Advances in *Aspergillus fumigatus* pathobiology Frederic Lamoth, William J. Steinbach, 2016-03-18 *Aspergillus fumigatus* is a human fungal pathogen that causes invasive aspergillosis (IA) a major infectious cause of death in the expanding population of immunocompromised individuals such as cancer patients and transplant recipients The mortality of IA remains high 30-70% and emerging resistance to triazoles the first line antifungal drug class is of particular concern Second line therapies for IA are limited by their toxicity polyenes or their lack of fungicidal activity echinocandins Identification of novel antifungal targets is an urgent need for improving the outcome of IA *A. fumigatus* is a filamentous fungus exhibiting a complex developmental cycle and elaborate mechanisms of adaptation to allow the initiation and progression of infection in the human host The fungal cell wall with its unique and dynamic structure is responsible for protecting cell integrity and evading the host immune system thus contributing to biofilm formation and virulence and thus representing an ideal antifungal target The emergence of azole resistance implies various and complex mechanisms that need to be further elucidated Other important processes such as biosynthetic pathways and toxin metabolite production are important for fungal survival and propagation in the host environment ultimately leading to disease Moreover the host immune response is a determinant factor in influencing the course of infection The objective of this paper is to provide an overview of the pathogenesis to outline future research

Encyclopedia of the American Novel Abby H. P. Werlock,2015-04-22 Praise for the print edition no other reference work on American fiction brings together such an array of authors and texts as this **Literature and Film in the Third Reich**

Karl-Heinz Schoeps, 2004 This book is the first survey in English of literature and film in Nazi Germany It treats not only works sympathetic to National Socialism but also works of the so called Inner Emigration of the resistance and those written in prisons and concentration camps Much of this literature is not easily accessible in German and not available at all in English translation Historical and ideological context is provided in chapters covering influential works of the time such as Alfred Rosenberg's *The Myth of the Twentieth Century* and Houston Stewart Chamberlain's *The Foundations of the Nineteenth Century* Schoeps also analyzes Nazi cultural policies fascist histories of literature and the role of German studies and Germanists in the Nazi movement A major section of the book is devoted to film then a relatively new medium of communication whose propaganda value was clearly recognized by Goebbels the minister for propaganda and president of the Reich's Chamber of Culture One of the most interesting areas of research in recent years is the relationship between Hitler's cultural commissars in particular Goebbels and the literature and film production of the Nazi years This book is based on the revised and expanded second German edition *Literatur im Dritten Reich 1933-1945* but has again been revised and expanded especially the chapter on film and Nazi policies toward the film industry The chapter on cultural policies has also been expanded to include Himmler's efforts to meddle in this area New also are sections dealing with Jewish entertainers in concentration camps for example Kurt Gerron and activities of the Jewish Cultural League Karl Heinz Schoeps is professor of German at the University of Illinois at Urbana Champaign *Ethical Issues in Twentieth Century French Fiction* C. Davis, 1999-12-08 This book examines ethical problems raised by a number of key twentieth century theoretical and fictional texts by authors such as Levinas Sartre Beauvoir Yourcenar Duras and Genet It argues that even texts which apparently espouse ethical positions based on respect for and responsibility towards others frequently depict conflict as an insurmountable aspect of human relations This is reflected at an aesthetic level as these texts both describe the struggle for supremacy and replicate it in their relation to their readers *Acinetobacter baumannii - The Rise of a Resistant Pathogen* Karyne Rangel, Salvatore De-Simone, 2024-02-07 *Acinetobacter baumannii* is a formidable global pathogen notorious for its widespread drug resistant nature It is a major culprit in various infections particularly targeting immunocompromised individuals in intensive care units ICUs A paramount concern associated with this pathogen lies in its remarkable ability to develop resistance to nearly all clinically utilized antibiotics Furthermore it exhibits a concerning propensity to disseminate this resistance rapidly transcending borders and impacting healthcare facilities across diverse economic strata Of particular focus is the carbapenem resistant strain of *A. baumannii* CRAB This strain has garnered the top spot on the World Health Organization's WHO list of pathogens necessitating urgent attention for new treatment development This book delves into numerous studies underscoring the pivotal role of *A. baumannii* as one of the most impactful bacteria contributing to Healthcare Associated Infections HAIs within the contemporary healthcare landscape **Historical Controversies and Historians** William Lamont, 2005-06-20 For students new to the subject of history there are many books on the theory of

writing history but fewer on how history is actually practised This work by a team of historians from the University of Sussex fills this gap The first half of the book examines a number of notable controversies that have been and still are the subject of historical debate for example race in South Africa the legacy of the French Resistance the origins of the Welfare State These illustrate the issues involved in doing history The second half of the book focuses upon the historians themselves such as Tawney Carr Buckhardt Weber Thompson and demonstrates how the historian puts his her own spin on historical interpretation Together the study of controversies and historians shows with clarity the practical issues of historical method Historical Controversies and Historians should be a useful primer for any student embarking on a course in history

Cancer Cell Chemoresistance and Chemosensitization Ajaikumar B. Kunnumakkara,Devivasha Bordoloi,Javadi Monisha,2018 Despite the significant advances in cancer therapy made through constant evaluation and analysis of treatment aftereffects the disease still remains one of the foremost causes of mortality worldwide killing more than 12 million people annually The prime reason behind the failure of conventional chemotherapeutics which are used as the chief regimen in the comprehensive treatment of cancers is the development of chemoresistance It can be either intrinsic or acquired and is primarily mediated via different key regulators like MDR MAPK NF B PI3K Akt Wnt signaling pathways etc Thus agents which can target these regulatory elements or pathways and in turn sensitize cancer cells to chemotherapy holds immense prospect However there is barely such comprehensive work available in scientific literature that explains how chemosensitization of cancer cells functions using different drug combinations and exhibit synergism This book provides a detailed description of chemoresistance and chemosensitization targets for chemosensitization and various approaches adapted in the process of chemosensitization Furthermore the book explicates the role of various chemosensitizers both natural and synthetic in sensitizing cancer cells and also details the current research findings on chemosensitization of different cancer types in both pre clinical and clinical settings Publisher s website
