**Resistance and Control in Pakistan** Akbar S. Ahmed, 2004 How can people in the West make sense of contemporary unrest in the Muslim world Is Islamic fundamentalism to be understood purely in religious terms In *Resistance and Control in Pakistan* one of the world's leading authorities on Islam Akbar S Ahmed illuminates what is happening in the Muslim world today and assesses the underlying causes He does this by telling the dramatic story of the revolt of the Mullah of Waziristan in northwest Pakistan and by placing it within the context of other movements occurring elsewhere in the Islamic world He also examines the social structure and operative principles in Muslim society and scrutinizes the influence of religion in a society that is undergoing modernization Till now there has been little available literature on this topic This book written by an eminent scholar with an international reputation fills this gap giving students of politics sociology and Asian studies a revealing examination of the Muslim world today

**Pest Management in Cotton** Graham A. Matthews, Thomas A. Miller, 2021-12-23

This book presents a global overview of the background to and the current state of crop protection and pest management in cotton crops Cotton is one of the most economically important crops in the world and has been grown for centuries but maintaining high yields of good quality requires sophisticated approaches to pest management The introduction and use of pesticides over the decades significantly increased cotton yields but lead to many adverse environmental impacts Over time new and alternative insecticides were developed but overuse has enabled pests to develop significant resistance The development of genetically modified cotton varieties with toxins derived from *Bacillus thuringiensis* enabled much improved control of lepidopteran larvae including bollworms but as the toxins had no effect on sucking pests farmers had no choice but to continue using insecticides Also some of the new cotton varieties developed in recent times have not adapted to different climatic conditions and the quality of cotton fibre declined as a result This book shows the need for more research to select cotton varieties with high quality fibres suitable for different cotton growing areas and to develop integrated pest management strategies to minimise the use of pesticides It also demonstrates the need for an inter disciplinary approach bringing together plant breeders entomologists plant pathologists agronomists and agricultural engineers to achieve high yields of high quality cotton
