Ninety three allied aircraft took part and a total of fourteen were lost But the result in terms of damages to the enemy was considerable hindering the German war effort significantly and consequently aiding the allies Despite these facts however the story of the raid has been underreported and the efforts of the aircrew who took part have been little recognized By comparison the Dambuster raid which came six months later has entered into folklore Here for the first time the overlooked Oyster raid is afforded the attention it deserves      The Battle of Britain, 1945-1965 Garry Campion, 2015-10-06 Seventy five years after the Battle of Britain the Few's role in preventing invasion continues to enjoy a revered place in popular memory The Air Ministry were central to the Battle's valorisation This book explores both this and also the now forgotten 1940 Battle of the Barges mounted by RAF bombers      **The Lancaster** Gordon A. *Journey's End* Kevin Wilson, 2010-06-10 A brilliant insight into life in the air and on the ground Observer In February

1945 British and American bombers rained down thousands of tons of incendiaries on the city of Dresden killing an estimated 25 000 people and destroying one of the most beautiful cities in Europe The controversy that erupted shortly afterwards and which continues to this day has long overshadowed the other events of the bomber war and blighted the memory of the young men who gave their lives to fight in the skies over Germany Journey s End neither condemns nor condones the bombing of Dresden but puts it in its proper context as part of a much larger campaign To the young men who flew over Germany night after night there were other much more pressing worries the V2 rockets that threatened their loved ones at home the brand new German jet fighters that could strike them at speeds of over 600mph They lived life at a heightened tempo during these final unforgiving months of the bomber war when no quarter was given on either side As the climactic volume in Kevin Wilson s acclaimed bomber war trilogy Journey s End chronicles the brutal endgame of a conflict that caused such devastation and tragedy on both sides     **The Crucible of War, 1939-1945** Brereton Greenhous, Sydney F.

Wise, Canada. Department of National Defence, Canada. Royal Canadian Air Force, Stephen J. Harris, William C. Johnston, William C. Rawling, 1994-01-01 The RCAF with a total strength of 4061 officers and men on 1 September 1939 grew by the end of the war to a strength of more than 263 000 men and women This important and well illustrated new history shows how they contributed to the resolution of the most significant conflict of our time     Hamburg 1940-45 Richard Worrall, 2024-04-25 The first book to cover the full history of the RAF s air war against Hamburg one of the most important target cities in Germany The city of Hamburg became synonymous with the destructive power of RAF Bomber Command when during summer 1943 the city suffered horrific destruction in a series of four heavy firebombing attacks Operation Gomorrah However few know how varied or long the Hamburg campaign was In this book RAF air power expert Dr Richard Worrall presents the complete history of the RAF s air campaign against the city a campaign that stretched well beyond the devastating fire raids of 1943 Dr Worrall explains how Germany s second city was an industrial centre of immense proportions and proved a consistent target for Bomber Command throughout World War II It was home to oil refineries U boat pens and ship building and submarine building yards all sustained by a large industrial workforce Bomber Command evolved tactically and technically throughout the war and the Luftwaffe s defensive capabilities would do likewise in response Drawing on a wide range of primary and secondary sources available on this topic and packed with photos artwork maps and diagrams this is an important new history of the air campaign against the industrial and naval heart of Nazi Germany

International Encyclopedia of Military History James C. Bradford, 2004-12 With its impressive breadth of coverage both geographically and chronologically the *International Encyclopedia of Military History* is the most up to date and inclusive A Z resource on military history From uniforms and military insignia worn by combatants to the brilliant military leaders and tacticians who commanded them the campaigns and wars to the weapons and equipment used in them this international and multi cultural two volume set is an accessible resource combining the latest scholarship in the field with a world perspective on military history Hitler's Air Defences Stephen Wynn, 2021-11-30 The first Allied bombing raid on Berlin during the course of the Second World War took place on 7 June 1940 when a French naval aircraft dropped 8 bombs on the German capital but the first British raid on German soil took place on the night of 10 11 May 1940 when RAF aircraft attacked Dortmund Initially Nazi Germany hadn't given much thought about its aerial defences being attacked in its own back yard wasn't something that was anticipated to be an issue Germany had been on the offensive from the beginning of the war and Hitler believed that the Luftwaffe was the much stronger air force In addition from 1939 1942 the Allied policy of aerial attacks on German soil was to hit targets with a distinct military purpose such as munitions factories airfields etc This meant that the Germany military could focus where they placed their anti aircraft batteries and had a very good idea of how many they would need However Germany's defensive capabilities were forced to improve as Allied raids on towns and cities increased in size and frequency Fighter aircraft were included as part of anti aircraft defences and flak units mastered the art of keeping attacking Allied aircraft at a specific height This made it more difficult for them to identify their specific

targets and easier for German fighter aircraft to shoot them down before they could jettison their bomb loads. With the Allied tactic of area bombing, Germany's anti-aircraft capabilities became harder to maintain as demand increased. The longer the war went on, along with the increased Allied bombing raids, sometimes involving more than 1,000 bomber aircraft, so the worth and effectiveness of German air defences dwindled.
