**Rain Of Iron And Ice** John S. Lewis, 1996-01-10 John S Lewis a planetary scientist details the recent scientific study which suggests that massive solid bodies from space pose a very real threat to our planet and explores the implications for the future of life on Earth

**Iron and Rain** Alex P. Berg, 2023-03-06 Mars stands at a crossroads It can accept the tyrannical rule of the United Space Corporation or pay for its freedom in blood After Ambrose Drake's plan to free the red planet doesn't deliver the results he'd desired he still hopes he can liberate Mars with minimal violence until a brutal act of USC aggression makes it clear USC will either subjugate Mars or destroy it With his forces pushed onto their heels Ambrose has no choice To save his home he must go on the offensive He must travel to Earth and dismantle USC once and for all But USC doesn't plan on giving him the chance As they pit their might against Mars they send someone after Drake a ruthless assassin known as the Patient Dragon Now the clock is ticking As Drake races to undermine the USC forces who oppose him the Dragon grows closer with every step Don't miss this thrilling conclusion to the Tyrants of Mars a science fiction trilogy full of action mystery and political intrigue

**Dead Cities** Mike Davis, 2024-10-01 For the late great Mike Davis the ravaging of the climate by capital and his prescient analysis of its consequences for those of us left to deal with the resulting crises was always a central part of his urban geography In these wide ranging incisive and hauntingly relevant essays Davis asks us to consider what we would find if we put a microscope to the ruins of Metropolis and provides a riveting account of the disasters natural man made and those as in the case of climate calamity where the distinction is impossible to make that he finds on the other end He begins his examination by sifting through the rubble of the twin towers in the wake of 9 11 presciently identifying the seeds of war already germinating in the scorched soil of ground zero and closes by considering how little prepared our hollowed out urban infrastructure is to deal with shocks of any kind be they from car bombs or ice storms In between we are treated to tours of blasted wastelands where American generals built and destroyed replicas of Berlin glimpses of Las Vegas's penchant for annihilating its own best known landmarks and other riveting tales of the dialectic between nature and the city Dead Cities written over twenty years ago abounds with prophecies fulfilled contains echoes of our current moment where conspiracies abound and anxieties drown out official celebrations of prosperity and offers dreams of alternative paths not taken
