AUTHOR, 2019 **104-1 Hearing: Reshaping the Graduate Education of Scientists and Engineers: NAS's Committee on Science, Engineering, and Public Policy Report, [No. 19].** United States. Congress. House. Committee on Science and Technology, **Reshaping the Graduate Education of Scientists and Engineers**, 2015-07-13 Excerpt from Reshaping the Graduate Education of Scientists and Engineers Nas's Committee on Science Engineering and Public Policy Report Vol 19 Hearing Before the Subcommittee on Basic Research of the Committee on Science U S House of Representatives One Hundred Fourth Congress First Session July 13 1995 The Subcommittee met at 9 40 a m in Room 2318 of the Rayburn House Office Building the Honorable Steven H Schiff Chairman of the Subcommittee presiding Mr Schiff Good morning everybody I would like to call the Subcommittee to order I have a brief opening statement I would like to read into the record and I will recognize our ranking member Mr Geren of Texas for any opening statements he might like to make We are here today to examine a report from the National Academy of Sciences Committee on Science Engineering and Public Policy entitled Reshaping Graduate Education of Scientists and Engineers This report looks at the process by which scientists and engineers are educated and makes recommendations for preparing students for future success I strongly believe that science and technological advances will eventually solve most of this country's social economic and environmental problems I

became a member of the Science Committee to ensure that the Federal Government's role in science is both adequate and beneficial. That said, I am pleased that the Subcommittee has this opportunity to examine the process of graduate education because of its critical link to ensuring that our Nation is able to meet these challenges with high technologies and advanced scientific solutions. The Ph.D. level educated scientist and engineer plays a central role in the prosperity, security, and competitiveness of our Nation. Their successes are the Nation's successes. The Cosepup, which is the acronym for the committee report, urges that modifications be made to America's system of graduate education in order to ensure the future success of these individuals. This should be done not only because scientists and engineers will be employed to help solve the major social and economic concerns that we're facing but also because today's Ph.D. candidate is tomorrow's educator.
