The Rise of American Research Universities Hugh Davis Graham, Nancy Diamond, 1997-01-08 Before the Second World War few universities in the United States had earned high respect among the international community of scholars and scientists Since 1945 however the distinctive attributes of American higher education decentralized administration pluralistic and research minded faculties and intense competition for government funding have become world standard Whether measured by Nobel and other prizes international applications for student admissions and faculty appointments or the results of academic surveys America's top research universities are the best in the world The Rise of American Research Universities provides a fresh historical interpretation of their ascendancy and a fresh comprehensive estimate of their scholarly achievement Hugh Davis Graham and Nancy Diamond question traditional methods of rating the reputation and performance of universities they offer instead an empirical analysis of faculty productivity based on research grants received published research and peer approval of that work Comparing the research achievements of faculty at more than 200 institutions they differ with most studies of higher education in measuring performance in every academic field from medicine to humanities and in analyzing data on research activity in terms of institutional size In this important and timely work Graham and Diamond reassess the success of American universities as research institutions and the role of public funding in their development from the expansionist golden years of the 1950s and 60s through the austerity measures of the 1970s and the entrepreneurial ethos of the 1980s to the budget crises universities face in the 1990s

sophisticated by graduation However the Greek system s effect on the behavior of Greeks is more troubling an effect largely mediated by the use and abuse of alcohol and the relative absence of direct institutional supervision Assuming the retention of the Greek system then the promotion of the academy s agenda appears dependent on an understanding and accommodation of the personal characteristics of Greeks using appropriate pedagogical methods to advance the academy s educational objectives and both educational and administrative regulatory efforts to control the use and abuse of alcohol With or without the Greek system the advancement of the academy s agenda involves these considerations since the characteristics of students as a whole encompass the characteristics emphasized among Greeks

The Public Research University Darrell R. Lewis, James C. Hearn, James Hearn, 2003-04-02 The Public Research University was written to help frame and stimulate debate on issues surrounding the changes underway within America's public research universities There is currently a general consensus that most of postsecondary higher education in the United States is under financial stress Declining public support for public subsidies to higher education and increasing public demand for other forms of public services have contributed to this stress These declines in resources have resulted in pressures for change in both policies and services Nowhere have these stresses been stronger than in the public research university The focus of this study is based on the University of Minnesota but they are clearly generalizable to most other public research universities
