McMillan, 2012-03-14 Available electronically in an open access full text edition from the Texas A M University Libraries Digital Repository at <http://oaktrust.library.tamu.edu/handle/1969.1/146844> Frank N. McMillan Jr a country boy steeped in the traditional culture of rural Texas was summoned to a life long quest for meaning by a dream lion he met in the night On his journey he followed the lead of the founder of analytical psychology Carl Jung and eventually established the world's first professorship to advance the study of that field McMillan born and raised on a ranch near Calvert was an Aggie through and through with degrees in geology and petroleum engineering As an adult working near Bay City Texas he was lunching in a country caf when by chance he met abstract expressionist painter Forrest Bess who was ecstatically waving a letter he had received from Jung himself The artist's enthusiastic description of Jung as a master psychologist soul doctor and healer led McMillan to the Jung Center in Houston where he began reading Jung's Collected Works McMillan frequently said Jung saved my life Finding Jung Frank N. McMillan Jr a Life in Quest of the Lion captures McMillan's journey through the words of his own journals and through reflections by his son Frank III David Rosen the holder of the first endowed McMillan professorship at Texas A M University adds insights to the book and the late Sir Laurens van der Post whom the elder McMillan met at the Houston Jung Center in 1979 authored a foreword to the book before his death This is a story that sheds light on the inner workings of the self as well as the Jungian understanding of the Self In often lyrical language it gives the human background to a major undertaking in the dissemination of Jungian scholarship and provides a personal account of a life lived in near mythic dimensions *Science, Entertainment and Television Documentary* Vincent Campbell, 2016-05-13 The shift from traditional documentary to factual entertainment television has been the subject of much debate and criticism particularly with regard to the representation of science New types of factual programming that combine documentary techniques with those of entertainment formats such as drama game shows and reality TV have come in for strident criticism Often featuring spectacular visual effects produced by Computer Generated Imagery these programmes blur the boundaries between mainstream science and popular beliefs

Through close analysis of programmes across a range of sciences this book explores these issues to see if criticisms of such hybrid programmes as representing the rotting carcass of science TV really are valid Campbell considers if in fact when considered in relation to the principles practices and communication strategies of different sciences these shows can be seen to offer more complex and rich representations that construct sciences as objects of wonder awe and the sublime
