**The Chinese Recorder and Missionary Journal** , 1878      **Online Chinese Nationalism and China's Bilateral Relations** Simon Shen, Shaun Breslin, 2010-03-18 Since the Chinese were officially plugged into the virtual community in 1994 the usage of the internet in the country has developed at an incredible rate By the end of 2008 there were approximately 298 million netizens in China a number which surpasses that of the U S and ranks China the highest user in the world The rapid development of the online Chinese community has not only boosted the information flow among citizens across the territory but has also created a new form of social interaction between the state the media various professionals and intellectuals as well as China's ordinary citizens Although the subject of this book is online Chinese nationalism which to a certain extent is seen as a pro regime phenomenon the emergence of an online civil society in China intrinsically provides some form of supervision of state power perhaps even a check on it The fact that the party state has made use of this social interaction while at the same time remaining worried about the negative impact of the same netizens is a fundamental characteristic of the nature of the relationship between the state and the internet community Many questions arise when considering the internet and Chinese nationalism Which are the most important internet sites carrying online discussion of nationalism related to the author's particular area of study What are the differences between online nationalism and the conventional form of nationalism and why do these differences exist Has nationalist online expression influenced actual foreign policy making Has nationalist online expression influenced discourse in the mainstream mass media in China Have there been any counter reactions towards online nationalism Where do they come from Online Chinese Nationalism and China's Bilateral Relations seeks to address these questions

**Sinicization and the Rise of China** Peter J. Katzenstein, 2013-03-01 China's rise and processes of Sinicization suggest that recombination of new and old elements rather than a total rupture with or return to the past is China's likely future In both space and time civilizational politics offers the broadest social context It is of particular salience

in China Reification of civilizations into simple categories such as East and West is widespread in everyday politics and common in policy and academic writings This book s emphasis on Sinicization as a specific instance of civilizational processes counters political and intellectual shortcuts and corrects the mistakes to which they often lead Sinicization illustrates that like other civilizations China has always been open to variegated social and political processes that have brought together many different kinds of peoples adhering to very different kinds of practices This book tries to avoid the reifications and celebrations that mark much of the contemporary public debate about China s rise It highlights instead complex processes and political practices bridging East and West that avoid easy shortcuts The analytical perspectives of this book are laid out in Katzenstein s opening and concluding chapters They are explored in six outstanding case studies written by widely known authors which over questions of security political economy and culture Featuring an exceptional line up and representing a diversity of theoretical views within one integrative perspective this work will be of interest to all scholars and students of international relations sociology and political science Chapter 7 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
