Inside you'll learn how to do the following: Honor students' passions, interests, and questions by teaching how to embrace inquiry, curiosity, and exploration; Teach students how to frame relevant questions throughout the research process and make the information personal; Develop authentic projects that include surveys, experiments, and interviews; Assess skills, not just memorization, by recognizing and legitimizing what students are doing with research on their own. Fraser also includes mini-lessons, practice activities, graphic organizers, and student examples within the book. *Love the Questions* recommends teachers and students work with librarians and other school leaders as educational partners, helping students continue to develop their analytical and logical skills. **Ladybugs, Tornadoes, and Swirling Galaxies** Brad Buhrow, Anne Upczak Garcia, 2023-10-10. The book is full of photographs of student artwork, including a color insert that reveals the children's inquiry process and demonstrates the important role of art as a sign system in ELL literacy and language acquisition. Brad and Anne provide explicit detail on the process they use as they move step by step with students from personal narrative through the independent inquiry process. They also discuss use of the Gradual Release Model, authentic assessment, and bilingual identities. is written by an expert contributor and focuses on a particular theory or group of theories While the entries show how various individuals have contributed to theoretical movements very few concentrate on the work of a single theorist Each entry first provides a critical summary of a particular theory or group of theories including key elements basic concepts and claims and information about seminal or particularly influential works It then reviews the theory's critical reception in composition studies and discusses its significance in the field The bibliography at the end of each entry lists primary texts and major scholarship related to the theory and provides additional suggestions for further reading The volume closes with a selected bibliography of important works

**Beyond Special**

**Needs** Dr Susan Hart, 1996-05-28 Susan Hart's book is a welcome relief from the prescriptive empiricism of much current writing on how to respond to the difficulties in learning experienced by many children and young people. The detail of the sustained analysis is also in marked contrast to the superficial summarising that often passes for critique. Support for Learning. The author places a refreshing emphasis upon the dynamic interactional nature of learning and teaching, reminding us of the need to recognize the active part played by all pupils in shaping their own learning, which is mediated through the agendas which they bring to bear on classroom activities and which may be quite different from those of their teachers. International Journal of Inclusive Education. This book offers practitioners a new way of thinking about and pursuing concerns about children's learning. It sets aside the limiting language of learning difficulties and special needs and suggests an approach which starts from a different perspective. This approach assumes that any learning situation always has the potential to yield new ideas for enhancing children's learning if we do the kinds of thinking that open up new possibilities. The author offers an account of this innovative thinking, suggesting a framework of questions that teachers can use, drawing on their existing knowledge and expertise to generate new insight and possibilities for practice. She also provides a basis for deciding which possibilities to pursue in the case of a particular child. The approach is explained in a practical and usable way for classroom teachers, drawing on detailed accounts of children's learning and the outcomes of a research study from which the ideas were derived.
